Resisting The Bomb:

The Struggle Against the Bomb Lawrence S. Wittner, 1997 *The Struggle Against the Bomb: Resisting the bomb* Lawrence S. Wittner, 1993 **S. Giorgio Maggiore. Vol. III; Docs. 1160-1199**, 1968 **Bulletin of the Atomic Scientists**, 1998-07 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world The Oxford Handbook of Postwar European History Dan Stone, 2012-05-17 The postwar period is no longer current affairs but is becoming the recent past As such it is increasingly attracting the attentions of historians Whilst the Cold War has long been a mainstay of political science and contemporary history recent research approaches postwar Europe in many different ways all of which are represented in the thirty five chapters of this book As well as diplomatic political institutional economic and social history The Oxford Handbook of Postwar European History contains chapters which approach the past through the lenses of gender espionage art and architecture technology agriculture heritage postcolonialism memory and generational change and shows how the history of postwar Europe can be enriched by looking to disciplines such as anthropology and philosophy The Handbook covers all of Europe with a notable focus on Eastern Europe Including subjects as diverse as the meaning of Europe and European identity southern Europe after dictatorship the cultural meanings of the bomb the 1968 student uprisings immigration Americanization welfare leisure decolonization the Wars of Yugoslav Succession and coming to terms with the Nazi past the essays in this Handbook offer an unparalleled coverage of postwar European history that offers far more than the standard Cold War framework Readers will find self contained state of the art analyses of major subjects each written by an acknowledged expert as well as stimulating and novel approaches to newer topics Combining empirical rigour and adventurous conceptual analysis this Handbook offers in one substantial volume a guide to the numerous ways in which historians are now rewriting the history of postwar Europe Atomic Age America Martin V. Melosi, 2016-09-13 Atomic Age America looks at the broad influence of atomic energy focusing particularly on nuclear weapons and nuclear power on the lives of Americans within a world context The text examines the social political diplomatic environmental and technical impacts of atomic energy on the 20th and 21st centuries with a look back to the origins of atomic theory *Confronting the Bomb* Lawrence S. Wittner, 2009-05-12 Confronting the Bomb tells the dramatic inspiring story of how citizen activism helped curb the nuclear arms race and prevent nuclear war This abbreviated version of Lawrence Wittner's award winning trilogy The Struggle Against the Bomb shows how a worldwide grassroots campaign the largest social movement of modern times challenged the nuclear priorities of the great powers and ultimately thwarted their nuclear ambitions Based on massive research in the files of peace and disarmament organizations and in formerly top secret government records extensive interviews with antinuclear activists and government officials and memoirs and other published materials Confronting the Bomb opens a unique window on one of the most

important issues of the modern era survival in the nuclear age It covers the entire period of significant opposition to the bomb from the final stages of the Second World War up to the present Along the way it provides fascinating glimpses of the interaction of key nuclear disarmament activists and policymakers including Albert Einstein Harry Truman Albert Schweitzer Norman Cousins Nikita Khrushchev Bertrand Russell Andrei Sakharov Linus Pauling Dwight Eisenhower Harold Macmillan John F Kennedy Randy Forsberg Mikhail Gorbachev Helen Caldicott E P Thompson and Ronald Reagan Overall however it is a story of popular mobilization and its effectiveness

Peace, Decolonization, and the Practice of Solidarity Rob Skinner, 2023-10-05 This book shows that the connected histories of decolonization and globalization concern the practices of individuals and movements as much as they do the ideologies of states institutions and organizations Viewing decolonization through non state activist practices and setting anti colonial solidarity in the context of the methods of contemporary global peace movements it argues that seemingly marginal histories can illuminate aspects of the end of empire that are not readily apparent in studies centred on state diplomacy and nationalist movements Focusing on a group of British and American activists including the pacifist campaigner A J Muste the anti apartheid priest Michael Scott and the civil rights organiser Bayard Rustin Skinner explores connected global histories of anti nuclear peace campaigns anti colonialism and decolonization to illuminate new perspectives on the end of empire and the Cold War Studying a failed attempt to infiltrate the French atom bomb test site in southern Algeria and a mass march across the border between Tanganyika and Northern Rhodesia that never took place these stories provide valuable insights into the interactions between local and global scales of historical experience In presenting these histories this book demonstrates how global and transnational histories can challenge and disrupt rather than reinforce hierarchies of power and privileges In doing so it also contributes to ongoing debates surrounding the nature of decolonization as a historical phenomenon by focusing on the practices of activism that shaped and were shaped by the political and intellectual structures of decolonization

Northern Ireland's '68 Simon Prince, 2018-08-21 The Troubles may have developed into a sectarian conflict but the violence was sparked by a small band of leftists who wanted Derry in October 1968 to be a repeat of Paris in May 1968 Like their French comrades Northern Ireland's sixty eighters had assumed that street fighting would lead to political struggle The struggle that followed however was between communities rather than classes In the divided society of Northern Ireland the interaction of the global and the local that was the hallmark of 1968 had tragic consequences Drawing on a wealth of new sources and scholarship Simon Prince's timely new edition offers a fresh and compelling interpretation of the civil rights movement of 1968 and the origins of the Troubles The authoritative and enthralling narrative weaves together accounts of high politics and grassroots protests mass movements and individuals and international trends and historic divisions to show how events in Northern Ireland and around the world were interlinked during 1968

