Restoration and Reaction, 1815-1848 Andre Jardin, Andre Jean Tudesq, 1973 History of France in 19th century

Restoration and Reaction, 1815-1848 André Jardin, André Jean Tudesq, 1983 *Restoration and Reaction 1815-1848*

Jardin, Andre-Jean Tudesq, 1984-02-02 *The Great Restoration: Post-Communist Transformations from the Viewpoint of Comparative Historical Sociology of Restorations* Zenonas Norkus, 2023-09-20 The revolutions of 1989 remains the standard term used to describe the onset of post communist transformations more than thirty years ago Zenonas Norkus proposes a completely new perspective theorising them as the next wave of modern social restorations starting with the post Napoleonic restorations in 1815 A comparison of the 1789 French and 1917 Russian revolutions was seminal for the rise of comparative historical and sociological research on modern revolutions The book extends and supplements the sociology of modern revolutions by the first systematic outline of the sociology of modern social restorations grounded in a comparison of post Napoleonic and post communist restorations *A History of the European Restorations* Michael Broers, Ambrogio A. Caiani, 2019-11-14 Europe s Restorations were characterised by their evolving dialectics The chapters in this first volume address the key questions and controversies of Napoleonic history from a national and international perspective From the re ordering of the European world through the tools of intervention occupation and diplomacy to the creation of new constitutional monarchies across France Scandinavia and Germany the volume outlines the processes that realigned national priorities and the accompanying dynamics of social and political identity In a structure that makes sense of what Luigi Mascilli Migliorini describes as the fiendishly complex process of reconstructing order in post Napoleonic Europe this collection of essays brings together experts in the field to set a new precedent for transnational research frameworks in the study of the European Restorations Class Formation, Civil Society and the State Michael Burrage, 2008-01-17 Rather than a ranking system based on occupational prestige this book explains social stratification through political events and decisions Using analyses of Russia France the United States and England Burrage claims that class stems from the habitual relationship between state and civil society and remarkably is undermined by free markets The Halt In The Mud Gary P Cox, 2019-07-15 Historians have traditionally seen Prussia as the creator of modern strategic planning The members of the Great General Staff in the carmine striped trousers have long received credit for perfecting off the shelf plans for any contingency In contrast the French have been depicted as effete martinets or feckless hussars fearless in battle but utterly unconcerned with such arcane matters as national strategy The French Army in the years following Waterloo has been depicted as an institution mired in reactionary politics and the entire period of French military history from 1815 to 1870 has most often been seen as a halt in the mud But in this important new book Gary Cox demonstrates that nineteenth century French defense policy was much more dynamic and creative than has been previously supposed In *The Halt in the Mud* Cox illustrates that contrary to most generally held opinions France began formulating long range strategic plans in the years

immediately following Waterloo Carefully buttressing his thesis with evidence gleaned from the French Army's own archives Cox argues that these plans were firmly rooted in the Napoleonic conception of strategy and staff work and strongly influenced French strategic planning all the way down to the outbreak of the Great War The author also analyzes the development of the crucial rivalry between France and Germany in the years leading up to the Franco Prussian War He traces the roots of this conflict shows the essential similarities in approach between early German and French strategic planning and then discusses why French and German strategic planning methods diverged so fundamentally The Halt in the Mud fills an important gap in our understanding of how France and her army prepared for war in the nineteenth century and sheds new light on France's preparations for the Franco Prussian War and her reaction to the catastrophic defeat of 1870

