**Intelligence** Michael G. Hylen,2021-10-29 One of the most influential variables in human development is social relationships Cultivating Emotional Intelligence The 5 Habits of the Emotion Coach centers on how educators may build and use positive relationships with their students to help them grow in emotional intelligence Additionally this book seeks to answer the question What is the end goal of growing emotionally intelligent students Is it a matter of understanding oneself and other s emotions Or is the goal simply to produce good citizens As humans we desire connection with others And while most connections remain surface level this book investigates how teachers can make a deeper connection with students for the purpose of growing emotional intelligence and teaching positive social skills If educators are going to do so it will be necessary to reframe traditional school practices that focus on promoting positive behaviors through a discipline system based upon consequences that fail to address the behavior in a redemptive manner *Field Hearing on "education at a Crossroads: what Works? What's Wasted?"* United States. Congress. House. Committee on Education and the Workforce. Subcommittee on Oversight and Investigations,1998 Political Spectacle and the Fate of American Schools Mary Lee Smith,Linda Miller-Kahn,Walter Heinecke,Patricia F. known educational policy programs in the past 30 years are not based on democratic consensus but are instead formulated by the political community as symbolic efforts meant to generate personal partisan gain

**Handbook of Positive Psychology in Schools** Michael J. Furlong, Richard Gilman, E. Scott Huebner, 2009-03-04 National surveys consistently reveal that an inordinate number of students report high levels of boredom, anger, and stress in school, which often leads to their disengagement from critical learning and social development. If the ultimate goal of schools is to educate young people to become responsible and critically thinking citizens who can succeed in life, understanding factors that stimulate them to become active agents in their own learning is critical. A new field labeled positive psychology is one lens that can be used to investigate factors that facilitate a student's sense of agency and active school engagement. The purposes of this groundbreaking Handbook are to 1) describe ways that positive emotions, traits, and institutions promote school achievement and healthy social-emotional development; 2) describe how specific positive psychological constructs relate to students and schools and support the delivery of school-based services; and 3) describe the application of positive psychology to educational policy making. By doing so, the book provides a long-needed centerpiece around which the field can continue to grow in an organized and interdisciplinary manner. Key features include: Comprehensive: This book is the first to provide a comprehensive review of what is known about positive psychological constructs and the school experiences of children and youth. Topical: Coverage ranges from conceptual foundations to assessment and intervention issues to service delivery models. Intrapersonal factors (e.g., hope, life satisfaction) and interpersonal factors (e.g., positive peer and family relationships) are examined, as is classroom and school-level influences (e.g., student-teacher and school-community relations). Interdisciplinary Focus: This volume brings together the divergent perspectives, methods, and findings of a broad interdisciplinary community of scholars whose work often fails to reach those working in contiguous fields. Chapter Structure: To insure continuity, flow, and readability, chapters are organized as follows: overview, research summary, relationship to student development, examples of real-world applications, and a summarizing table showing implications for future research and practice. Methodologies: Chapters feature longitudinal studies, person-centered approaches, experimental and quasi-experimental designs, and mixed methods.

a first hand account of the Great American Education War being waged from coast to coast including the reading wars math wars testing wars and other schoolyard scuffles reported almost daily by the nation's media Martin Rochester takes the reader on a field trip that begins with his own upper middle class suburban school district in St Louis and then moves on to inner city locales and some of the best private schools in showing how pack pedagogy has steamrolled parent resistance in promoting disasters such as whole language fuzzy math multiple intelligences theory teacher as coach the therapeutic classroom and all the other latest fads found in today's schools A college professor Rochester became deeply involved in public education as a result of his children's misadventures in the classroom After several years of trying to improve the status quo as a dogged volunteer he graduated from involved parent to informed critic of a system in which progressive educators continue to assault the techniques of traditional schooling ability grouping grades homework etc allow nonacademic diversions to crowd out academic study and subordinate a commitment to excellence to an obsession with equity As a result of his experiences Rochester concludes that all children are being victimized not only the most gifted but especially average students and those lower achieving kids whose needs are now supposedly driving the entire curriculum Martin Rochester began as a concerned parent and wound up creating a fever chart of what is wrong in our nation's classrooms

**From Identity-Conflict to Civil Society Restoring Human Dignity and Pluralism in Deeply Divided Societies** Valentina Gentile, 2013-03 In societies like Bosnia or Rwanda deep divisions along ethnic and religious lines and the legacy of years of atrocities and violence pose serious challenges to liberal forms of consensus People do not recognise themselves as members of a political community and identity politics is pursued at the expense of liberal democratic projects and reconciliation programmes This book explores the nature and role of civil society in deeply divided societies Civil society is presented here as the sphere where a shared culture of civility emerges The culture of civility enables individuals to become part of a community of citizens and accept to reciprocate on the basis of some basic universal values such as the protection of human dignity The last chapter on Bosnia shows that relevance of civil society crucially depends on its capacity to represent the sphere where individuals are able to recognize and deal with transitional issues by appealing to the Bosnian culture of civility and developing a sense of justice based on a shared understanding of the idea of human dignity

**Critical Republicanism** Cécile Laborde, 2008-10-09 The first comprehensive analysis of the philosophical issues raised by the hijab controversy in France this book also conducts a dialogue between contemporary Anglo American and French political theory and defends a progressive republican solution to so called multicultural conflicts in contemporary societies It critically assesses the official republican philosophy of la cit which purported to justify the 2004 ban on religious signs in schools La cit is shown to encompass a comprehensive theory of republican citizenship centered on three ideals equality secular neutrality of the public sphere liberty individual autonomy and emancipation and fraternity civic loyalty to the community of citizens Challenging official interpretations of la cit the book then puts forward a critical republicanism which does not support the hijab ban yet upholds a revised interpretation of three central republican commitments secularism non domination and civic solidarity Thus it articulates a version of secularism which squarely addresses the problem of status quo bias the fact that Western societies are historically not neutral towards all religions It also defends a vision of female emancipation which rejects the coercive paternalism inherent in the regulation of religious dress yet does not leave individuals unaided in the face of religious and secular patriarchal and ethnocentric domination Finally the book outlines a theory of immigrant integration which places the burden of civic integration on basic socio political institutions rather than on citizens themselves Critical republicanism proposes an entirely new approach to the management of religious and cultural pluralism centred on the pursuit of the progressive ideal of non domination in existing non ideal societies Oxford Political Theory presents the best new work in contemporary political theory It is intended to be broad in scope including original contributions to political philosophy and also work in applied political theory The series will contain works of outstanding quality with no restriction as to approach or subject matter Series Editors Will Kymlicka David Miller and Alan Ryan