Atomic Americans Sarah E. Robey, 2022-03-15 At the dawn of the Atomic Age Americans encountered troubling new questions brought about by the nuclear revolution In a representative democracy

who is responsible for national public safety How do citizens imagine themselves as members of the national collective when faced with the priority of individual survival What do nuclear weapons mean for transparency and accountability in government What role should scientific experts occupy within a democratic government Nuclear weapons created a new arena for debating individual and collective rights In turn they threatened to destabilize the very basis of American citizenship As Sarah E Robey shows in *Atomic Americans* people negotiated the contours of nuclear citizenship through overlapping public discussions about survival Policymakers and citizens disagreed about the scale of civil defense programs and other public safety measures As the public learned more about the dangers of nuclear fallout critics articulated concerns about whether the federal government was operating in its citizens best interests By the early 1960s a significant antinuclear movement had emerged which ultimately contributed to the 1963 nuclear testing ban *Atomic Americans* tells the story of a thoughtful body politic engaged in rewriting the rubric of rights and responsibilities that made up American citizenship in the Atomic Age

The Long War Andrew J. Bacevich, 2009-06-22 Essays by a diverse and distinguished group of historians political scientists and sociologists examine the alarms emergencies controversies and confusions that have characterized America's Cold War the post Cold War interval of the 1990s and today's Global War on Terror The developments of this Long War have left their imprint on virtually every aspect of American life and by considering the period as a whole this volume is the first to take a truly comprehensive look at America's response to the national security crisis touched off by the events of World War II Contributors consider topics ranging from grand strategy and strategic bombing to ideology and economics and assess the changing American way of war as the twentieth century progressed They evaluate the evolution of the national security apparatus and the role of dissenters who viewed the activities of that apparatus with dismay and they take a fresh look at the Long War's civic implications and its impact on civil military relations More than a military history *The Long War* examines the ideas policies and institutions that have taken shape since the United States claimed the role of global superpower In breaking down the old and artificial boundaries that have traditionally divided the postwar period into neat historical units this volume offers fresh perspectives on the current state of American national security

Beyond the Euromissile Crisis Luc-André Brunet, Eirini Karamouzi, 2025-04-01 Historical consensus views the Euromissile Crisis of the early 1980s as the last battle of the Cold War In this illuminating re examination of this multifaceted campaign *Beyond the Euromissile Crisis* broadens our understanding of anti nuclear activism highlighting how it remains a truly global phenomenon Investigating the motivations forms of action and accomplishments of activists from South Africa Polynesia Brazil and elsewhere this volume offers new ways of conceptualizing the chronology of anti nuclear protest

Radical Pacifism in Modern America Marian Mollin, 2013-05-29 *Radical Pacifism in Modern America* traces cycles of success and decline in the radical wing of the American peace movement an egalitarian strain of pacifism that stood at the vanguard of antimilitarist organizing and American radical dissent from 1940 to 1970 Using traditional archival material and oral history

sources Marian Mollin examines how gender and race shaped and limited the political efforts of radical pacifist women and men highlighting how activists linked pacifism to militant masculinity and privileged the priorities of its predominantly white members In spite of the invisibility that this framework imposed on activist women the history of this movement belies accounts that relegate women to the margins of American radicalism and mixed sex political efforts Motivated by a strong egalitarianism radical pacifist women rejected separatist organizing strategies and instead worked alongside men at the front lines of the struggle to construct a new paradigm of social and political change Their compelling examples of female militancy and leadership challenge the essentialist association of female pacifism with motherhood and expand the definition of political action to include women s political work in both the public and private spheres Focusing on the vexed alliance between white peace activists and black civil rights workers Mollin similarly details the difficulties that arose at the points where their movements overlapped and challenges the seemingly natural association between peace and civil rights Emphasizing the actions undertaken by militant activists Radical Pacifism in Modern America illuminates the complex relationship between gender race activism and political culture identifying critical factors that simultaneously hindered and facilitated grassroots efforts at social and political change

