Bureau of Naval Personnel,1968     **The Sustainable Solution: Plastic Granulate Production in Action** Sándor Varga,1900 MONEY FROM TRASH Plastic waste has become a major

environmental concern in today's world. The excessive use of plastic and its improper disposal has led to the pollution of our oceans, landfills, and even our air. However, instead of viewing plastic waste as a problem, we can see it as an opportunity. With the right technology and processes, plastic waste can be transformed into high-quality secondary raw material, which can be used in various industries. This not only helps in reducing the amount of plastic waste in our environment but also creates a new source of income. By turning trash into money, we can incentivize individuals and businesses to properly manage their plastic waste. This could potentially lead to a cleaner and more sustainable future for our planet. Through the efficient processing of plastic waste, we can not only tackle the issue of pollution but also create a circular economy where waste is seen as a valuable resource. It is time for us to rethink our approach towards plastic waste and explore its potential as a secondary raw material.
