consider in selecting these 14 articles we faced the challenging task of how to include papers from across the 15 distinct sections of the journal whilst at the same time achieving a sense of cohesion to the ebook overall. However, amidst this diversity, we noticed a convergence in our highest quality papers around three pivotal themes that are central to our journal's mission: resilience, sustainability, and technology. In this way, despite the broad range of topics covered within both our journal and this selection, this ebook can truly be considered representative of our journal as a whole. These carefully chosen papers encompass high quality original research and comprehensive reviews which also embody the ethos of innovation and excellence that defines our journal. As the Field Chief Editor, I am thankful to all authors who have enriched our journal with their high caliber work. I extend sincere appreciation to the dedicated efforts of our editors and reviewers whose invaluable contributions have been instrumental in shaping *Frontiers in Built Environment* in 2023.

Research Anthology on Military and Defense Applications, Utilization, Education, and Ethics Management Association, Information Resources, 2021-05-28. Military technology is highly advanced in terms of technology being used in the field: computer applications, artificial intelligence, and software applications. These high performance technologies range from weapons to communications technology to automation in vehicles and weaponry. These technologies must be both secure and reliable in harsh environments. Research is being focused specifically on that including how military and defense applications operate, what modern technologies are being used, and the ethics surrounding these applications. A holistic view of these applications is necessary for both understanding current military tactics and tools along with the future applications. The *Research Anthology on Military and Defense Applications Utilization Education and Ethics* focuses specifically on military and defense operations, expenditure, technologies, and tools, and the ethics surrounding technologies like weaponry and artificial intelligence in the military. The chapters cover a wide and diverse range of military and defense applications while providing crucial information on the functions, security, and reliability of these technologies. Beyond an understanding of the applications themselves, this book also focuses on military education surrounding these technologies and the ethics of usage to provide a well rounded understanding of research in the field. This book is ideal for military consultants, military personnel, defense agencies, national security agencies, government officials, defense personnel, policymakers, military educators, and trainers, stakeholders.