Contemporary France Anne Sa'adah, 2003 Annotation Describing actors beliefs institutions and policies this introduction interprets contemporary democratic politics in France and explores why and with what political consequences so many people in France experience globalization as a harbinger of national decline Special attention is paid to the impact of historical legacies WWII and France's role in Europe The author teaches law and political science at Dartmouth College Annotation c 2003 Book News Inc Portland OR booknews com **Europe's Uncertain Path 1814-1914** R. S. Alexander, 2012-01-30 Europe's Uncertain Path is an introduction to Europe's turbulent history from 1814 to 1914 It presents a clear narrative of the major political events set against the backdrop of social economic and cultural change An introduction to Europe's turbulent history from 1814 to 1914 Provides students with a solid grounding in the main political events and social changes of the period Explains the causes and outcomes of major events the effect of the emergence of mass politics the evolution of political ideologies and the link between foreign and domestic policy Offers balanced coverage of Eastern Western and Central Europe Illustrations maps and figures enhance student understanding *Aristocracy and the Modern World* Ellis Wasson, 2017-09-16 Ellis Wasson offers one of the first comprehensive studies of the European ruling class during the 19th and 20th centuries Distilling a wealth of recent research Wasson analyses the role of aristocracy in modern times focusing on the tensions that exist between egalitarian values and the way elites shape society Wasson explodes myths and jettisons stereotypes in sweeping coverage that takes the story from the Congress of Vienna to Stalingrad The study recounts the change from the genteel world of court balls to Caf Society and finally on to Eurotrash It also contrasts the paradox of continued aristocratic social power and cultural leadership with the gradual decline in their political authority *Aristocracy and the Modern World* covers key topics such as The fabulous wealth of the great magnates The relationship between servants and masters Interaction with the middle classes Concepts of honour Culture recreation and gender Local authority and national power Lively and authoritative the book reviews developments in Scandinavia the Austro Hungarian Empire France Italy and Spain as well as in Britain Germany and Russia It is essential reading for all those with an interest in modern European history **The Routledge Companion to Modern European History since 1763**

Chris Cook, John Stevenson, 2004-11-10 The Routledge Companion to Modern European History since 1763 is a compact and highly accessible work of reference covering the broad sweep of events from the last days of the ancient regime to the ending of the Cold War and from the reshaping of Eastern Europe to the radical expansion of the European Union in 2004 Within the broad coverage of this outstanding volume particular attention is given to subjects such as the era of the Enlightened Despots the Revolutionary and Napoleonic era in France and the revolutions of 1848 nationalism and imperialism and the retreat from Empire the First World War the rise of the European dictators the coming of the Second World War the Holocaust and the post war development of Europe the Cold War the Soviet Union and its break up the protest and upheavals of the 1960s as well as social issues such as the rise of the welfare state and the changing place of women in society throughout the period With a fully comprehensive glossary a biographical section a thorough bibliography and informative maps this volume is the indispensable companion for all those who study modern European history Demos Rising Stephen W. Sawyer, 2025-01-20 A political history exploring the concept of demos in the French government during the period of 1800 to 1850 In his previous book *Demos Assembled* historian Stephen W Sawyer offered a transatlantic account of the birth and transformation of the modern democratic state In *Demos Rising* he presents readers of political history with a prequel whose ambitious claim is that a genuine demos became possible in France only with the development of government regulation and administration Focusing on democracy as a form of administration rather than as a form of sovereignty allows Sawyer to explore urban planning work and private enterprise health administration and much more as cornerstones of a self governing society of equals Examining the period between 1800 and 1850 Sawyer studies a set of thinkers who debated at length over the material problems of everyday life sparking calls for political action and social reform in the face of conflict wreaked by deforestation urbanization health crises labor relations industrial capitalism religious tensions and imperial expansion The solutions to these problems Sawyer argues were sought and sometimes found not through elections as one might assume but rather through the care for all promised by modern administrative power regulatory intervention and social welfare programs By studying this profound transformation in governance the book wagers we can better understand the origin and meaning of democracy even when events in our own time have thrown the concept into doubt **Murder in Our Midst** Omer Bartov, 1996 He shows how the way we understand ourselves reflects the ambivalent effects of the Holocaust on our perceptions of war and violence history and memory progress and barbarism **The Romantic Machine** John Tresch, 2022-12-22 In the years immediately following Napoleon s defeat French thinkers in all fields set their minds to the problem of how to recover from the long upheavals that had been set into motion by the French Revolution Many challenged the Enlightenment s emphasis on mechanics and questioned the rising power of machines seeking a return to the organic unity of an earlier age and triggering the artistic and philosophical movement of romanticism Previous scholars have viewed romanticism and industrialization in opposition but in this groundbreaking volume John Tresch reveals how thoroughly

