What was once a major shipping port is now best known for leisure and entertainment. To understand this landscape, Jasper Rubin not only explores the built environment but also the major forces that have been at work in its redevelopment. While factors such as new transportation technology and economic restructuring have been essential to the process and character of the waterfront's transformation, the impact of local grassroots efforts by planners, activists and boosters have been equally critical. The first edition of A Negotiated Landscape won the 2012 prize for best book in planning history from the International Planning History Society. Much has changed in the five years since that edition was published. For this second edition, Rubin provides a new concluding chapter that updates the progress of planning on San Francisco's waterfront and examines debates over the newest visions for its development. **Human Geography** Mark Boyle, 2021-03-29 Revised, Extended and Extensively Updated Text. Uses Historical, Geographical and Thematic Approach to Provide Undergraduates with a Firm Foundation in Human Geography. Drawing on nearly three decades of instructional experience and a wealth of testing, pedagogical innovations with students, Mark Boyle has revised and expanded this authoritative and comprehensive introduction to Human Geography. As with the First Edition, Boyle follows the premise that history makes geography whilst geography makes history, and that the key to studying the principal demographic, social, political, economic, cultural and environmental processes in any region in the world today is to look at how that region has been impacted by, and in turn has impacted, the story of the rise, reign and decline of the West. Moreover, he argues that Human Geography itself is best understood as both an intellectual endeavour and a historical

political and institutional project Informed by recent developments in post colonial scholarship the book covers key concepts seminal thinkers and influential texts in the field Although designed for the beginner student Boyle does not shy away from ideas and debates often avoided in introductory texts clearly communicating theory without condescension In addition he places human geography in its larger academic context discussing the influences on the field from related subjects Notable features in the Second Edition include Extensive revision and updating of coverage of key ideas developments debates and case studies New chapter on uneven geographical development at different scales and development theory and practice Dedicated coverage of Covid 19s geographies New learning resources figures tables plates maps Deep Dive boxes etc throughout the text plus learning objectives essay questions checklists summarizing key ideas and guidance for further reading Updated and expanded companion website with MP4 and MP3 chapter by chapter lectures and PowerPoint slides for each chapter new multiple choice exam paper and additional essay style exam questions and a wide range of student tutorial exercises
