and to give them a platform to tell their stories Sustainable Agriculture in Print Louis L'Amour,1998-12 An annotated bibliography of current books on sustainable and alternative agriculture Entries include title author editor publisher and annotation Indexed by author and editor Includes update of current books for 1998 Sustainable Agriculture in Print ,1997
Special Reference Briefs ,1983 *La Niña and the Making of Climate Optimism* Julia Miller,2019-07-12 This book examines the deep connection Australians have with their climate to understand contemporary views on human induced climate change It is the first study of the Australian relationship with La Niña and it explains how fundamental this relationship is to the climate change debate both locally and globally While unease with the Australian environment was a hallmark of early settler relations with a new continent this book argues that the climate itself quickly became a source of hope and linked to progress Once observed weather patterns coalesced into recognizable cycles of wet and dry years and Australians adopted a belief in the certainty of good seasons It was this optimistic response to climate linked to La Niña that laid the groundwork for this relationship with the Australian environment This book will appeal to scholars and students of the environmental humanities history and science as well as anyone concerned about climate change **Education for Sustainable Development** Brian Chalkley,Martin Haigh,David Higgitt,2013-09-13 In 2005 The United Nations launched its Decade of Education for Sustainable Development which recognises that education including Higher Education is the key to the change in social attitudes that will be needed to protect the welfare of future generations This involves helping learners to live as though the future matters and to achieve ecoliteracy This includes the understanding that personal lifestyle decisions may have consequences ranging from climate change through loss of biodiversity to pollution and resource depletion that may permit environmental degradation on a planetary scale It also involves helping them to develop the skills needed to cope with such challenges This international collection of research papers and position statements from special issues of the Journal of Geography in Higher Education and Applied Environmental Education and Communication written by many of the leading practitioners in the field aims to provide resources and practical guidance for all seeking to promote and engage in education for a sustainable future Rabindranath Tagore encouraged each learner to make their actions demonstrate a harmonious union between education and environment David Orr argued that the world needs people who live well in their places to make the world both habitable and humane and that the main challenge for education is to help learners make their minds fit for life on Earth This book tries to chart a practical route towards these objectives This book was previously published as special issues of the Journal of Geography in Higher Education and Applied Environmental Education and Communication **Law as Change** Paul Babie,Paul Leadbeter,2014 In 2011 Professor Adrian J Bradbrook retired from a distinguished scholarly career spanning over forty years During this time he made a significant contribution to teaching and scholarship not only in property law specifically to leasehold tenancies law and easements and restrictive covenants but also to energy law especially the emerging and growing field of solar energy This book brings together those

people who worked closely with Bradbrook each an expert in their own right to honour a career by critically engaging with the contributions Bradbrook made to property and energy law Each author has chosen a topic that both fits with their own cutting edge research and explores the related contributions made by Bradbrook Most unusually this collection ranges widely across property law energy law and human rights *Sustainable Agriculture in Print Current Books, Special Reference Briefs Series, SB 96-04, July 1996 ,1996*

Rainfed Farming Systems Philip Tow,Ian Cooper,Ian Partridge,Colin Birch,2011-09-16 While a good grasp of the many separate aspects of agriculture is important it is equally essential for all those involved in agriculture to understand the functioning of the farming system as a whole and how it can be best managed It is necessary to re assess and understand rain fed farming systems around the world and to find ways to improve the selection design and operation of such systems for long term productivity profitability and sustainability The components of the system must operate together efficiently yet many of the relationships and interactions are not clearly understood Appreciation of these matters and how they are affected by external influences or inputs are important for decision making and for achieving desirable outcomes for the farm as a whole This book analyses common rain fed farming systems and defines the principles and practices important to their effective functioning and management *Wild Politics* Susan Hawthorne,2002 Synthesising issues that are at the forefront of local and global politics and social movements of the 21st century this work presents a powerful critique of global western culture challenging many of its central assumptions and institutions

Carnivore Conservation John L. Gittleman,2001-06-28 Carnivores are the focus of intense attention and resources in conservation biology It is often argued that because carnivores are at the top of the food chain if they are protected then other taxa will also be afforded adequate protection Carnivores are also charismatic and compete with humans for dwindling space and environmental resources In the past 10 years theoretical and empirical studies on carnivores have developed very quickly This volume reviews and summarises the current state of the field describes limitations and opportunities for carnivore conservation and offers a conceptual framework for future research and applied management As such it will be of interest to students and researchers of conservation biology mammalogy animal behaviour ecology and evolution