entwined science and the arts were in early nineteenth century France and how they worked together to unite a fractured society Focusing on a set of celebrated technologies including steam engines electromagnetic and geophysical instruments early photography and mass scale printing Tresch looks at how new conceptions of energy instrumentality and association fueled such diverse developments as fantastic literature popular astronomy grand opera positivism utopian socialism and the Revolution of 1848 He shows that those who attempted to fuse organicism and mechanism in various ways including Alexander von Humboldt and Auguste Comte charted a road not taken that resonates today Essential reading for historians of science intellectual and cultural historians of Europe and literary and art historians **The Romantic Machine** is poised to profoundly alter our understanding of the scientific and cultural landscape of the early nineteenth century **Themes in Modern European History 1830-1890** Bruce Waller,2002-09-11 Providing a series of lively essays which reflect the skills that historians have to master when challenged by problems of evidence interpretation and presentation this important new text covers the topics of France Germany Italy Austria and Russia as well as analyzing the themes of political thought cultural trends the economy and warfare international relations and imperialism Six distinguished scholars all of whom are regularly involved in student teaching provide an authoritative student guide to the main contours of nineteenth century European history when the continent s standing was at its highest and its influence spanned the globe The Novel of Female Adultery Bill Overton,2016-07-27 The novel of adultery is a nineteenth century form about the experience of women produced almost exclusively by men Bill Overton s study is the first to address the gender implications of this form and the first to write its history The opening chapter defines the terms adultery and novel of adultery and discusses how the form arose in Continental Europe but failed to appear in Britain Successive chapters deal with its development in France and with examples from Russia Denmark Germany Spain and Portugal France Ian Littlewood,2002 Provides a concise overview of France s history from its beginnings to the present day 2002 by use of time lines sidebars illustrations and quotes *The Year Without Summer* William K. Klingaman,Nicholas P. Klingaman,2013-02-26 Like Winchester s Krakatoa *The Year Without Summer* reveals a year of dramatic global change long forgotten by history In the tradition of Krakatoa *The World Without Us* and *Guns Germs and Steel* comes a sweeping history of the year that became known as 18 hundred and froze to death 1816 was a remarkable year mostly for the fact that there was no summer As a result of a volcanic eruption in Indonesia weather patterns were disrupted worldwide for months allowing for excessive rain frost and snowfall through much of the Northeastern U S and Europe in the summer of 1816 In the U S the extraordinary weather produced food shortages religious revivals and extensive migration from New England to the Midwest In Europe the cold and wet summer led to famine food riots the transformation of stable communities into wandering beggars and one of the worst typhus epidemics in history 1816 was the year *Frankenstein* was written It was also the year Turner painted his fiery sunsets All of these things are linked to global climate change something we are quite aware of now but that was utterly mysterious to people in the nineteenth

century who concocted all sorts of reasons for such an ungenial season Making use of a wealth of source material and employing a compelling narrative approach featuring peasants and royalty politicians writers and scientists *The Year Without Summer* by William K Klingaman and Nicholas P Klingaman examines not only the climate change engendered by this event but also its effects on politics the economy the arts and social structures

The Mantra of Efficiency Jennifer Karns Alexander, 2008-03-03 Winner 2010 Edelstein Prize Society for the History of Technology Efficiency associated with individual discipline superior management and increased profits or productivity often counts as one of the highest virtues in Western culture But what does it mean exactly to be efficient How did this concept evolve from a means for evaluating simple machines to the mantra of progress and a prerequisite for success In this provocative and ambitious study Jennifer Karns Alexander explores the growing power of efficiency in the post industrial West Examining the ways the concept has appeared in modern history from a benign measure of the thermal economy of a machine to its widespread application to personal behaviors like chewing habits spending choices and shop floor movements to its controversial use as a measure of the business success of American slavery she argues that beneath efficiency's seemingly endless variety lies a common theme the pursuit of mastery through techniques of surveillance discipline and control Six historical case studies two from Britain one each from France and Germany and two from the United States illustrate the concept's fascinating development and provide context for the meanings of and uses for efficiency today and in the future

The Extreme Right in France, 1789 to the Present Peter Davies, 2002-04-12 *The Extreme Right in France 1789 to the Present* surveys the history of a fascinating but contentious political and intellectual tradition Since 1789 the far right has been an important factor in French political life and in different eras has taken on a range of guises including traditionalism ultra royalism radical nationalism anti-Semitism and fascism This book is structured around the five main phases of extreme right activity and the author explores key questions about each Counter revolution what was the legacy of Joseph de Maistre's writings Anti Third Republic protest how was the new right of the 1880s and 1890s different from the old right of previous decades Inter war fascism how should we characterise the phenomenon of fascisme fran aise Vichy why did P tain and Laval collaborate with the Nazis The Post war far right what is the relationship between Poujadism Alg rie Fran aise and Le Pen's FN
