Fairness and Competence in Citizen Participation Ortwin Renn, Thomas Wehler, Peter Wiedemann, 2013-12-01 Ortwin Renn Thomas Wehler Peter Wiedemann In late July of 1992 the small and remote mountain resort of Morschach in the Swiss Alps became a lively place of discussion debate and discourse Over a three day period twenty two analysts and practitioners of public participation from the United States and Europe came together to address

one of the most pressing issues in contemporary environmental politics How can environmental policies be designed in a way that achieves both effective protection of nature and an adequate representation of public values In other words how can we make the environmental decision process competent and fair All the invited scholars from academia international research institutes and governmental agencies agreed on one fundamental principle For environmental policies to be effective and legitimate we need to involve the people who are or will be affected by the outcomes of these policies There is no technocratic solution to this problem Without public involvement environmental policies are doomed to fail The workshop was preceded by a joint effort by the three editors to develop a framework for evaluating different models of public participation in the environmental policy arena During a preliminary review of the literature we made four major observations These came to serve as the primary motivation for this book First the last decade has witnessed only a fair amount of interest within the sociological or political science communities in issues of public participation

Facility Siting in the AsiaPacific Fung Tung, S. Hayden Lesbirel, Kin-che Lam, 2011-07-18 This volume explores the management of conflicts arising from the siting of unwanted projects in the AsiaPacific a region inadequately explored by the relevant literature The work includes studies on a variety of locations including Hong Kong Japan Mainland China Taiwan Vietnam Singapore and others Contributions are drawn from several leading scholars intimately familiar with the locations under study and employ theoretical comparative and policybased approaches to analysis of environmental conflict risk management and public participation The editors also provide introductory and concluding sections in which the siting issues under discussion are summarized and contextualized The result is a collection that serves as an invaluable aid and source of information for policymakers environmentalists and scholars of the AsiaPacific and elsewhere

Urban Peacebuilding In Divided Societies Scott Bollens, 2021-11-28 Urban Peacebuilding in Divided Societies explores the effects of urban policy and planning in the management of ethnic conflict in strife torn societies focusing on the cases of Belfast and Johannesburg It combines perspectives from urban geography political science social psychology and urban planning to study the relationship between ethnic ideologies and the urban strategies that affect ethnic territoriality in the form of urban land use housing economic development services and citizen involvement The book contrasts Belfast embedded within an uncertain shift from conflict to political settlement with Johannesburg engaged in post resolution reconciliation to analyze along different points of societal transition the contributions of urban policymaking to peacemaking and peacebuilding It describes the differing roles obstructive or facilitative that contested cities can play amidst broader peacemaking efforts consistent with Bollens contention that there are lessons in urban peacebuilding for constructing mutually tolerable living environments at the regional and national levels Effectively cities and urban policies are the locus for operationalizing national ideologies of ethnic coexistence Urban Peacebuilding in Divided Societies explores the effects of urban policy and planning in the management of ethnic conflict in strife torn societies focusing on the cases of Belfast and Johannesburg It combines

Willingham,1990-01-08 Resisting injustice in Appalachia and empowering residents to build democratic alternatives to the heritage of enduring poverty **The Law of Environmental Justice** Michael Gerrard,Sheila R. Foster,2008 Environmental justice is the concept that minority and low income individuals communities and populations should not be disproportionately exposed to environmental hazards and that they should share fully in making the decisions that affect their environment This volume examines the sources of environmental justice law and how evolving regulations and court decisions impact projects around the country *Environmental Policy Analysis and*

Practice Michael R Greenberg, 2008-03-13 Pressing environmental challenges are frequently surrounded with stakeholders on all sides of the issues. Opinions expressed by government agencies, the private sector, special interests, nonprofit communities, and the media among others can quickly cloud the dialogue, leaving one to wonder how policy decisions actually come about. In *Environmental Policy Analysis and Practice*, Michael R Greenberg cuts through the complicated layers of bureaucracy, science, and the public interest to show how all policy considerations can be broken down according to six specific factors: 1. the reaction of elected government officials, 2. the reactions of the public and special interests, 3. knowledge developed by scientists and engineers, 4. economics, 5. ethical imperatives, and 6. time pressure to make a decision. The book is organized into two parts, with the first part defining and illustrating each one of these criteria. Greenberg draws on examples such as nuclear power, pesticides, brownfield redevelopment, gasoline additives, and environmental cancer, but focuses on how these subjects can be analyzed rather than exclusively on the issues themselves. Part two goes on to describe a set of over twenty tools that are used widely in policy analysis, including risk assessment, environmental impact analysis, public opinion surveys, cost-benefit analysis, and others. These tools are described and then illustrated with examples from part one. Weaving together an impressive combination of practical advice and engaging first-person accounts from government officials, administrators, and leaders in the fields of public health and medicine, this clearly written volume is poised to become a leading text in environmental policy.

