Knox, 1993 This advanced reference deals with the radical changes that have occurred within cities since the mid 1970s as a result of the interplay of new economic social political and cultural forces associated with the transition to advanced capitalism It brings the cutting edge of debate in urban geography to a single volume expresses important new ideas and theories in an accessible format addresses recent urban change offers a dynamic approach to urban geography and brings a cross disciplinary approach to urban change providing a big picture context for ideas and theory Suitable for professional geographers and environment and planning specialists Examining the Restless Urban Landscape Tracey A. Fung, Dartmouth College. Department of Geography, 2006 *A Negotiated Landscape* Jasper Rubin, 2016-09-27 A Negotiated Landscape examines the transformation of San Francisco's iconic waterfront from the eve of its decline in 1950 to the turn of the millennium What was once a major shipping port is now best known for leisure and entertainment To understand this landscape Jasper Rubin not only explores the built environment but also the major forces that have been at work in its redevelopment While factors such as new transportation technology and economic restructuring have been essential to the process and character of the waterfront's transformation the impact of local grassroots efforts by planners activists and boosters have been equally critical The first edition of A Negotiated Landscape won the 2012 prize for best book in planning history from the International Planning History Society Much has changed in the five years since that edition was published For this second edition Rubin provides a new concluding chapter that updates the progress of planning on San Francisco's waterfront and examines debates over the newest visions for its development **Power and Space** John Allen, 2024-08-05 Power and Space sets out the inherently spatial nature of power today and seeks to change the conversation around how power exercises us in the contemporary moment The essays brought together in this book are a response to the fact that conventional descriptions of power and its ordered geographies no longer chime with our lived experience Spatiality matters to the workings of power nowadays and this book sheds light on what it is that we face when power is exercised through more subtle spatially nuanced arrangements It is divided into three parts each representing a different kind of engagement with power's relationship to space from the spatial shifts in the way power is exercised through to its assemblage like entanglements and in turn its progressive topological character Throughout the book a wide range of social political and economic examples are drawn upon to illustrate a more provisional sense of power ranging for instance from the seductive logic of privatized public spaces to the attempt by a data analytics company to manipulate political behaviour through to the offshore spaces invented by rising financial elites to challenge the established banking order Illustrating the new found abilities of the powerful to make their presence felt this book provides an accessible account of the practical workings of power in the present day It will be invaluable to students and academics in human geography and urban studies as well as

politics sociology and cultural studies **Globalization Redux** Tom Conner,Ikuko Torimoto,2004-06 This volume is a peer reviewed collection of essays submitted by participants of two joint conferences on the theme of globalization The essays collected in this volume deal with a wide variety of subjects related to globalization ranging from the social sciences to the humanities Globalization Redux contributes to a better understanding of globalization and its ramifications in a host of domains **Marginality in Space - Past, Present and Future** Heikki Jussila,Roser Majoral,Chris C.

Mutamirwa,2019-01-15 Published in 1999 this book discusses the role that marginality has had in the past has today and will have in the future The Commission on Dynamics of Marginal and Critical Regions held its annual conference in Harare Zimbabwe in July 1997 This volume represents a carefully selected revised and reviewed selection of the papers presented at this conference The articles reflect the various aspects of marginality currently existing in the world and it is the intention of the Commission to pursue research that would eventually result in a more coherent approach towards the issues of marginality in space The articles in the book are grouped into three main parts The first part discusses the role of theory and also methodological aspects and approaches towards the question of marginality The second part gives a time space perspective by examining the past present and future aspects of marginality The third part is dedicated to empirical evidence about the changes in existing marginality and its possible future implementations The conclusions of the book summarize the various and sometimes conflicting aspects of marginality and its images both in space and in time

Duncan,David Ley,2013-04-15 Spatial and cultural analysis have recently found much common ground focusing in particular on the nature of the city Place Culture Representation brings together new and established voices involved in the reshaping of cultural geography The authors argue that as we write our geographies we are not just representing some reality we are creating meaning Writing becomes as much about the author as it is about purported geographical reality The issue becomes not scientific truth as the end but the interpretation of cultural constructions as the means Discussing authorial power discourses of the other texts and textuality landscape metaphor the sites of power knowledge relations and notions of community and the sense of place the authors explore the ways in which a more fluid and sensitive geographer s art can help us make sense of ourselves and the landscapes and places we inhabit and think about *The Moral Economy of Cities* Evelyn Sharon Ruppert,2006-01-01 Using the redevelopment of the Yonge Dundas intersection in downtown Toronto in the mid 1990s as a case study Ruppert examines the language of planners urban designers architects and marketing analysts to reveal the extent to which moralization legitimizes these professions in the public eye *A Companion to the City* Gary Bridge,Sophie Watson,2008-06-09 A Companion to the City provides the reader with an indispensable and authoritative overview of the key debates controversies and questions concerning the city from a variety of theoretical vantage points with an international perspective Indispensable companion for students of the City Multidisciplinary approach of interest across several fields Includes contributions from major scholars in the field *Cities*
