

framework may help policy makers understand the ways housing policy impacts on household moves.

The paper then asks whether policy adequately considers the choices, risks and social costs and benefits associated with mobility. It finds that the costs of mobility may be high amongst those least able to pay for it, and asks whether the considerable costs associated with moving house should be borne by the poor, especially if it is labour market related.

3. Explaining mobility: Choice and Structural factors

People make choices in either moving or staying put in a house, and this choice is considered a right in a democratic country – the freedom of movement. This right might be said to be balanced by a 'right' to a place of abode or shelter, although this right is constrained by the operations of a market for a limited supply of dwellings. The degree of security of tenure made available on each property is in some senses the result of market negotiation between demand and supply for different tenures as well as rental property types, though these conditions may be amended in public housing.

But a person's or household's choice is conditioned by a range of circumstances that they face. Are the conditions in their current abode intolerable? Do they have an alternative place of abode that is preferable? Thus, mobility decisions are a combination of 'push' factors (which to some degree reflect external forces like inadequate dwelling, eviction or family breakdown) that act to propel a person from a dwelling, and 'pull' factors (such as taking a better job) that attract that person into a different dwelling elsewhere.

These decisions also need to be understood in the light of various wider structural forces (social, economic, environmental) that impinge on those decisions to stay or move. For example, moving may result from broader trends, such as an increased tendency for family breakdown (social), higher housing costs or unemployment (economic), or different perceptions of environmental qualities in certain locations or inappropriate housing stock for the population (environmental).

Figure 1 below provides a stylised way to understand the structural factors that 'push' people from one house and the factors that 'pull' them into another. In between are various institutional or economic barriers or facilitators, which constrain or enable mobility. Each of the factors is described in turn.²

² Wulfe, Flood and Newton (1992) outline the various models proposed to understand mobility, including the family life-cycle model, housing careers model, stress and awareness models, trade-off models and production/consumption based models. This model abstracts from these models.

Residential Mobility And Public Policy:

Residential Mobility and Public Policy William A. V. Clark, Eric G. Moore, 1980-12 This book arises out of a conference entitled Residential Mobility and Public Policy held at the University of California Los Angeles on November 12-14 1979. Experts from academic fields and practitioners involved in evaluation research and policy design at the federal level and individuals involved in program implementation at the local level attended the conference. Although all agreed that patterns of relocation of households in urban areas are of central importance in their policy work, they differed as to the nature of the problems of linking academic research and policy and hence of the intellectual paths to be pursued. The main purpose of this volume is to explore these differences and thereby provide a better understanding of the types of research on residential mobility which are likely to contribute to the policy process in the future. The Encyclopedia of Housing, Second Edition Andrew T. Carswell, 2012-05-31 Since publication of the groundbreaking Encyclopedia of Housing in 1998 many issues have assumed special prominence within this field and indeed within the global economy. For instance the global economic meltdown was spurred in large part by the worst subprime mortgage crisis we've seen in our history. On a more positive note the sustainability movement and green development has picked up considerable steam and given the priorities and initiatives of the current U.S. administration this will only grow in importance and increased attention has been given in recent years to the topic of indoor air quality. Within the past decade as well the Baby Boom Generation began its march into retirement and senior citizenship which will have increasingly broad implications for retirement communities and housing assisted living facilities aging in place livable communities universal design and the like. Finally within the last twelve years an emerging generation of young scholars has been making significant contributions to the field. For all these reasons and more we are pleased to present a significantly updated and expanded Second Edition of The Encyclopedia of Housing. **Inequality, Crime and Public Policy (Routledge Revivals)** John Braithwaite, 2013-09-13 First published in 1979 Inequality Crime and Public Policy integrates and interprets the vast corpus of existing research on social class slums and crime and presents its own findings on these matters. It explores two major questions: First, do policies designed to redistribute wealth and power within capitalist societies have effects upon crime? Second, do policies created to overcome the residential segregation of social classes have effects on crime? The book provides a brilliantly comprehensive and systematic review of the empirical evidence to support or refute the classic theories of Engels, Bonger, Merton, Cloward and Ohlin, Cohen, Miller, Shaw and McKay amongst many others. Braithwaite confronts these theories with evidence of the extent and nature of white collar crime and a consideration of the way law enhancement and law enforcement might serve class interest. *Evolving Geographical Structures* Daniel A. Griffith, A.C. Lea, 2012-12-06 Proceedings of the NATO Advanced Study Institute, Cappuccini, San Miniato, Italy, July 18-30 1982. *Handbook of Public Finance* Fred Thompson, Mark T. Green, 1998-02-04 Presenting emphases on and approaches to issues such as government spending, reporting, pricing and fiscal federalism, the Handbook of Public

