

## HOW TO: RESTORE CORROSION RESISTANCE TO WELDS AND POWDER COATING.

### PROBLEM:

When welding galvanized tubing, heat can vaporize the protective zinc coating near the weld. The remaining zinc provides some protection, but the zinc-free area will rust. This also applies to the interior diameter (ID) of the tube.

### SOLUTION:

**Zinc-rich paints and cold galvanizing compounds** restore corrosion protection to the weld areas on **both the ID and OD**, with varied application methods.

Be sure to take the proper steps when cleaning the surface of weld slag and oil to insure a strong mechanical bond. For more details on this, ask for our booklet "**Restoring Corrosion Protection**".

### Cold Galvanizing for Powder Coating Applications

Painting or powder coating over zinc increases the rust-free product life by **up to 5 times**. For customers who powder coat – and want additional corrosion protection in the weld zones – **cold galvanizing compounds** are available. These are both **heat resistant** (up to 750° F) and **act as a primer** for powder coating.

Advances in the Bonded Composite Repair of Metallic Aircraft Structure A.A. Baker,L.R.F. Rose,Rhys Jones,2003-01-23 The availability of efficient and cost effective technologies to repair or extend the life of aging military airframes is becoming a critical requirement in most countries around the world as new aircraft becoming prohibitively expensive and defence budgets shrink To a lesser extent a similar situation is arising with civil aircraft with falling revenues and the high cost of replacement aircraft This book looks at repair reinforcement technology which is based on the use of adhesively bonded fibre composite patches or doublers and can provide cost effective life extension in many situations From the scientific and engineering viewpoint whilst simple in concept this technology can be quite challenging particularly when used to repair primary structure This is due to it being based on interrelated inputs from the fields of aircraft design solid mechanics fibre composites structural adhesive bonding fracture mechanics and metal fatigue The technologies of non destructive inspection NDI and more recently smart materials are also included Operational issues are equally critical including airworthiness certification application technology including health and safety issues and training Including contributions from leading experts in Canada UK USA and Australia this book discusses most of these issues and the latest developments Most importantly it contains real histories of application of this technology to both military and civil aircraft

**Corrosion of Steel in Concrete** Luca Bertolini, Bernhard Elsener, Pietro Pedeferra, Elena Redaelli, Rob B.

Polder, 2013-02-26 Steel reinforced concrete is used ubiquitously as a building material due to its unique combination of the high compressive strength of concrete and the high tensile strength of steel. Therefore reinforced concrete is an ideal composite material that is used for a wide range of applications in structural engineering such as buildings, bridges, tunnels, harbor quays, foundations, tanks, and pipes. To ensure durability of these structures, however, measures must be taken to prevent, diagnose, and if necessary, repair damage to the material, especially due to corrosion of the steel reinforcement. The book examines the different aspects of corrosion of steel in concrete, starting from basic and essential mechanisms of the phenomenon, moving up to practical consequences for designers, contractors, and owners, both for new and existing reinforced and prestressed concrete structures. It covers general aspects of corrosion and protection of reinforcement, forms of attack in the presence of carbonation and chlorides, problems of hydrogen embrittlement, as well as techniques of diagnosis, monitoring, and repair. This second edition updates the contents with recent findings on the different topics considered and bibliographic references, with particular attention to recent European standards. This book is a self-contained treatment for civil and construction engineers, material scientists, advanced students, and architects concerned with the design and maintenance of reinforced concrete structures. Readers will benefit from the knowledge, tools, and methods needed to understand corrosion in reinforced concrete and how to prevent it or keep it within acceptable limits. Underwater Inspection and Repair for Offshore Structures

John V. Sharp, Gerhard Esdal, 2021-04-01 UNDERWATER INSPECTION AND REPAIR FOR OFFSHORE STRUCTURES Benefit from a much needed up to date handbook on underwater inspection and repair processes and technologies. Underwater Inspection and Repair for Offshore Structures fills a gap in the literature to provide an overview of the inspection and repair processes for both steel and concrete offshore structures. Authors and noted experts on the topic John V. Sharp and Gerhard Esdal guide readers through the reasons why inspection and repair are performed and how both are linked to the management of structural integrity, statutory requirements, and various types of damage. The book addresses critical topics including the execution and planning of inspection and repair, the tools and methods used, and their deployment underwater. The authors put particular focus on steel and concrete offshore oil and gas installations, but the content is also applicable to the substructures of offshore wind turbines. Underwater Inspection and Repair for Offshore Structures is complementary to the authors' book Ageing and Life Extension of Offshore Structures, also from Wiley. This important book covers current inspection and monitoring techniques to evaluate existing structures. Includes coverage of robotic ROV inspection and repair methods. Provides an overview of repair and maintenance techniques applicable to the splash zone and underwater operations. Written for engineers, designers, and safety auditors working with offshore structures. Underwater Inspection and Repair for Offshore Structures is a comprehensive resource for understanding how to effectively inspect and repair these vulnerable structures.
