Theory and History of Ocean Boundary-Making Douglas M. Johnston, 1988-09-01 In this book Douglas Johnston provides a synthesis of all disciplines relevant to any aspect of boundary making He outlines the general theory of boundary making reviews the modern history of all modes of boundary making in the ocean and provides a theoretical framework for the analysis and evaluation of ocean boundary claims practices arrangements and settlements The author suggests that as bilateral treaty making continues significant boundary delimitation patterns will emerge some of which may prove useful in non oceanic contexts of boundary making and natural resource management such as Antarctica airspace and outerspace and international lakes and rivers

The Oxford Handbook of Ecocriticism Greg Garrard, 2014-07-03 The Oxford Handbook of Ecocriticism provides a broad survey of the longstanding relationship between literature and the environment The moment for such an offering is opportune in many respects multiple environmental crises are increasingly inescapable at both transnational and local levels the role of the humanities in addition to technology and politics is increasingly recognized as central for exploring and finding solutions and the subject of ecocriticism has reached a kind of critical mass both within its Anglo American heartlands and beyond From its origins in the study of American Nature Writing and British Romanticism ecocriticism has developed along numerous theoretical historical cultural and geographical axes the most contemporary and exciting of which will be represented in the Handbook The contributors include eminent founders of the field including Michael Branch and Richard Kerridge a number of key second wave ecocritics and the best up and coming scholars Topics covered include Renaissance anxieties about nature the challenges of representing climate change the racialization of the

environment in the early 20th century language and the concept of biosemiotics and the possibilities for environmental humour **Energy Abstracts for Policy Analysis** ,1978-07 Collective Decision Making Clifford S. Russell,2013-11-26 First Published in 2011 This is Volume 11 of fourteen in the library collection of Policy and Government and looks at the applications from public choice theory on decision making It brings together proceedings that look seek to answer the question for the forum which was whether public choice theory offers promise of providing a firmer foundation for applied institutional research and for institutional innovations which could contribute to the solution of some of these problems

Breaking the Ice Barry Zellen,2008-03-20 *Breaking the Ice* is a comparative study of the movement for native land claims and indigenous rights in Alaska and the Western Arctic and the resulting transformation in domestic politics as the indigenous peoples of the North gained an increasingly prominent role in the governance of their homeland This work is based on field research conducted by the author during his nine year residency in the Western Arctic Zellen discusses the major conflicts facing Alaskan Natives from the struggle to regain control over their land claims to the Native alienation from the corporate structure and culture and the resulting resurgence in tribalism He shows that while the forces of modernism and traditionalism continued to clash these conflicts were mediated by the structures of co management corporate development and self government created by the region s comprehensive land claims settlements *Breaking the Ice* gives testimony to the achievements of Alaskan Natives through peaceful negotiation and argues that the age of land claims has transmuted this same tribal force into something else altogether in the North a peaceful force to spawn the emergence of new structures of Aboriginal self governance Third Party Dispute Settlement in an Interdependent World Marcel M.T.A.

Brus,2024-01-15 The central theme of this book is the strengthening of the legitimacy and integrity of international law in the post Cold War interdependent international community The investigation focuses on the relationship between international decision making procedures in particular compulsory third party dispute settlement and legitimacy and integrity as perceived by states and other international actors It starts with a description of recent developments with regard to dispute settlement in the law of the sea GATT WTO Antarctica and global environmental protection Compulsory third party dispute settlement has been accepted in treaty regimes in these fields as it is indispensable in safeguarding the legitimacy and integrity of such regimes The focus then shifts to an extensive analysis of changes in the international community in general and their consequences for the international legal system By focusing on legitimacy and integrity and by providing a theoretical framework in which these concepts can be applied this book contributes significantly to the discussion of the theoretical foundations of international law The author is winner of the 1995 Award of the Foundation Praemium Erasmianum Amsterdam **Resource Regimes** Oran R. Ebbin,Alf H. Hoel,Are Sydnes,2005-06-07 This is the first systematic assessment of the international 200 mile exclusive economic zone To date 145 states have ratified the Law of the Sea Convention and most have established EEZs This volume focuses on the specific nature of the EEZ and the construction and evolution of institutions stemming from its introduction specifically examining developments at local national and international levels **The Global Environment and International Law** Joseph F. C. DiMento,2010-01-01 2004 A Choice Outstanding Academic Book International law has become the key arena for protecting the global environment Since the 1970s literally hundreds of international treaties protocols conventions and rules under customary law have been enacted to deal with such problems as global warming biodiversity loss and toxic pollution Proponents of the legal approach to environmental protection have already achieved significant successes in such areas as saving endangered species reducing pollution and cleaning up whole regions but skeptics point to ongoing environmental degradation to argue that international law is an ineffective tool for protecting the global environment In this book Joseph DiMento reviews the record of international efforts to use law to make our planet more livable He looks at how law has been used successfully often in highly innovative ways to influence the environmental actions of governments multinational corporations and individuals And he also assesses the failures of

