Military Geographies Rachel Woodward, 2011-07-15 Military Geographies is about how local space place environment and landscape are shaped by military presence and about how wider geographies are touched by militarism A book about how local space place environment and landscape are shaped by military presence and about how wider geographies are touched by militarism Sets a new agenda for the study of military geography with its critical analysis of the ways in which military control over space is legitimized Explores the ways in which militarism and military activities control development the use of space and our understanding of place Focuses on military lands establishments and personnel in contemporary peacetime settings Uses examples from Europe North America and Australasia Draws on original research into the mechanisms by which the British government manages the defence estate Illustrated with maps plans and other figures

Handbook of Defense Economics Todd Sandler, Keith Hartley, 2007-04-12 The second volume of the Handbook of Defense Economics addresses defense needs practices threats and policies in the modern era of globalization This new era concerns the enhanced cross border flows of all kinds e g capital and labor flows revolutionary rhetoric guerrillas and terrorists including the spillovers of benefits and costs associated with public goods and transnational externalities i e uncompensated interdependencies affecting two or more nations These ever increasing flows mean that military armaments and armies are

less able to keep out security threats Thus novel defense and security barriers are needed to protect borders that are porous to terrorists pollutants political upheavals and conflicts Even increased trade and financial flows imply novel security challenges and defenses Globalization also underscores the importance of a new set of institutions e g the European Union and global governance networks and agents e g nongovernmental organizations and partnerships This volume addresses the security challenges in this age of globalization where conflicts involve novel tactics new technologies asymmetric warfare different venues and frightening weapons Volume 2 contains topics not covered in volume 1 i e civil wars peacekeeping economic sanctions the econometrics of arms races conversion peace economics and the interface of trade peace and democracy Volume 2 also revisits topics from volume 1 where there has been a significant advancement of knowledge i e conflict analysis terrorism arms races arms trade military manpower and arms industries All of the main securities concerns of today are analyzed Chapters are written by the leading contributors in the topic areas Up to date surveys on the pressing defense issues theoretical empirical and policy issues Coverage of theoretical and empirical studies of terrorism Contributions by the leading researchers in the field of defense economics *The Politics of Protection* Jef

Huysmans, Andrew Dobson, Raia Prokhovnik, 2006-05-17 This new book shows how from the end of the Cold War the security agenda has been transformed and redefined academically and politically It focuses on the theme of protection It moves away from the dominant question of whom or what is threatening to the crucial questions of who is to be protected and in the case of conflicting claims who has the capacity to define whose needs prevail It also poses the question of political agency in relation to some of the most significant questions raised in relation to the governance of insecurity and protection in the contemporary world The authors identify and explore issues that challenge or raise a number of questions about the traditional notion that states are to protect their citizens through retaining a monopoly over the legitimate use of violence

Global Insecurity Mary Kaldor, 2000-07-01 The first half of the 1990s was a period of great optimism about humanitarian intervention In the aftermath of the Cold War it was hoped that the international community could begin to act cohesively in defence of fundamental international principles and that a global security policy aimed at the prevention of conflict and upholding human rights could be established The actual experience of this period however has been sobering Agreements engineered from above like the Dayton Agreement or the Oslo Agreement have mixed consequences Efforts at humanitarian relief have often ended up frustrating good intentions and prolonging conflict This book looks at what we learn from such experiences Should we retreat from intervention Is there a global responsibility for wars and for massive violations of human rights The authors start from a conviction that in a globalized world we do have certain responsibilities and that the point is to look at how we intervene They aim to open up a third approach an alternative to the dominance of realist or neo liberal approaches which would address the reality of contemporary conflict Key themes include the need for a more democratic approach in terms of the accountability and openness of both governments and international institutions the importance of

