Family and Peers Angela M. Neal-Barnett, Josefina M. Contreras, Kathryn A. Kerns, 2000-04-30 Why is it that relationships with family members predict the quality of children s relationships outside the family A wealth of research has documented that various aspects of family relationships are predictably related to the quality of children s interactions and relationships with peers Understanding what account for these effects is important both for theories of children s relationships and intervention efforts to ameliorate children s peer relationship difficulties This volume

advances the field by discussing several mechanisms that may account for continuities across family and peer relationships. A variety of theoretical perspectives are represented in the book. For example, both learning and biological explanations are considered. Authors also note two key considerations in investigating family and peer relationships. First, it is necessary to consider the cultural context. The function and meaning of family and peer relationships may differ depending on what roles are played by these relationships in different cultural contexts. Second, it is necessary to consider the child's age. Developmental issues such as concerns with establishing greater independence at the entrance to adolescence will impact both family and peer relationships.

Family-Peer Relationships Ross D. Parke, Gary W. Ladd, 2016-03-10. Originally published in 1992, this volume provided an up-to-date overview of recent research concerning the links between family and peer systems. Considerable work in the past had focused on family issues or peer relationships, but these systems had typically been considered separately. This volume bridges the gap across these two important socialization contexts and provides insights into the processes that account for the links across the systems, the ways in which the relationships between these systems shift across development. In addition, the variations in the links between family and peers are illustrated by cross-cultural work, studies of abused children, and research on the impact of maternal depression. In short, the volume provides not only a convenient overview of recent progress at the time but also lays out an agenda for future research.

Children's Play in Child Care Settings Hillel Goelman, Ellen Vineberg Jacobs, 1994-02-03. How do children play in different kinds of child care settings? How do child care environments influence their play? How do special needs children play in integrated and in segregated child care settings? How do adults influence play in child care environments? And what are the long-term effects of children's play in child care? These are among the questions addressed by the psychologists and educators who have contributed to this book. Researchers will find *Children's Play in Child Care Settings* to be a valuable review of current theory and research in this area. Practitioners will better understand the ways in which early childhood environments and early childhood educators can facilitate the play of young children in child care settings. And administrators will be able to draw upon the book in designing and implementing early childhood programs for special needs and non-special needs children.

Parenting and Child Development in Nontraditional Families Michael E. Lamb, 1998-10-01 The goal of this volume is to discuss in depth the ways in which various deviations from traditional family styles affect childrearing practices and child development. Each of the contributors illustrates the dynamic developmental processes that characterize parenting and child development in contexts that can be deemed nontraditional because they do not reflect the demographic characteristics of the traditional families on which social scientists have largely focused. The contributors deal with the dynamics and possible effects of dual career families, families with unusually involved fathers, families characterized by the occurrence of divorce, single parenthood, remarriage, poverty, adoption, reliance on nonparental childcare, ethnic membership, parents with lesbian or gay sexual orientations as well as violent and/or neglectful parents. By doing so, the authors provide thoughtful, literate and up-to-date accounts of a diverse array of nontraditional or traditionally understudied family types. All the chapters offer answers to a common question: How do these patterns of childcare affect children, their experiences and their developmental processes? The answers to these questions are of practical importance relevant to a growing proportion of the families and children in the United States but also have significant implications for the understanding of developmental processes in general. As a result, the book will be of value to basic social scientists as well as those professionals concerned with guiding and advising clients and public policy.
