Crime and Policing in Post-Apartheid South Africa Mark Shaw, 2002-06-13 A cogent and well informed discussion of the South African Police Service and the organisational problems it faces Stephen Ellis Since the

mid 1990s South Africa has experienced a crime wave of such unprecedented proportions that the ability of the new democracy to form a stable civil society and govern effectively has been called into question In this timely book Mark Shaw describes how a police force that was so effective under apartheid became so ineffectual in the face of rising crime He shows how an increase in violent crime shapes society police and government and discusses possible solutions for the current crisis International crimes such as war terrorism and organized crime are explored along with crimes that affect individual security such as armed robbery murder and rape Crime and Policing in Post Apartheid South Africa draws attention to both the national and the international dimensions of crime in this society in transition **South Africa in Transition** Aletta J.

Law in Emerging Economies Aurelio Gurrea-Martínez,2024-05-31 This book explains how and why insolvency law in emerging economies needs to be reinvented It starts by examining the importance of insolvency law for the promotion of economic growth as well as the similarities and divergences in the design of insolvency law around the world The central thesis of the book is that insolvency law in emerging economies fails to serve as a catalyst for growth It is argued that this failure is mainly due to the design of an insolvency legislation that is not tailored to the market and institutional environment generally existing in emerging economies The book also provides a critical analysis of the design of insolvency law in many advanced economies where the insolvency system has proven to be unattractive for debtors creditors or both Therefore in addition to suggesting a new insolvency framework for emerging economies this book ultimately invites readers to rethink insolvency law *The Global Economic Crisis and the Developing World* Ashwini Deshpande,Keith Nurse,2012-06-14

The world economy is currently in the throes of a global economic crisis reminiscent of the great depressions of the 1930s and the 1870s As back then the crisis has exposed the major structural imbalances in financial and credit markets in addition to

global trade forcing many governments developed and developing to impose debilitating austerity measures that are exacerbating the structural weaknesses that caused the crisis in the first place This volume offers historical insights into the origins of the contemporary crisis as well as detailed analyses of the financial and trade dimensions an assessment of the technological and innovation context along with perspectives on the implications for unemployment and gender imbalances

The Social Impacts of Mine Closure in South Africa Lochner Marais,2022-09-05 This book investigates the relationship between mining mine closure and housing policy in post apartheid South Africa using concepts from new institutional economics and evolutionary governance theory Mine closures present a major challenge to the mining industry and governments with this being particularly noticeable in the Global South This book argues that the dependencies created by the mining industry and mine housing policies while a mine is operational cause serious societal problems when it closes To demonstrate this the book applies the concepts of place attachment asset based development and social disruption Conceptually the book challenges the view that place attachment and asset based development are the most appropriate and often the only policy responses in mining areas In South Africa the mining industry and the government have created comprehensive housing programmes linked to homeownership to promote place attachment stability and wealth among mine workers These programmes do not consider the disruption that mine closure might bring The book challenges the blind application during boom periods of policies which create long term dependencies that are difficult to manage when a mine closes This book will be of interest to students and scholars researching the social impacts of mining and the extractive industries social geography and sustainable development as well as policymakers and practitioners working with mine closure or social impact assessments *Restructuring the Labour Market* Guy Standing,John Sender,John Weeks,1996

Africa's World Trade Margaret C. Lee,2014-10-09 Are Africa s world markets really contributing to development across the continent for individuals nations and regions This is the key question posed by Margaret Lee in this provocative book in which she argues that all too often the voices of African traders are obscured amid a blizzard of statistical analysis However it is these very voices from those operating on the ground as formal or informal traders that must be listened to in order to form a true understanding of the impact trade regimes have on these individuals and their communities Featuring a wealth of oral histories from across sub Saharan Africa and beyond including Africans in China Africa s World Trade offers a unique insight into how the complexity of international trade agreements can shape the everyday lives of ordinary Africans

Rescaling municipal governance amidst political competition in Gauteng: Sedibeng's proposed re-demarcation Thembani Mkhize,2021-08-27 In 2011 the Gauteng Provincial Government proposed that Sedibeng a Category C district municipality located in the province should be restructured Although the original proposal had anticipated that this would happen after the 2016 local elections the issue remains unresolved due largely to fierce party political opposition and vociferous protests against it on the ground This Occasional Paper examines the dynamics particularities peculiarities and challenges of re

demarcating the Gauteng City Region While informed by technical reasons the arguments for and against the merger have tended to gravitate more towards party political rationales for why the re demarcation should or should not go ahead Although these debates raise important merits and demerits for the proposal they are difficult to disentangle from the interests of those whose fortunes would be changed by restructuring In this environment municipal demarcation risks being held hostage by party politics with stakeholders such as political parties using any means at their disposal to have things go their way including by scapegoating the Municipal Demarcation Board MDB The case of Sedibeng presents important lessons about attempts to make post transition local government and mechanisms for determining its configuration work for Gauteng It also highlights the need for strengthening and revising demarcation related legislation How can we make sure that the MDB functions effectively with respect to its primary goals

Beyond Tenderpreneurship MISTRA MISTRA, 2020-04-16 Black Economic Empowerment BEE policies have been a central pillar of attempts to overcome the economic legacy of apartheid Yet more than two decades into democracy economic exclusion in South Africa still largely reflects the fault lines of the apartheid era Current discourse often conflates BEE with the so called tenderpreneurship referred to in the title namely the reliance of some emergent black capitalists on state patronage Authors go beyond this notion to understand BEEs role from a unique perspective They trace the history of black entrepreneurship and how deliberate policies under colonialism and its apartheid variant sought to suppress this impulse In the context of modern South Africa authors interrogate the complex dynamics of class formation economic empowerment and redress against the backdrop of broader macroeconomic policies They examine questions relating to whether BEE policies are informed by strategies to change the structure of the economy These issues are explored against the backdrop of the experiences of other developing countries and their journeys of industrialisation The relevant black empowerment experiences of countries such as the United States are also discussed The authors identify policy and programmatic
