Restructuring In Global Aluminium:

Restructuring in Global Aluminium Bonnie K. Campbell, Magnus Ericsson, 1996 *Foreign Direct Investment in Bahrain* Lobna Ali Al-Khalifa, 2010-05 A significant volume of literature has been developed that seeks to provide an explanation for the growth of FDI and its impact on less developed countries The literature is characterized by diversity and controversy Based on it a range of reasons for encouraging investment have been proposed including its favorable effects on employment levels the balance of payments and balance of trade of the host country and also the potential for acquisition of technology and skills Cave 1982 and Dunning 1993 Equally the potentially negative effects of growing levels of foreign investment on domestic market structures and national sovereignty have long been the focus of attention Vernon 1971 and Jenkins 1987 More recent studies focused on the positive effect FDI can create through the integration of a host country into the global economy and the system of international division of labor based on fragmentation of production Gereffi and Korzeniewicz 1994 and Henderson Decken Hess Coe and Yeung 2002 Little if any research has examined the impact of FDI on the oil monarchies Conventional expectations persisted that once they enter the post oil phase of their histories it will be difficult for them to uphold their political legitimacy and survive intense domestic and international pressures upon their regimes Taeker 1998 and O Reilly 1999 It has been argued that oil income enable them to pacify opponents by providing their subjects with jobs that pay well and has had detrimental effect on both economic development and political liberalization These expectations have tended to be contradicted by actual development The private sector has become remarkably strong in the oil monarchies and their governments were not highly resistant to change as depicted by the rentier state paradigm Mahdavy 1970 and Beblawi 1987 Taking Bahrain as a case study this thesis argues that despite its limitations as a small nation and the paucity of its oil reserves Bahrain punched well above its weight due to its open economy and foreign direct investment Its domestic economy is well integrated into the global market It was able to exploit some of the opportunities that were presented by economic globalization when niches were opened or vacated within the networks of global production It has developed energy intensive industries aluminium and petrochemicals and became the major financial centre of the Middle East Yet in spite of the government incentives it still faces some challenges in attracting FDI in downstream activities related to oil and aluminium which suggests that additional reforms are needed *Mining in Africa* Bonnie Campbell, 2009-06-15 The continent of Africa is rich in minerals needed by Western economies but rather than forming the basis for economic growth the mining industry contributes very little to African development Investigating the impact of the 2003 Extractive Industries Review on a number of African countries the contributors find the root of the problem in the controls imposed on the African countries by the IMF and World Bank They aim to convince academics governments and industry that regulation needs to be reformed to create a mining industry favourable towards social economic and environmental development The book takes a multidisciplinary approach and provides a historical perspective of each country making it ideal for students of

development studies and development organizations

History of the Workplace Lars Bluma, Judith Rainhorn, 2016-04-14
 Interest in the history of the workplace is on the rise. Recent work in this area has combined traditional methods and theories of social history with new approaches and new questions. It constitutes a topical contact zone, a particularly dynamic field of research at the junction of social history, history of occupational health and safety, history of technology and the industrial environment. This book focuses on the new approaches in this important and growing area and their possible range of influence. These new attempts to rewrite a history of the workplace are multiple and in some cases disparate but share many key characteristics. They are turning away from the assumption that class and class conflict is the prime mover in social history, abandoning the traditional binomial workers vs entrepreneurs perspective which had long sustained the historical perspective on labour. Moreover, as this collection outlines, these new attempts concentrate on the analysis of complex social networks of actors that defined and configured industrial workplaces, suggesting a broadening of possible social actors. This book was originally published as a special issue of the *European Review of History*.

Modes of Governance and Revenue Flows in African Mining B. Campbell, 2013-11-21
 Academics, policy makers and practitioners from Africa and beyond document new ways of thinking about issues concerning governance and revenue flows in mining activities in Ghana, Mali and the Democratic Republic of the Congo.

Governance Ecosystems J. Sagebien, N. Lindsay, 2011-10-12
 The authors explore the complex dynamics of mining and Corporate Social Responsibility (CSR) in Latin America, including a reflection on the African continent, presenting arguments and case studies based on new research on a set of urgent and emerging questions surrounding mining development and sustainability.

International and Comparative Mineral Law and Policy Elizabeth Bastida, Thomas W. Waelde, Janeth Warden-Fernández, 2005-01-01
 This book covers a broad spectrum of issues shaping the current paradigm of minerals sector governance. The ultimate aim of the book is to understand trends and developments in mineral law and policy occurring at international, regional, cross-border and in some selected cases at national level, and also to identify some of the challenges lying ahead. With these objectives in view, the book brings together a representative selection of the most knowledgeable authors on the subject. The contributions deal with a diverse range of issues tackled from interdisciplinary perspectives. Topics are divided into five main chapters: international and comparative aspects of mineral law; actors and policies in the minerals industry; investment prospects; financial and fiscal issues; sustainable development and regional outlooks. The book aspires to serve as a useful reference for scholars, practitioners, students and all those with an interest in current developments in the areas reviewed.
