*The Obsolete Empire* Philip Tsang, 2021-11-02 Modernist literature at the end of the British empire challenges conventional notions of homeland heritage and community Finalist of the MSA First Book Prize by The Modernist Studies Association The waning British empire left behind an abundance of material relics and an inventory of feelings not easily relinquished In *The Obsolete Empire* Philip Tsang brings together an unusual constellation of writers Henry James James Joyce Doris Lessing and V S Naipaul to trace an aesthetics of frustrated attachment that emerged in the wake of imperial decline Caught between an expansive Britishness and an exclusive Englishness these writers explored what it meant to belong to an empire that did not belong to them Thanks to their voracious reading of English fiction and poetry in their formative years all of these writers experienced a richly textured world with which they deeply identified but from which they felt excluded The literary England they imagined frozen in time and out of place with the realities of imperial decline in turn figures in their writings as a repository of unconsummated attachments contradictory desires and belated exchanges Their works arrest the linear progression from colonial to postcolonial from empire to nation and from subject to citizen Drawing on a rich body of scholarship on affect and temporality Tsang demonstrates how the British empire endures as a structure of desire that outlived its political lifespan By showing how literary reading sets in motion a tense interplay of intimacy and exclusion Tsang investigates a unique mode of belonging arising from the predicament of being conscripted into a global empire but not desired as its proper citizen Ultimately *The Obsolete Empire* asks What does it mean to be inside or outside any given culture How do large scale geopolitical changes play out at the level of cultural attachment and political belonging How does literary reading establish or unsettle narratives of who we are These questions preoccupied writers across Britain's former empire and continue to resonate today

**Mandela's Kinsmen** Timothy Gibbs, 2014 *Mandela's Kinsmen* is the first study of the fraught relationships between the ANC leadership and their relatives who ruled apartheid's foremost tribal Bantustan the Transkei In the early 20th century the chieftaincies had often been well springs of political leadership In the Transkei political leaders such as Mandela used regionally rooted clan schooling and professional connections to vault to leadership they crafted expansive nationalisms woven from these kin identities But from 1963 the apartheid government turned South Africa's chieftaincies into self governing tribal Bantustans in order to shatter African nationalism While historians often suggest that apartheid changed everything African elites being eclipsed by an era of mass township and trade union protest and the chieftaincies co-opted by the apartheid government there is another side to this story Drawing on newly discovered accounts and archives Gibbs reassesses the Bantustans and the changing politics of chieftaincy showing how local dissent within Transkei connected to wider political movements and ideologies Emphasizing the importance of elite politics he describes how the ANC in exile attempted to re-enter South Africa through the Bantustans drawing on kin networks This failed in KwaZulu but Transkei provided vital support after a coup in 1987 and the alliances forged were

important during the apartheid endgame Finally in counterpoint to Africanist debates that focus on how South African insurgencies narrowed nationalist thought and practice he maintains ANC leaders calmed South Africa's conflicts of the early 1990s by espousing an inclusive nationalism that incorporated local identities and that Mandela's kinsmen still play a key role in state politics today Timothy Gibbs is a Lecturer in African History University College London Southern Africa South Africa Namibia Lesotho Swaziland Botswana Jacana

Rivermar Pérez,2020-06-07 Using a gender sensitive political economy approach this book analyzes the emergence of new migration patterns between Central Mexico and the East Coast of the United States in the last decades of the twentieth century and return migration during and after the global economic crisis of 2007 Based on ethnographic research carried out over a decade details of the lives of women and men from two rural communities reveal how neoliberal economic restructuring led to the deterioration of livelihoods starting in the 1980s Similar restructuring processes in the United States opened up opportunities for Mexican workers to labor in US industries that relied heavily on undocumented workers to sustain their profits and grow When the Great Recession hit in the context of increasingly restrictive immigration policies some immigrants were more likely to return to Mexico than others This longitudinal study demonstrates how the interconnections among class and gender are key to understanding who stayed and who returned to Mexico during and after the global economic crisis Through these case studies the authors comment more widely on how neoliberalism has affected the livelihoods and aspirations of the working classes This book will be of key interest to scholars students and practitioners in migration studies gender studies politics and more broadly to international relations anthropology development studies and human geography     Print Culture in Southern Africa Caroline Davis,Archie Dick,Elizabeth le Roux,Dennis

Nielsen,2020-03-20 This book takes an explicitly feminist approach to studying gender and social inequalities in island settings while deliberating on islandness as part of the intersectional analysis Though there is a wealth of recent literature on
