Rethinking Human Rights Critical Approaches To International Politics:

Rethinking Human Rights D. Chandler, 2002-11-26 Rethinking Human Rights brings together a team of authors from fields as diverse as political theory peace studies international law and media studies concerned with a new international agenda of human rights promotion The collection presents an original and tightly argued critique of current trends and deals with a range of questions concerning the implication of human rights approaches for humanitarian aid state sovereignty international law democracy and political autonomy

Human Rights and US Foreign Policy Jan Hancock, 2007-06-11 This book analyzes the role of human rights in the foreign policy of the George W Bush Administrations References to human rights freedom and democracy became prominent explanations for post 9 11 foreign policy yet human rights have been neither impartially nor universally integrated into decision making Jan Hancock addresses this apparent paradox by considering three distinct explanations The first position holds that human rights form a constitutive foreign policy goal the second that evident double standards refute the first perspective This book seeks to progress beyond this familiar discussion by employing a Foucaultian method of discourse analysis to suggest a third explanation Through this analysis the author examines how a discourse of human rights has been artificially produced and implemented in the presentation of US foreign policy This illuminating study builds on a wealth of primary source evidence from human rights organizations to document the contradictions between the claims and practice of human rights made by the Bush Administrations as well as the political significance of denying this disjuncture Human Rights and US Foreign Policy will be of interest to advanced students and researchers of US foreign policy human rights international relations and security studies

Critical Perspectives on the Responsibility to Protect Philip Cunliffe, 2011-03-31 This edited volume critically examines the widely supported doctrine of the Responsibility to Protect and investigates the claim that it embodies progressive values in international politics Since the United Nations World Summit of 2005 a remarkable consensus has emerged in support of the doctrine of the responsibility to protect R2P the idea that states and the international community bear a joint duty to protect peoples around the world from mass atrocities While there has been plenty of discussion over how this doctrine can best be implemented there has been no systematic criticism of the principles underlying R2P This volume is the first critically to interrogate both the theoretical principles and the policy consequences of this doctrine The authors in this collection argue that the doctrine of R2P does not in fact embody progressive values and they explore the possibility that the R2P may undermine political accountability within states and international peace between them This volume not only advances a novel set of arguments but will also spur debate by offering views that are seldom heard in discussions of R2P The aim of the volume is to bring a range of criticisms to bear from a variety of disciplinary perspectives including international law political science IR theory and security studies This book will be of much interest to students of the Responsibility to Protect humanitarian intervention human security critical security studies and IR in general

Understanding Trauma and Resilience Louise Harms, 2015-05-18 This book

addresses the multifaceted nature of trauma by bringing together the many theoretical perspectives that explain how people cope with traumatic life experiences Practitioners working across the people professions frequently find themselves working with service users patients and clients who are survivors of trauma Ranging between attachment person centred and anti oppressive approaches this text will help students and practitioners widen their approaches to such clients experiences Whether you are a student or practitioner of counselling social work or mental health this book provides the foundations for understanding people s responses and resilience against traumatic life experiences Global Civil Society Gideon Baker,David Chandler,2004-11-23 For many commentators global civil society is revolutionising our approach to global politics as new non state based and border free expressions of political community challenge territorial sovereignty as the exclusive basis for political community and identity This challenge from below to the nation state system is increasingly seen as promising nothing less than a reconstruction or a re imagination of world politics itself Whether in terms of the democratisation of the institutions of global governance the spread of human rights across the world or the emergence of a global citizenry in a worldwide public sphere global civil society is understood by many to provide the agency necessary for these hoped for transformations Global Civil Society asks whether this idea is such a qualitatively new phenomenon after all whether the transformation of the nation state system is actually within its reach and what some of the drawbacks might be

Good Governance in the Era of Global Neoliberalism Jolle Demmers,Alex E. Fernández Jilberto,Barbara Hogenboom,2004-08-02 The contributions cover a wide range of territories Argentina Russia the Ukraine Indonesia and Taiwan The book will be the first to call into question the idea of good governance and exactly what that implies The editors have a good track record and have been widely published in the area Book should be of great appeal to all international and development economists Research Methods for International Human Rights Law Damian Gonzalez-Salzberg,Loveday Hodson,2019-06-13 The study and teaching of international human rights law is dominated by the doctrinal method A wealth of alternative approaches exists but they tend to be discussed in isolation from one another This collection focuses on cross theoretical discussion that brings together an array of different analytical methods and theoretical lenses that can be used for conducting research within the field As such it provides a coherent accessible and diverse account of key theories and methods A distinctive feature of this collection is that it adopts a grounded approach to international human rights law through demonstrating the application of specific research methods to individual case studies By applying the approach under discussion to a concrete case it is possible to better appreciate the multiple understandings of international human rights law that are missed when the field is only comprehended through the doctrinal method Furthermore since every contribution follows the same uniform structure this allows for fruitful comparison between different approaches to the study of our discipline *Empire's Law* Amy Bartholomew,2006-03-20 Can democracy and human rights really be imposed by fire and sword This is a collection of essays debating empire and international law concerning the relationship between American