Finance demonstrates the utility of integrating public finance theory with actual public policy practices. It discusses applications in major subfields of public finance including public education, environmental regulation, energy policy, social welfare programs, and local and state politics. Other topics of discussion include the theory and practice of tax incidence analysis, the marginal costs of taxation and regulation, the economics of expenditure incidence, discounting, and the social discount rate, passive use benefits, and public sector pricing. *Social Process and the City* Peter Williams, 2019-03-08

Contemporary urban studies engages a wide range of approaches in the analysis of the processes at work in urban areas. These approaches derive from anthropology, economics, geography, history, politics, and sociology, as well as from the professional experience of town planning and architecture. *Social process and the city* reflects this growing cross-disciplinary engagement. This shows the important problematic role which cities in particular and urban change in general have played in the growth of Australia. The overriding concern of each essay in this collection is to develop an understanding of the ways urban areas function and an awareness of how differing interpretations of urban phenomena might be applied. This attention to the nature of the forces at work and the processes these forces manifest themselves in is extended both empirically and conceptually. This book was first published in 1983. Gentrification, Displacement, and Neighborhood Revitalization J. John Palen, Bruce London, 1985-06-30

Bringing an empirical objective approach to a topic that has often been the source of emotional and uninformed controversy, *Gentrification, Displacement, and Neighborhood Revitalization* provides an introduction to major issues in urban revitalization, new research findings, and a discussion of theoretical perspectives. This is the first broad-based survey of a scattered literature that has not been readily accessible. The book's comprehensive introduction leads to informative analyses of new research by sociologists, planners, geographers, and urban studies faculty. A concluding essay examines the present state of knowledge about gentrification and discusses its implications, suggesting future developments and trends. Issues in Housing Discrimination, 1986 Handbook of Regional and Urban Economics P. Nijkamp, Edwin S. Mills, P. C. Cheshire, 1986

This second volume of the *Handbook* presents professional surveys of all the important topics in urban economics. The first section contains 6 surveys on locational analysis; the second 5 surveys of specific urban markets; and the third part presents 5 surveys of government policy issues. The book brings together exhaustive research by distinguished scholars from many countries. It is the only complete survey volume of urban economics and should serve as a reference volume to scholars and graduate students for many years. Modelling Housing Market Search William A. V. Clark, 2021-11-30

Originally published in 1982, this book contains research in the area of econometric modelling in the housing market, including that which has extended to the use of search models. The subjects covered include the importance of racial differences, spatial aspects of residential search, and

information provision and its effect on the behaviour of the buyers The combination of careful analytic modelling empirical testing and speculative discussions of the role of agents in the search process provides an innovative and imaginative approach to the interesting problems of understanding the individual behaviour in complex contexts such as the urban housing market

Crime and Public Policy James Q. Wilson, Joan Petersilia, 2012-06-01 Crime in the United States has fluctuated considerably over the past thirty years as have the policy approaches to deal with it During this time criminologists and other scholars have helped to shed light on the role of incarceration prevention drugs guns policing and numerous other aspects to crime control Yet the latest research is rarely heard in public discussions and is often missing from the desks of policymakers This book accessibly summarizes the latest scientific information on the causes of crime and evidence about what does and does not work to control it Thoroughly revised and updated this new version of Crime and Public Policy will include twenty chapters and five new substantial entries As with previous editions each essay reviews the existing literature discusses the methodological rigor of the studies identifies what policies and programs the studies suggest and then points to policies now implemented that fail to reflect the evidence The chapters cover the principle institutions of the criminal justice system juvenile justice police prisons probation and parole sentencing how broader aspects of social life inhibit or encourage crime biology schools families communities and topics currently generating a great deal of attention criminal activities of gangs sex offenders prisoner reentry changing crime rates With contributions from trusted leading scholars Crime and Public Policy offers the most comprehensive and balanced guide to how the latest and best social science research informs the understanding of crime and its control for policymakers community leaders and students of crime and criminal justice

