Estudios jurídicos sobre responsabilidad penal, civil y administrativa del médico y otros agentes sanitarios

Morillas Cueva, Lorenzo , Suárez López, José María , 2014-09-01 El ejercicio de la medicina se ha visto sacudido en las últimas décadas por una serie de circunstancias transformadoras de su propia realidad. De la medicina tradicional conservadora y paternalista se ha ido a una sumamente activa operativa sofisticada sustentada en avanzadas y complejas tecnologías pero también generadora de importantes riesgos en su aplicación. El profundo cambio generalmente para bien a excepción de sus cuotas de masificación tanto en pacientes como en personal sanitario hace que sea uno de los temas menos sociales más relevantes para la comunidad ciudadana deseosa y al mismo tiempo exigente de una sanidad sobre todo pública que realmente le dé las prestaciones que una sociedad avanzada requiere. El camino obviamente no es fácil. Se han de conjugar las garantías exigibles para el correcto ejercicio de la profesión médica sanitaria con los derechos de los pacientes, pilar fundamental de las relaciones clínico-asistenciales. Todo ello no ha pasado desapercibido para nuestros legisladores ni a nivel internacional ni nacional. Se precisa desde las más diversas perspectivas interpretar en clave de aclaración y fijación conceptual de las premisas más importantes a tener en cuenta la situación jurídica de unos y otros, los derechos y obligaciones de los profesionales sanitarios y al mismo tiempo de los ciudadanos que necesitan de su atención e incluso de las instituciones sanitarias y de los propios responsables del sistema. En esta línea hemos situado la investigación y ahora el libro que mostramos en razón a nuestra especialización jurídica pluridisciplinar y transversal a nuestros conocimientos de una materia que nos ha ocupado mucho tiempo y esfuerzo a un compromiso por conseguir una mejor y más adecuada protección de la salud para todos los ciudadanos y ciudadanas que requieren de un servicio tan importante y vital para todos.

Erin,Suzanne Ost,2007-11-29 This book examines questions of medical accountability and ethics It analyses how the criminal justice system regulates health care practice and to what extent it can and should be used as a tool to resolve ethical conflict in health care For most of the twentieth century criminal courts were engaged in matters relating to medicine principally as a forum to resolve ethical controversies over the sanctity of life However the judiciary approached this function with reluctance and a marked tendency to defer to the medical profession to define what constituted ethical and thus lawful conduct However over the past 25 years criminal courts have increasingly been drawn into these types of question and the criminal law has become a major actor in the resolution of ethical conflict The trend to prosecute for aberrant professional conduct or medical malpractice and the role of the criminal process in medicine has been analytically neglected in the UK There is scant literature addressing the appropriate boundaries of the criminal process in resolving ethical conflict the theoretical legal analysis of the law s relationship with health care or the practical impact of the criminal justice system on professionals and the delivery of health care in the UK This volume addresses these issues via a combination of theoretical analyses and key case studies drawing on the experiences of other carefully selected jurisdictions It places a particular emphasis on the appropriateness of the involvement of the criminal justice system in health care the limitations of this developing trend and solutions to the problems it throws up The book takes euthanasia as a primary example of the issues raised by the intersection of health care and the criminal law and questions whether health care issues appropriately fall within the remit of the criminal justice system