international law in order to make policy recommendations that could increase the effectiveness of environmental law He concludes that a supranational model is not the preferred way to influence the actions of sovereign nations and that international environmental law has been and must continue to be a laboratory to test approaches to lawmaking and implementation for the global community

Maritime Regime Building Mark J. Valencia, 2021-10-18 The past few decades have witnessed the emergence of a vast array of regional arrangements and institutions dealing with all aspects of ocean management The level of cooperation ranges from minimal dispute avoidance to relatively comprehensive ocean governance at the regional level As concrete examples reasonably successful and comprehensive regional regimes have been created for the Baltic the North and the Mediterranean Seas and the South Pacific And attempts at regional regime building are ongoing in Southeast Asia the South China Sea and the Indian Ocean Although there are broad similarities between the semi enclosed seas of Western Europe and Northeast Asia no regional maritime regime has yet been initiated in Northeast Asia The papers in this volume are authored by leading authorities on not only the maritime affairs of their particular region of focus but on maritime policy in general They describe and explain existing or incipient regional maritime regimes in an unusually broad comparative context and extract lessons learned that may be applicable elsewhere including Northeast Asia The case studies are neatly sandwiched between an introduction to concepts and principles on regional co operation and concluding chapters on lessons learned and their applicability to Northeast Asia Moreover the papers raise and address several questions of relevance to policy For example what factors are conducive to maritime regime initiation expansion and positive evolution and which constrain regime formation and evolution Why has maritime regime building been successful in Europe and largely unsuccessful in Asia And which if any lessons learned in the European context are applicable in Asia Given the growing interest in regime formation and effectiveness in general and maritime regimes in particular this book will be of considerable interest to both analysts and policymakers

On Thin Ice Barry Scott Zellen, 2009-11-12 *On Thin Ice* explores the relationship between the Inuit and the modern state in the vast but lightly populated North American Arctic It chronicles the aspiration of the Inuit to participate in the formation and implementation of diplomatic and national security policies across the Arctic region and to contribute to the reconceptualization of Arctic Security including the redefinition of the core values inherent in northern defense policy With the warming of the Earth's climate the Arctic rim states have paid increasing attention to the commercial opportunities strategic challenges and environmental risks of climate change As the long isolation of the Arctic comes to an end the Inuit who are indigenous to the region are showing tremendous diplomatic and political skills as they continue to work with the more populous states that assert sovereign control over the Arctic in an effort to mutually assert joint sovereignty across the region Published on the 50th anniversary of Ken Waltz's classic *Man the State and War* Zellen's *On Thin Ice* is at once a tribute to Waltz's elucidation of the three levels of analysis as well as an enhancement of his famous Three Images with the addition of a new Fourth Image to describe a tribal level of analysis This

model remains salient in not only the Arctic where modern state sovereignty remains limited but in many other conflict zones where tribal peoples retain many attributes of their indigenous sovereignty **International Cooperation** Oran R. Young, 1989 The notion of regimes as institutions that shape international behavior has received much attention from scholars in the field of international relations as a way of understanding how sovereign states secure international cooperation Oran Young here seeks both to develop our theoretical grasp of international regimes and to expand the range of empirical applications of this line of analysis