Life in Poverty Neighbourhoods Jurgen Friedrichs, George Galster, SAO Musterd, 2013-09-13 In contemporary European and American urban policy and politics and in academic research it is typically assumed that spatial concentrations of poor households and or ethnic minority households will have negative effects upon the opportunities to improve the social conditions of those who are living in these concentrations Since the level of concentration tends to be correlated with the level of spatial segregation the debate on segregation is also linked to the social opportunity discussion This book explores the central questions in urban and housing studies Do poor neighbourhoods make their residents poorer Does the neighbourhood structure exert an effect on the residents behavioural

attitudinal or psychological even when controlling for individual characteristics of the residents This issue has offered a locus for multi disciplinary investigations on both sides of the Atlantic and this volume demonstrates the rich geographical sociological economic and psychological dimensions of this issue This book was previously published as a special issue of the journal Housing Studies

Handbook of Global Urban Health Igor Vojnovic,Amber Pearson,Gershim Asiki,Geoff DeVerteuil,Adriana Allen,2019-05-09 Through interdisciplinary and multidisciplinary perspectives and with an emphasis on exploring patterns as well as distinct and unique conditions across the globe this collection examines advanced and cutting edge theoretical and methodological approaches to the study of the health of urban populations Despite the growing interest in global urban health there are limited resources available that provide an extensive and advanced exploration into the health of urban populations in a transnational context This volume offers a high quality and comprehensive examination of global urban health issues by leading urban health scholars from around the world The book brings together a multi disciplinary perspective on urban health with chapter contributions emphasizing disciplines in the social sciences construction sciences and medical sciences The co editors of the collection come from a number of different disciplinary backgrounds that have been at the forefront of urban health research including public health epidemiology geography city planning and urban design The book is intended to be a reference in global urban health for research libraries and faculty collections It will also be appropriate as a text for university class adoption in upper division under graduate courses and above The proposed volume is extensive and offers enough breadth and depth to enable it to be used for courses emphasizing a U S or wider Western perspective as well as courses on urban health emphasizing a global context

Choosing Homes, Choosing Schools Annette Lareau,Kimberly Goyette,2014-03-31 A series of policy shifts

over the past decade promises to change how Americans decide where to send their children to school. In theory the boom in standardized test scores and charter schools will allow parents to evaluate their assigned neighborhood school or move in search of a better option. But what kind of data do parents actually use while choosing schools? Are there differences among suburban and urban families? How do parents' choices influence school and residential segregation in America? *Choosing Homes Choosing Schools* presents a breakthrough analysis of the new era of school choice and what it portends for American neighborhoods. The distinguished contributors to *Choosing Homes Choosing Schools* investigate the complex relationship between education, neighborhood, social networks, and larger patterns of inequality. Paul Jargowsky reviews recent trends in segregation by race and class. His analysis shows that segregation between blacks and whites has declined since 1970 but remains extremely high. Moreover, white families with children are less likely than childless whites to live in neighborhoods with more minority residents. In her chapter, Annette Lareau draws on interviews with parents in three suburban neighborhoods to analyze school choice decisions. Surprisingly, she finds that middle and upper class parents do not rely on active research such as school tours or test scores. Instead, most simply trust advice from friends and other people in their network. Their decision making process was largely informal and passive. Eliot Weinginer complements this research when he draws from his data on urban parents. He finds that these families worry endlessly about the selection of a school and that parents of all backgrounds actively consider alternatives including charter schools. Middle and upper class parents relied more on federally mandated report cards, district websites, and online forums, while working class parents use network contacts to gain information on school quality. Little previous research has explored what role school concerns play in the preferences of white and minority parents for particular neighborhoods. Featuring innovative work from more than a dozen scholars, *Choosing Homes Choosing Schools* adroitly addresses this gap and provides a firmer understanding of how Americans choose where to live and send their children to school.
