The Clinical Science of Neurologic Rehabilitation Bruce H. Dobkin,2003-01-16 The Second Edition of this single authored volume integrates multiple disciplines of basic and clinical research to help clinicians further develop the best possible care for the rehabilitation of patients with neurologic diseases From the readable descriptions of the structures and functions of pathways for movement and cognition the reader comes to understand the potential for training induced pharmacologic and near future biologic interventions to enhance recovery Dr Dobkin shows how functional neuroimaging

serves as a marker for whether physical cognitive and neuromodulating therapies work and how they sculpt the plasticity of the brain Themes such as how the manipulation of sensory experience can serve as a formidable tool for rehabilitation run throughout the text built from the level of the synapse to behaviors such as grasping walking and thinking From illustrating how we may one day repair the brain and spinal cord to how to retrain spared and new pathways Dr Dobkin draws insights from a broad swath of fundamental research to give clinicians tools they can translate into bedside practices The book treats the medical complications and therapeutic approaches to neurologic diseases as an interconnected matrix The management of common medical issues impairments and disabilities are described across diseases Special problems posed by patients with stroke myelopathies brain injury multiple sclerosis degenerative diseases and motor unit disorders receive individual comment Short term and delayed pulse interventions for patients along with clinical trials are dissected and put into perspective The First Edition of this book was titled Neurologic Rehabilitation The title has been changed to reflect Dr Dobkin s sense that fundamental research now drives the field of neurologic rehabilitation even more than it could in 1996 when the First Edition was published The Second Edition features entirely new chapters on functional neuroimaging of recovery neurostimulators and neuroprostheses integration into the book of many new clinical and neuroscientific observations relevant to the clinician and extensive updating and expansion of all chapters Readers whether clinicians serving the rehabilitation team or students or researchers in neuroscience neurology physical medicine allied health or bioengineering will acquire new insights and tools for creative pursuits that aim to lessen the disabilities of patients

Functional Electrical Rehabilitation Chandler A. Phillips, 2012-12-06 On one of my returns to California I attended the Disabilities Expo 88 at the Los Angeles Convention Center Among the various marvels of tech nology for the wheelchair disabled were stair climbing wheelchairs self raising and lowering kitchen cabinetry and even a completely accessible dude ranch experience At the same time as a guest of the Southern California Chapter of the National Spinal Cord Injury Association I was part of a small booth among the more than two hundred exhibitors in which we had spinal cord injured people up and walking with a lower extremity bracing system the reciprocating gait orthosis used at the PEERS Spinal Injury Program in Los Angeles I had a young man a C6 7 level quadriplegic walking with electrical muscle stimulation and lower extremity bracing The system is reviewed in Chapter 8 of this book As these disabled persons walked erect and upright among their wheel chair bound colleagues and took long confident strides past exhibits extol ling the latest technological virtues of yet another new wheelchair Fig 1 I reflected on the paradox of it all What a majority of these paralyzed people Wore really looking for was an alteration of their disability so that they could more normally function in an unaltered environment What the great majority of the exhibitors were offering was an alteration of the environment so that they could more normally function with an unaltered disability
