*Ecosystem Planning in Florida* Samuel David Brody, 2016-04-29 While ecosystem management requires looking beyond specific jurisdiction and focusing on broad spatial scales most planning decisions particularly in the USA are made at local level By looking at land use planning in Florida this volume recognizes the need for planners and resource managers to address ecosystem problems at local and community levels The factors causing ecosystem decline such as rapid urban development and habitat fragmentation occur at the local level and are generated by

local land use policies This book argues that understanding how local jurisdictions can capture and implement the principles of managing natural systems will lead to more sustainable levels of environmental planning in the future