The Politics of Peace Petra Goedde, 2019-01-12 During a television broadcast in 1959 US President Dwight D Eisenhower remarked that people in the long run are going to do more to promote peace than our governments Indeed I think that people want peace so much that one of these days our governments had better get out of the way and let them have it At that very moment international peace organizations were bypassing national governments to create alternative institutions for the promotion of world peace and mounting the first serious challenge to the state centered conduct of international relations This study explores the emerging politics of peace both as an ideal and as a pragmatic aspect of international relations during the early cold war It traces the myriad ways in which a broad spectrum of people involved in and affected by the cold war used altered and fought over a seemingly universal concept These dynamic interactions involved three sets of global actors cold war states peace advocacy groups and anti colonial liberationists These transnational networks challenged and eventually undermined the cold war order They did so not just with reference to the United States the Soviet Union and Western Europe but also by addressing the violence of national liberation movements in the Third World As Petra Goedde shows in this work deterritorializing the cold war reveals the fractures that emerged within each cold war camp as activists both challenged their own governments over the right path toward global peace and challenged each other over the best strategy to achieve it The Politics of Peace demonstrates that the scientists journalists publishers feminists and religious leaders who drove the international discourse on peace after World War II laid the groundwork for the eventual political transformation of the Cold War

Disrupting Science Kelly Moore, 2013-12-15 Drawing extensively from archival sources and in depth interviews Kelly Moore examines the features of American science that made it an attractive target for protesters in the early cold war and Vietnam eras including scientists

work in military research and activities perceived as environmentally harmful She describes the intellectual traditions that protesters drew from liberalism moral individualism and the New Left and traces the rise and influence of scientist led protest organizations such as Science for the People and the Union of Concerned Scientists Moore shows how scientist protest activities disrupted basic assumptions about science and the ways scientific knowledge should be produced and recast scientists relationships to political and military institutions Jacket **Explosion-Resistant Buildings** T.

Bangash,2006-02-23 This excellent book highlights all aspects of the analysis and design of buildings subject to impact explosion and fire It is a definitive reference book and contains 10 chapters from a wide international prospective Three dimensional finite element and discrete element techniques are included They are applied to buildings such as the World Trade Center WTC Twin Towers and the Federal Building in Oklahoma on the basis of the designers drawings data and other information Many small case studies are also included The book has a comprehensive bibliography and a large appendix providing background analysis and computer subroutines of recently developed programs Nonproliferation Norms Maria

Rost Rublee,2009 Too often our focus on the relative handful of countries with nuclear weapons keeps us from asking an important question Why do so many more states not have such weapons More important what can we learn from these examples of nuclear restraint Maria Rost Rublee argues that in addition to understanding a state s security environment we must appreciate the social forces that influence how states conceptualize the value of nuclear weapons Much of what Rublee says also applies to other weapons of mass destruction as well as national security decision making in general The nuclear nonproliferation movement has created an international social environment that exerts a variety of normative pressures on how state elites and policymakers think about nuclear weapons Within a social psychology framework Rublee examines decision making about nuclear weapons in five case studies Japan Egypt Libya Sweden and Germany In each case Rublee considers the extent to which nuclear forbearance resulted from persuasion genuine transformation of preferences social conformity the desire to maximize social benefits and or minimize social costs without a change in underlying preferences or identification the desire or habit of following the actions of an important other The book offers bold policy prescriptions based on a sharpened knowledge of the many ways we transmit and process nonproliferation norms The social mechanisms that encourage nonproliferation and the regime that created them must be preserved and strengthened Rublee argues for without them states that have exercised nuclear restraint may rethink their choices *Construction* ,1917 **Peace** David

Cortright,2008-04-24 Veteran scholar and peace activist David Cortright offers a definitive history of the human striving for peace and an analysis of its religious and intellectual roots This authoritative balanced and highly readable volume traces the rise of peace advocacy and internationalism from their origins in earlier centuries through the mass movements of recent decades the pacifist campaigns of the 1930s the Vietnam antiwar movement and the waves of disarmament activism that peaked in the 1980s Also explored are the underlying principles of peace nonviolence democracy social justice and human

rights all placed within a framework of realistic pacifism Peace brings the story up to date by examining opposition to the Iraq War and responses to the so called war on terror This is history with a modern twist set in the context of current debates about the responsibility to protect nuclear proliferation Darfur and conflict transformation Confronting the Bomb
Lawrence Wittner,2009-05-12 Confronting the Bomb tells the dramatic inspiring story of how citizen activism helped curb the nuclear arms race and prevent nuclear war This abbreviated version of Lawrence Wittner s award winning trilogy The Struggle Against the Bomb shows how a worldwide grassroots campaign the largest social movement of modern times challenged the nuclear priorities of the great powers and ultimately thwarted their nuclear ambitions Based on massive research in the files of peace and disarmament organizations and in formerly top secret government records extensive interviews with antinuclear activists and government officials and memoirs and other published materials Confronting the Bomb opens a unique window on one of the most important issues of the modern era survival in the nuclear age It covers the entire period of significant opposition to the bomb from the final stages of the Second World War up to the present Along the way it provides fascinating glimpses of the interaction of key nuclear disarmament activists and policymakers including Albert Einstein Harry Truman Albert Schweitzer Norman Cousins Nikita Khrushchev Bertrand Russell Andrei Sakharov Linus Pauling Dwight Eisenhower Harold Macmillan John F Kennedy Randy Forsberg Mikhail Gorbachev Helen Caldicott E P Thompson and Ronald Reagan Overall however it is a story of popular mobilization and its effectiveness
