Restitution And Insolvency:

Vulnerable Transactions in Corporate Insolvency John Armour, Howard Bennett, 2003-02-13 This book examines powers and remedies available to a liquidator or administrator that render vulnerable the company's prior contractual commitments or proprietary dispositions so as to enhance the asset pool available to creditors. In the process the book does two things. First it offers comprehensive accounts of the relevant causes of action: undervalue transactions, preferences, late floating charges, unregistered charges, transactions defrauding creditors, gratuitous corporate transactions and post-petition dispositions in liquidation. Secondly it seeks to raise issues about the context and purpose of these causes of action, many of which have not yet been fully explored in the case law or academic literature. These are considered through a discussion of their relationship to the *pari passu* principle, a restitutionary analysis of the remedial provisions and issues arising specifically in cross-border and international insolvency proceedings. The book is thus a source of reference both for insolvency litigators and for transactional lawyers seeking advice on potential vulnerability. The thematic approach and rigorous analysis will also make it of interest to an academic readership.

Restitution and Insolvency Francis D. Rose, 2000 The application of restitution and insolvency law has increased in recent years. These two areas of law were discussed at the annual conference of the restitution section of the Society of Public Teachers of Law in Leeds in September 1999. The revised papers are joined here by a variety of papers from other sources and explore a range of topical subjects of common interest to restitution and insolvency from theoretical, comparative and practical perspectives.

Corporate Insolvency Law Vanessa Finch, 2009-05-28 This interdisciplinary examination of corporate insolvency law assesses recent reforms and anticipates new legislation.

Property Rights and Bijuralism Jan Jakob Bornheim, 2020-10-12 Using the Canadian experience as a model, Jan Jakob Bornheim shows that the efficient interaction of common law and civil law can take place on both vertical and horizontal planes.

Insolvency Law in East Asia Roman Tomasic, 2016-05-23 Insolvency law reform has become a subject of public urgency in many countries in the past two decades and particularly in much of Asia over the last ten years. This volume provides an overview of insolvency laws and related rules and procedures in the countries of East Asia. The book comprises two introductory chapters dealing with issues such as legal culture and cross-border insolvency, before examining the fourteen principal jurisdictions in the region. Each chapter addresses the key themes of different insolvency regimes such as the legal system and culture, personal insolvency laws, corporate insolvency rules, court-based schemes of arrangement, winding-up procedures, liquidators, enforcement and offences. This title will be an invaluable guide to academics, practitioners and policy makers working in the areas of comparative and commercial law.

The European Insolvency Regulation and Implementing Legislations Gilles Cuniberti, Antonio Leandro, 2024-05-02 This authoritative Commentary provides an in depth evaluation of the legislation regulating cross border insolvency within the European Union Bringing together a diverse team of legal scholars and practitioners from across the EU Member States it delivers incisive dissections of the European Insolvency Regulation EIR provisions which define the jurisdiction of the courts of EU Member States in insolvency proceedings as well as the national law that should be applied and provide for the automatic recognition of other Member State's judgements along with a regime of coordination between proceedings opened in different Member States

Legal Capital in Europe Marcus Lutter, 2011-12-22 Europe has known very different systems of company laws for a long time These differences do not only pertain to the board structures of public companies where single tier and two tier structures can be distinguished they also pertain to the principles of fixed legal capital Fixed legal capital is not a traditional ingredient of English and Irish company law and had to be incorporated into these legal systems only for public limited companies according to the Second European Company Law Directive of 1976 Both jurisdictions have never really embraced these rules Against this background the British Accounting Standards Board ASB and the Company Law Centre at the British Institute of International and Comparative Law BIICL have initiated and supported a study of the benefits of this legal system by a group of experts led by Jonathan Rickford The report of this group has been published in 2004 Its result was that legal capital was costly and superfluous hence the Second Directive should be repealed The British government has adopted this view and wants the European Commission to act accordingly Against this background a group of German and European company law experts academics as well as practitioners have come together to scrutinise sense and benefits of fixed legal capital and all its specific elements guided by the following questions What is the relevant legal concept supposed to achieve What does it achieve in reality What criticisms are there Which proposals or alternatives are available From the outset the group of experts has endeavoured to cooperate with foreign colleagues which resulted in very fruitful and pleasant exchanges This volume contains besides an executive summary of the results 16 essays on specific aspects of legal capital in Germany

covering also neighbouring fields of law e.g accounting insolvency 7 reports on fixed legal capital in other jurisdictions France Great Britain Italy the Netherlands Poland Spain and the U S A addressing the same questions as the essays on German law The British initiative disapproves of the Second Directive The Directive does only deal with public limited companies in Europe which is reflected in the analysis presented here It is only concerned with the fixed legal capital of public limited companies not with capital issues of private companies The study has arrived at a result that differs completely from that of the Rickford group It verifies the usefulness of the concept of fixed legal capital and wishes to convince the European Commission of the benefits of the Second Company Law Directive