imperialism the abuse of humanitarian intervention and its legal implications Covering everything from the role of Europe and the UN to people's tribunals to broader accounts of the contradictions of war and human rights the contributors offer new and innovative ways of examining the problems that we face Contributors include Leo Panitch Sam Gindin Jurgen Habermas Ulrich Preuss Andrew Arato Samir Amin Reg Whitaker Denis Halliday and Hans von Sponeck

Politics Without Sovereignty Christopher Bickerton, Philip Cunliffe, Alexander Gourevitch, 2006-12 The classical doctrine of sovereignty is widely seen as totalitarian producing external aggression and internal repression This book attempts to challenge the trend in international relations scholarship the common antipathy to sovereignty It is suitable for scholars of political science international relations security studies and others WorldCat

Conflict, Security and Justice Eleanor Gordon, 2019-04-26 This path breaking new textbook provides a broad overview of the core concepts actors and activities involved in building security and justice after conflict as well as challenges and lessons learned in this field Drawing attention to the principles which guide or should guide this kind of work as well as using practical examples throughout the book covers a uniquely wide range of issues in peacebuilding from transitional justice and disarmament to security sector reform and human rights It concludes by considering both the regional and more far reaching impacts of conflict including such global phenomena as terrorism piracy and organised crime With a decade of experience working in post conflict zones for the UN and other organisations and a further 10 years in academia and as a consultant for various international organisations the author's unparalleled expertise on the topic and her accessible writing style make this book the essential guide to postgraduate and upper level undergraduate courses on peace and conflict studies The text is also important supplemental reading for those studying war peace development security or IR in a wider context and for practitioners and policy makers in the field of peacebuilding

Handbook of Defence Politics Isaiah "Ike" Wilson III, James J.F. Forrest, 2011-03-28 Issues of defence politics and policy have long been at the forefront of political agendas and defining of international affairs However the dramatic changes to the global system that have taken place since the end of the Cold War and particularly since the terror attacks on the USA on 11 September 2001 have amplified the world's attention toward political and policy issues of national regional and global security The focus of this volume is on examining the fundamental causes of and defence policy responses to this new post 9 11 security environment Edited by Isaiah Ike Wilson III and James J F Forest of the US Military Academy West Point USA this volume is international in scope with pieces written by experts in the field offering a collection of up to date and balanced insights on key contemporary issues of concern to defence policymakers The book will be an invaluable reference tool for academics and students researchers in international relations policymakers media professionals and government officials

Implementing Article 12 of the UN Convention on the Rights of the Child Rebecca Thorburn Stern, 2017-07-31 In Participation Power and Attitudes Implementing Article 12 of the Convention on the Rights of the Child Rebecca Thorburn Stern analyses how CRC state parties describe their implementation of Article 12 on respect for

the child's views The focus of the study is on if and how references to traditional attitudes are used by state parties to explain their actions and inactions when implementing this key right and principle It is shown that traditional attitudes are employed less as justification of poor implementation than as a way of allocating responsibility to the population rather than to the state party and that references to tradition remain a mainly non-Western phenomenon thus also overlooking the impact of traditional attitudes in Western societies

Critical Perspectives on Global Governance Jean Grugel, Nicola Piper, 2007-12-12 The first in-depth analysis of how global governance impacts on the lives of ordinary people This new volume includes four detailed case studies on labour migration children and development that explore the actual nature of governance policies in the GPE Jean Grugel and Nicola Piper clearly show how global governance the creation of global norms and regimes to regulate politics economic and social actors suggests and promotes ideals such as stable politics democracy human rights and individualism with a strategy to create a more ordered and ultimately better world They move away from the traditional focus on lites states and global institutions to explore and analyze how liberal global governance is really affecting ordinary people and how this is often an obstacle to development citizenship voice and inclusion Paying particular attention to the global South Asia and Latin America these expert authors trace the development of liberal global governance They also clearly examine and study how this regulation has spread from areas such as trade and investment to development labour migration children and the environment

