Residential Construction Academy Electrical Principles Cd 1:

Residential Construction Academy Stephen L. Herman, 2002-11-18 Part of the Residential Construction Academy series Electrical Principles bridges the gap between theory books that include topics that electricians do not need to know e.g. resonance and devices and books for electricians that try to cover all the theory in one chapter. Instead, through the use of a lively writing style and frequent examples, Stephen Herman expands on the important topics that residential electricians need so that students have time to fully grasp the concepts they'll need on the job. This text focuses on the theory that a residential wireman needs and it includes important safety and OSHA information. Create a direct link between your education training program and the residential construction industry. Training materials are now available for many of the residential crafts based on skill standards developed by the nation's leading builders and educators. The result of a strategic partnership between the National Association of Home Builders, Home Builders Institute and Delmar Learning, the Residential Construction Academy Series is the perfect way to teach essential workplace skills to people new to the building trades. Ideal for use in vocational programs, workforce development programs, professional associations and trade unions, all materials are based on industry standards. The Residential Construction Academy also offers credentialing for programs using the skill standards and materials along with a national registry of students who have successfully completed participating programs. The goal is a workforce that is skilled, knowledgeable and able to meet the needs of the industry today and well into the future. *DVD Set I (1-4) for Herman's Residential Construction Academy: Electrical Principles, 2nd* Stephen L.

Herman, 2011-02-01 The DVD provides step by step instruction of important concepts for the topics discussed in the book. It is easy to follow and includes full color graphics and animations. The DVD provides an excellent resource for illustrating concepts or for assisting students who may have missed class. **Residential Construction Academy** Robert B. Ham, 2008