international humanitarian law and the future of formal military forces *Handbook of New Security Studies* J. Peter Burgess, 2010-01-22 This new Handbook gathers together state of the art theoretical reflection and empirical research by a group of leading international scholars relating to recent transformations in the field of security studies War as Business Armin Krishnan, 2016-03-03 The privatization of defence assets and the outsourcing of military services from the armed forces to the private sector is an increasing trend This book approaches the issue of military privatization by linking it to the transformation of the defence industries since the early 1990s and shows the extent to which many military functions and activities ranging from military research to military consulting training to operational support services have already been outsourced in the US and in Europe This detailed study provides new and updated information on the ongoing privatization of the defence sector and offers an original theoretical explanation as to why the most modern armed forces throughout the world have come increasingly to rely on private companies for nearly everything they do Contributing to a better understanding of military privatization and its close connection to technological change the book explains the complexity of the whole phenomenon and discusses its implications for national and international security *The Globalization of Security* B. Mabee, 2009-05-21 The Globalization of Security is an important rethinking of the connections between globalization and security focusing on a conceptual examination of the role of the state combined with key case studies The book provides a novel historical sociological approach advancing both the understanding of security and the theory of state power **The Political Economy of Peacebuilding in Post-Dayton Bosnia** Timothy Donais, 2005-06-21 A fresh examination of the political economy of the peacebuilding process in Bosnia Herzegovina in the aftermath of the country's 1992-95 war Little progress has been made in transforming the country's war shattered economy into a functioning market economy this new study explains the principal dynamics that have led to this and places Bosnia's economic transition process within the context of the country's broader post conflict peacebuilding process The central argument this book persuasively advances is that much of Bosnia's ongoing economic crisis and its current reform stalemate can be explained by exploring the interactions of an inappropriate international model of economic reform with the country's particular post conflict and post socialist political economy This book is essential for readers who wish to build an understanding of the region and assess its future prospects and hopes *New & Old Wars* Mary Kaldor, 2006 Deals with the implications of the new wars in the post 9/11 world This work shows how old war thinking in Iraq has greatly exacerbated what is the archetypal new war with insurgency chaos and the occupying forces lack of direction prescient of a different kind of conflict emerging in the 21st Century **Taming the Sovereigns** Kalevi Jaakko Holsti, 2004-01-22 Many analysts claim that international politics has recently entered a new era following the end of the Cold War and then the events of September 11th In this book Kalevi Holsti asks what we mean by change in international politics How do we identify it How do we distinguish between significant and unimportant changes Do we really live in a new era or do we see more continuity than transformation in the texture of international politics

Combining theoretical and empirical argument Holsti investigates eight major international institutions including the state sovereignty territoriality international law diplomacy trade and war Having identified the types of change these institutions have undergone during the last three centuries Holsti analyses the sources of those changes and speculates on their consequences This is a major book likely to have lasting influence in the study of international politics

Military Waste Joshua O. Reno, 2020-02-04

World War III has yet to happen and yet material evidence of this conflict is strewn everywhere resting at the bottom of the ocean rusting in deserts and floating in near Earth orbit In *Military Waste* Joshua O. Reno offers a unique analysis of the costs of American war preparation through an examination of the lives and stories of American civilians confronted with what is left over and cast aside when a society is permanently ready for war Using ethnographic and archival research Reno demonstrates how obsolete military junk in its various incarnations affects people and places far from the battlegrounds that are ordinarily associated with warfare Using a broad swath of examples from excess planes ships and space debris that fall into civilian hands to the dispossessed and polluted island territories once occupied by military bases to the militarized masculinities of mass shooters *Military Waste* reveals the unexpected and open ended relationships that non combatants on the home front form with a nation permanently ready for war

The Politics and Economics of Defence Industries Efraim Inbar, Benzion Zilberfarb, 2013-09-13

This volume provides a policy relevant analysis of the complex web of contemporary economic trends political developments and strategic considerations that are shaping the contours of the new post Cold War world market for weaponry

Conflict Refugees Christel Querton, 2023-08-10

Based on a systematic and empirical comparative study of six European Union countries Christel Querton explores judicial decision making in the context of persons fleeing armed conflicts in the EU Addressing and redressing misconceptions about the relevance of the Refugee Convention this book demonstrates how appellate authorities across the EU approach situations of armed conflict predominantly through outdated understandings of warfare and territoriality Thus they apply a higher standard of proof than is warranted by international refugee law Adopting a gender perspective Querton also shows how appellate authorities fail to acknowledge the gender differentiated impact of armed conflicts Drawing from gender and security studies this book proposes an original conceptual framework which supported by existing international legal standards reframes the definition of refugee and better reflects the reality of violence in modern day conflicts In doing so it re asserts the Refugee Convention as the cornerstone of international protection

The New Aztecs Zhivan J. Alach, 2011

The Western way of war has come full circle After centuries of evolution toward increased totality and brutality it has turned back once again to the ritualistic and restrained methods of primitive warfare Largely this has been due to an interaction between the perceived lack of utility in contemporary warfare developing humanitarian public opinion and increasing professionalism among militaries The significance of these evolutionary trends in the way that the West engages in modern warfare is that they are potentially

dangerous and they include the possibility that the West will be unprepared for a future foe whose defeat requires more unrestrained methods
