Resolving Disputes Over Life Sustaining Treatment Thomas L. Hafemeister, Paula L. Hannaford, 1996-01-01 **The Hastings Center Guidelines for Decisions on Life-Sustaining Treatment and Care Near the End of Life** Nancy Berlinger, Bruce Jennings, Susan M. Wolf, 2013-04-26 This major new work updates and significantly expands The Hastings Center's 1987 Guidelines on the Termination of Life Sustaining Treatment and Care of the Dying Like its predecessor this second edition will shape the ethical and legal framework for decision making on treatment and end of life care in the United States This groundbreaking work incorporates 25 years of research and innovation in clinical care law and policy It is written for physicians nurses and other health care professionals and is structured for easy reference in difficult clinical situations It supports the work of clinical ethicists ethics committee members health lawyers clinical educators scholars and policymakers It includes extensive practical recommendations Health care reform places a new set of challenges on decision making and care near the end of life The Hastings Center Guidelines are an essential resource *Managing Death* James M. Hoefler, 2019-08-15 Many Americans before they die will go through a stage where they are unable to make competent decisions about their own life sustaining medical treatment More and more family members and care givers are facing these difficult decisions in their stead becoming engulfed in questions about personal wishes medical ethics state and federal law and quality of life Drawing on provocative case studies personal interviews and detailed research James Hoefler examines the medical legal ethical and clinical aspects of such right to die issues Beginning with the legal struggle of a woman whose son existed in a persistent vegetative state PVS for seventeen years the author moves into a broader look at consensus among professional organizations from the AMA to the President's Commission to the National Center for State Courts beliefs of mainstream religious groups public opinion issues surrounding end stage Alzheimer's and other organic brain disorders that can slowly lead to PVS and the role of artificial nutrition and hydration in these cases Hoefler concludes with recommendations on how to improve the quality of right to die decision making An absorbing read with a minimum of technical jargon this book is a valuable guide to care givers public policy students medical ethicists family members and anyone facing questions about an individual's right to die **Guidance for Healthcare Ethics Committees** D. Micah Hester, Toby Schonfeld, 2012-08-02 Every accredited American hospital is required to have a mechanism for handling ethical concerns most hospitals satisfy this requirement by constituting an institutional healthcare ethics committee HEC a pattern which is repeated in most western countries This text provides definitive comprehensive guidance for members of healthcare ethics committees who find themselves confronted with ethically challenging situations Each chapter includes learning objectives clinical case studies and questions to stimulate discussion among committee members Particular emphasis is given to consultation as this often presents the greatest challenges to committee members Each chapter stands alone as a teaching module as well as forming part of a comprehensive volume Written and edited by nationally and internationally recognized

experts in bioethics this is essential reading for every member of a healthcare ethics committee

Palliative Care in Neurology Raymond Voltz, 2004 Palliative care is the duty of every neurologist however to date this has not been a standard feature of neurological practice or training This book helps define a new field namely palliative care in neurology It brings together all necessary information for neurologists caring for a patient with advance disease Palliative care is an approach to the management of patients with life threatening illness that attempts to enhance comfort relieve psychosocial and spiritual distress assure respect for decision making provide support for the family and prepare the patient and family for the end of life This unique book covers each of the many dimensions of palliative care as they relate to patients with advanced neurological disorders Basic principles of palliative care and specific ethical issues such as euthanasia food and hydration and advance directives are covered The needs of populations with specific neurological disorders are described and the management of symptoms that are common to all is explored in detail Each chapter introduces its topic using a case report that may be used directly for teaching purposes The authors have put together an invaluable resource which lays the foundation for further research in the field

Ethical Issues in Neurology James L. Bernat, 2008 Written by an eminent authority from the American Academy of Neurology's Committee on Ethics Law and Humanities this book is an excellent text for all clinicians interested in ethical decision making The book features outstanding presentations on dying and palliative care physician assisted suicide and voluntary active euthanasia medical futility and the relationship between ethics and the law New chapters in this edition discuss how clinicians resolve ethical dilemmas in practice and explore ethical issues in neuroscience research Other highlights include updated material on palliative sedation advance directives ICU withdrawal of life sustaining therapy gene therapy the very low birth weight premature infant the developmentally disabled patient informed consent organizational ethics brain death controversies and fMRI and PET studies relating to persistent vegetative state

The Definition of Death Stuart J. Youngner, Robert M. Arnold, Renie Schapiro, 2002-10-15 In the 1980s following the recommendation of a presidential commission all fifty states replaced previous cardiopulmonary definitions of death with one that also included total and irreversible cessation of brain function The Definition of Death Contemporary Controversies is the first comprehensive review of the clinical philosophical and public policy implications of our effort to redefine the change in status from living person to corpse Edited by Stuart J Youngner Robert M Arnold and Renie Schapiro the book is the result of a collaboration among internationally recognized scholars from the fields of medicine philosophy social science law and religious studies Throughout the contributors struggle to reconcile inconsistencies and gaps in our traditional understanding of death and to respond to the public's concern that in the determination of death under current policies patients interests may be compromised by the demand for organ retrieval Their questions about the philosophical and scientific bases for determining death lead inevitably to more profound questions of social policy Acknowledging that the definition of death is as much a social construct as a scientific one the authors in their analysis of these issues provide a