The Child and the World Jana Tabak, 2020 However unthinkable child soldiers may be within a generalized conception of childhood they are not imaginary figures rather they are a constant in almost every armed conflict around the world The participation of children in wars may question the idea of childhood as a once upon a time story with a happy and predictable ending disrupting the natural idea of a protected and innocent childhood and also eliciting fear uncertainty revulsion horror and sorrow Using the perspectives of both childhood studies and critical approaches to international relations Jana Tabak explores the constructions of child soldiers as children at risk and at the same time risky children More specifically The Child and the World aims both to problematize the boundaries that articulate child soldiers as necessarily deviant and pathological in relation to normal children and to show how these specific limits participate in the re-production and promotion of a particular version of the international political order In this sense the focus of this work is not on investigating child soldiers' lives and experiences per se but on their presumed threatening feature as they depart from the protected territory of childhood disquieting everyday international life

Understanding Humanitarian Protection Noele Crossley, 2022-03-21 This new textbook provides an introduction to humanitarian protection a field of study concerned with international responses to armed conflict political violence and humanitarian crisis The book engages with a wide range of empirical and normative questions providing an overview of the academic literature whilst simultaneously discussing the policies and practices associated with protective responses to conflict and humanitarian emergencies that put the lives and livelihoods of vulnerable populations including civilians

refugees and minority groups at risk Divided into three parts covering the origins of the humanitarian protection regime the range of actors involved and the responsibilities of these actors the book offers an accessible entry point into the major contemporary debates providing readers with the conceptual tools for understanding core issues Key points are reinforced and illustrated through the deployment of selected case studies and a comprehensive glossary is provided for key terms Each chapter ends with a summary of key points questions for further reflection and a list of recommended reading This book will be of much interest to students of human protection humanitarianism the Responsibility to Protect human security peacekeeping and International Relations in general

Children and Global Conflict Kim Huynh, Bina D'Costa, Katrina Lee-Koo, 2015-04-09 Examines how children armed conflict and the international community interact in the twenty first century

Maintaining Peace and Security? Trudy Fraser, 2014-11-20 The security concerns of the United Nations today extend far beyond what the writers of the 1945 Charter could have imagined As a result the UN has been compelled to reconsider the parameters of what constitutes a threat to international peace and security and what it means to be safe and secure in the twenty first century This text critically assesses the capacity of the UN to evolve in response to changing notions of security and examines the complex history of people places and politics that have helped shape this important global actor

Defensive Relativism Frederick Cowell, 2022-10-25 Defensive Relativism describes how governments around the world use cultural relativism in legal argument to oppose international human rights law Defensive relativist arguments appear in international courts at the committees established by human rights treaties and at the United Nations Human Rights Council The aim of defensive relativist arguments is to exempt a state from having to apply international human rights law or to stop international human rights law evolving because it would interfere with cultural traditions the state deems important It is an everyday occurrence in international human rights law and defensive relativist arguments can be used by various types of states The end goal of defensive relativism is to allow a state to appear human rights compliant while at the same time not implementing international human rights law Drawing on a range of materials such as state reports on the Convention on the Elimination of All Forms of Discrimination Against Women CEDAW and cases from the European Court of Human Rights involving freedom of religion this book provides a definitive survey of defensive relativism Crucially Frederick Cowell argues defensive relativism is not about alternative practices of human rights law or debates about the origins or legitimacy of human rights as a concept Defensive relativism is instead a variety of tactical argument used by states to justify ignoring international human rights law Yet as Cowell concludes defensive relativism can't be removed from the law as it is a reflection of unresolved tensions about the nature of what it means for rights to be universal

Rwanda 1994 Barrie Collins, 2014-08-26 Through a rigorous critique of the dominant narrative of the Rwandan genocide Collins provides an alternative argument to the debate situating the killings within a historically specific context and drawing out a dynamic interplay between national and international actors

Poverty and the Critical Security Agenda Pauline

Eadie, 2017-11-30 Poverty and the Critical Security Agenda argues that poverty should be a central concern of security studies and critiques existing methodological approaches to poverty and well being Using the Philippines as a case study this book is critical of approaches to poverty that portray the poor as passive objects as opposed to dynamic actors With this in mind the relationship between poverty and democracy as a means to facilitating human security is central Poverty acts as a major behavioural force in international relations not least for the state and therefore merits increased visibility within the research agenda This text is highly relevant for courses on international relations methodology and critical theory development studies security studies and international political economy