Controlling Technocracy Gregory E. McAvoy, 1999-11-01 Disputes over hazardous waste sites usually are resolved by giving greater weight to expert opinion over public, not in my back yard, reactions. Challenging the assumption that policy experts are better able to discern the general welfare, Gregory E. McAvoy here proposes that citizen opinion and democratic dissent occupy a vital, constructive place in environmental policymaking. McAvoy explores the issues of citizen rationality, the tension between democracy and technocracy, and the link between public opinion and policy in the case of an unsuccessful attempt to site a hazardous waste facility in Minnesota. He shows how the site was defeated by citizens who had reasonable doubts over the need for the facility. Offering a comprehensive look at the policymaking process, McAvoy examines the motivations of public officials, the resources they have for shaping opinion, the influence of interest groups, and the evolution of waste reduction programs in Minnesota and other states. Integrating archival material, interviews, and quantitative survey data, he argues that NIMBY movements can bring miscalculations to light and provide an essential check on policy experts' often partisan views. This book will be of value to those who work or study in the fields of hazardous waste policy, facility siting, environmental policy, public policy, public administration, and political science.

The View From the Center of the Universe Joel R. Primack, Nancy Ellen Abrams, 2007-08-07 In this strikingly original book, a world-renowned cosmologist and an innovative writer of the history and philosophy of science uncover an astonishing truth: Humans actually are central to the universe. What does this mean for our culture and our personal lives? The answer is revolutionary: a science-based cosmology that allows us to understand the universe as a whole.

and our extraordinary place in it **Site Unseen** Gerald Jacob,2010-11-23 Gerald Jacob views the history of public policy regarding nuclear waste culminating in the 1982 Nuclear Waste Policy act and its aftermath The 1982 act promised a solution but Jacob believes it deferred to the interests of the nuclear utilities and the U S Department of Energy He describes how the nuclear establishment used science and geography to protect its interests and dominate nuclear waste policy making He examines the federal promotion of nuclear power and asserts that federal policies strong armed public opposition and locked the country into a single but flawed waste disposal solution GIS for Group Decision Making Piotr Jankowski,Timothy Nyerges,2001-01-18 In today s society it is very common for decisions that influence us all to be made by a combination of interested parties all with their own agenda In this instance how can we be sure that the decision is the correct one not just decided by the group with the most political influence or most money Such groups have now become fundamental deci Environmental Justice Through Research-Based Decision-Making William M. Bowen,2002-05-03 This book discusses whether and to what extent there are widespread injustices and inequities caused by the distribution of environmental hazards in America today *Encyclopedia of Human Geography* Barney Warf,2006-05-16 Human geography in the last decade has undergone a conceptual and methodological renaissance that transformed it into one of the most dynamic and innovative of the social sciences Long a borrower of ideas from other disciplines geography has become a contributor in its own right and a spatial turn is evident in disciplines as diverse as Sociology Anthropology and Literary Criticism With more than 300 entries written by an international team of leading authorities in the field the Encyclopedia of Human Geography offers a comprehensive overview of the major ideas concepts terms and approaches that characterize a notoriously diverse field This multidisciplinary volume provides cross cultural coverage of human geography as it is understood in the contemporary world and takes into account the enormous conceptual changes that have evolved since the 1970s including a variety of social constructivist approaches Key Features Examines a range of themes characterizing different schools of thought and addresses long standing topics such as urban economic and medical geography as well as contemporary topics including feminism the social dimensions of GIS and the social construction of nature Explores many of the dualities that long characterized social science nature versus society the individual versus the social the historical versus the geographical consumption versus production and breaks them down using postmodern and poststructuralist approaches Illustrates how social and spatial structures draw upon people s daily lives which in turn structures their actions Looks at how globalization has manifested differently from place to place by discussing topics such as transnational capital international trade global commodity chains global cities international financial and telecommunications systems and how the global economy is reshaping geopolitics and governance Key Themes Cartography Geographical Information Systems Economic Geography Geographic Theory and History Political Geography Social Cultural Geography Urban Geography