Gerontologic Palliative Care Nursing

Marianne Matzo,Deborah Witt Sherman,2004 Older adults afflicted with progressive eventually fatal chronic illness have care needs and personal priorities that tend to focus on living well despite the disease At this phase of life the wish is for symptom relief maintenance of activities concern for family and preparation for death and bereavement When progressive disability marks the last months and years the patient should remain focused on living life as fully as possible until its end Major advances in enabling function and managing symptoms have taken place in the past decade or two People who once would have suffered terribly from pain can now expect to be comfortable with aggressive pain and symptom management The challenge in today's nursing practice is that nurses work in a care system that was not designed to deal with the challenges posed by large numbers of persons coming to the end of life at the same time Nurses are not adequately prepared to provide quality compassionate care for persons who are old sick and eventually dying Matzo and Sherman's new book provides a valuable resource for practicing nurses at all levels in the health care continuum who care for older adults at the end of life The goal

of the book is to enhance quality of life for older adult patients and families who have progressive incurable illnesses Focuses on quality end of life nursing care and its impact from a palliative care perspective Addresses active and compassionate care therapies to enhance physical psychological social and spiritual domains of life Explores the spiritual social and psychological aspects of key nursing competencies at the end of life and progresses to the more evidence based information and interventions related to pain symptom management disease progression and care of the dying elder Includes Case Studies which help put the content into a more humanistic perspective Provides Evidence Based Practice boxes that apply current research to findings

Strange Bedfellows Ben A. Rich, 2007-05-08 The pervasive influence of law on medical practice and clinical bioethics is often noted with a combination of exasperation and lamentation Physicians and non physician bioethicists generally speaking consider the willingness of courts legislatures and regulatory agencies to insinuate themselves into clinical practice and medical research to be a distinctly negative aspect of contemporary American society They are quick to point out that their colleagues in other Western developed nations are not similarly afflicted and that the situation which obtains elsewhere is highly preferable to the legalization and purported over regulation of medicine that has taken place in the United States during the last fifty years In this book I offer a decidedly different perspective It is admittedly not entirely without personal and professional bias Prior to becoming a full time academic teaching bioethics in the setting of an academic medical center I was for nearly 20 years an attorney specializing in health law Even after earning a doctorate in philosophy I was frequently considered to be the resident lawyer on the bioethics faculty much more frequently looked to for my insights on the law than my perspective as one who had formally studied moral philosophy and applied ethics I note this not out of a sense of frustration or disappointment but as confirmation that even among physicians and non physician bioethicists there is widespread recognition that the law does have important contributions to make in assessing the practice of medicine and the conduct of medical research

Evidence-Based Geriatric Nursing Protocols for Best Practice Deanna Gray-Miceli, 2007-11-16 Designated a Doody's Core Title As a gerontological clinical educator research nurse I will often use this as a reference The format and the content are good and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice Score 97 5 stars Doody's This third edition holds the promise of bringing yet another level of depth and sophistication to understanding the best practices for assessment interventions and anticipated outcomes in our care of older adults Evidence Based Geriatric Nursing Protocols for Best Practice is intended to bring the most current evidence based protocols known to experts in geriatric nursing to the audience of students both graduate and undergraduate practitioners at the staff level from novice to expert clinicians in specialty roles educators care managers and advanced practice nurses and nursing leaders of all levels We owe a debt of gratitude to the many authors and the editors for bringing this work to us from the preface by Susan Bowar Ferres PhD RN CNAA BC Senior Vice President Clinical Nurse Specialist Durham Veterans Administration Medical Center Geriatric

Research Education and Clinical Center This is the third thoroughly revised and updated edition of the book formerly entitled Geriatric Nursing Protocols for Best Practice The protocols address key clinical conditions and circumstances likely to be encountered by a hospital nurse caring for older adults They represent best practices for acute care of the elderly as developed by nursing experts around the country as part of the Hartford Foundation s Nurses Improving Care to the Hospitalized Elderly project NICHE This third edition includes 17 revised and updated chapters and more than 15 new topics including critical care diabetes hydration oral health care palliative care and substance abuse Each chapter includes educational objectives assessment of the problem nursing intervention or care strategies and references most chapters have case studies

Legal and Ethical Issues for Health Professionals with Navigate Advantage Access George D.

Pozgar,2023-03-31 Legal and Ethical Issues for Health Professionals 6th Edition has been designed to assist the reader in a more comfortable transition from the didactics of the classroom to the practical application in the workplace The 6th Edition provides the reader with a clearer understanding of how the law and ethics are intertwined as they relate to health care dilemmas The 6th Edition as with previous editions has been designed to introduce the reader to various ethical legal issues and should not be considered an in depth or comprehensive review of a particular ethical legal issue The book is a call to arms to do good things to stand out from the crowd because acts of caring compassion and kindness often go unnoticed

Medical Decision-Making on Behalf of Young Children Imogen Goold, Cressida Auckland, Jonathan Herring, 2020-09-17 In the wake of the Charlie Gard and Alfie Evans cases a wide ranging international conversation was started regarding alternative thresholds for intervention and the different balances that can be made in weighing up the rights and interests of the child the parent s rights and responsibilities and the role of medical professionals and the courts This collection provides a comparative perspective on these issues by bringing together analysis from a range of jurisdictions across Europe North and South America Africa and Asia Contextualising the differences and similarities and drawing out the cultural and social values that inform the approach in different countries this volume is highly valuable to scholars across jurisdictions not only to inform their own local debate on how best to navigate such cases but also to foster inter jurisdictional debate on the issues The book brings together commentators from the fields of law medical ethics and clinical medicine across the world actively drawing on the view from the clinic as well as philosophical legal and sociological perspectives on the crucial question of who should decide about the fate of a child suffering from a

serious illness In doing so the collection offers comprehensive treatment of the key questions around whether the current best interests approach is still appropriate and if not what the alternatives are It engages head on with the concerns seen in both the academic and popular literature that there is a need to reconsider the orthodoxy in this area
