regulatory initiatives as well as more importantly the conclusions reached by the judiciary in IRHP mis selling claims The conclusions are particularly interesting corporate retail investors are in a vulnerable position when compared to individual retail investors The former are exposed to a heightened risk of mis selling meaning that regulatory intervention should be targeted accordingly The recommendations made as a result of these findings are further supported by insights emerging from behavioural law and economic theories This book is aimed at researchers lawyers and students with an interest in the financial regulation field who are keen to explore potential regulatory reforms to the investment services regime that address the root causes of mis selling and restore a level playing field amongst all retail investors
