Rethinking Institutional Analysis and Development Vincent Ostrom, David Feeny, Hartmut Picht, 1988     Rethinking Institutional Analysis and Development Vincent Ostrom, David Feeny, Hartmut Picht, 1989     Challenging Institutional Analysis and Development Paul Dragos Aligica, Peter J. Boettke, 2009-06-02 This important volume presents a systematic analysis of the Bloomington Institutional and Development IAD Research Program that developed a unique and extremely successful combination of interdisciplinary theoretical and empirical approaches for the study of social sciences     The Samaritan's Dilemma Clark C. Gibson, Krister Andersson, The late Elinor Ostrom, Sujai Shivakumar, 2005-09-08 What's wrong with foreign aid Many policymakers aid practitioners and scholars have called into question its ability to increase economic growth alleviate poverty or promote social development At the macro level only tenuous links between development aid and improved living conditions have been found At the micro level only a few programs outlast donor support and even fewer appear to achieve lasting improvements The authors of this book argue that much of aid's failure is related to the institutions that structure its delivery These institutions govern the complex relationships between the main actors in the aid delivery system and often generate a series of perverse incentives that promote inefficient and unsustainable outcomes In their analysis the authors apply the theoretical insights of the new institutional economics to several settings First they investigate the institutions of Sida the Swedish aid agency to analyze how that aid agency's institutions can produce incentives inimical to desired outcomes contrary to the desires of its own staff Second the authors use cases from India a country with low aid dependence and Zambia a country with high aid dependence to explore how institutions on the ground in recipient countries also mediate the effectiveness of aid Throughout the book the authors offer suggestions about how to improve aid's effectiveness These suggestions include how to structure evaluations in order to improve outcomes how to employ agency staff to gain from their on the ground experience and how to engage stakeholders as owners in the design resource mobilization learning and evaluation processes of development assistance programs     **Who Owns the Environment?** Peter J. Hill, Roger E. Meiners, 1998-08-20 The past several decades have witnessed a growing recognition that environmental concerns are essentially property rights issues Despite agreement that an absence of well defined and consistently enforced property rights results in the exploitation of air water and other natural resources there is still widespread disagreement about many aspects of America's property rights paradigm The prominent contributors to *Who Owns the Environment* explore numerous theoretical and empirical possibilities for remedying these problems An important book for environmental economists and those interested in environmental policy     Effective Governance and the Political Economy of Coordination Dan Greenwood, 2023-08-09 This book provides a conceptual and methodological approach for researchers evaluating governance and policy in the face of complexity and demonstrates the application of this approach across different governance and policy contexts It fills a significant gap in the literature on governance and proposes a theoretical focus on

coordination to enable the assessment of multi tier cross sector governance institutions and policy It also introduces a range of applications for the proposed approach including two case studies of governance and policy for the built environment and health services The book introduces analyses and draws from a range of perspectives in political economy political science policy analysis and evaluation It also engages with longstanding debates in political economy about states and markets which are largely overlooked by political science analyses of coordination challenges in governance The book will appeal to scholars and students of governance public policy and political science

*CONTEMPORARY DEBATES IN PUBLIC*

*ADMINISTRATION* ALKA DHAMEJA,2003-01-01 Public administration is reeling under complex challenges and pressures in the face of the changing trends in liberalization privatization and globalization As a pertinent area of social sciences it is in search of a new identity in the form of theoretical bases conceptual clarity and contextual applicability The development of the discipline is characterized by failed semi developed and recycled narratives which are unable to provide any well defined epistemological parameters Whatever one finds in the form of conceptual and applied growth in public administration especially pertaining to the Third World appears to be borrowed imitated and implemented out of context The discipline of public administration must therefore reinvent itself in the wake of new developments in the areas of theory building organizational reforms information technology participatory development corporate ethics humane governance responsive administration non state organizations and administrative capability This book makes an attempt to grapple with some of these contemporary concerns in order to generate a debate on the impact of globalization on public administration A collection of diverse topics that address various facets of public administration the overall thrust is on developing indigenous approaches for meeting the growing demands of the changing scenario The wide range of issues covered in the volume makes for a comprehensive view of the various perceptions within the discipline of public administration The book will be of immense use to students academicians researchers policy makers and practitioners in public administration

**The**

**Handbook of Social Capital** Dario Castiglione,Jan W. van Deth,Guglielmo Wolleb,2008-04-17 Social capital is a relatively new concept in the social sciences In the last twenty or so years it has come to indicate that networks of social relationships represent a resource for both the individual and society since they provide support for the individual and facilitate collective action Although this is not an entirely new idea the more systematic way in which social capital captures such an intuition has created a new theoretical paradigm and helped to develop a series of innovative research programmes in politics economics and the study of human well being The concept has gained currency beyond academia extending its influence to political and policy making circles at local national and international levels It has also affected the way in which social surveys are conceived and public policies assessed As the idea of social capital has spread the literature about it has increased exponentially After twenty years of rapid expansion it is time for a more considered and critical assessment of how the original concept has been adapted and refined and how successful its application has been The Handbook of Social Capital

intends to do precisely that It offers a state of the art view of discussions about the concept of social capital and the way in which it has been applied in empirical research The organization of the Handbook reflects this intention by focusing on conceptual development and analysis in the first part by identifying two main areas of research in which social capital has favoured the development of new and influential research programmes political participation in democratic societies and economic development and by exploring the more normative and policy oriented consequences of social capital All chapters comprising the volume were specifically written for the Handbook by some of the main experts in the fields The book provides authoritative and innovative introduction to the study of social capital

Collaboration for Sustainability and Innovation: A Role For Sustainability Driven by the Global South? Diego A. Vazquez-Brust, Joseph Sarkis, James J. Cordeiro, 2013-11-20 A number of arguments are made by an international group of authors in this though provoking book about an understudied and socially important context A future in which financial wealth transfers across the North South divide from richer to poorer countries is far from sufficient for the relief of poverty and the pursuit of sustainability Caution must be taken when growth is achieved through the liquidation of the natural wealth of poorer nations in order to maintain a global economic status quo Neither poverty reduction nor sustainability will ultimately be achieved The financial collapse and social upheaval that might result will make the most recent economic downturn look trivial by comparison What is more urgently needed instead as argued in this book is collaboration for sustainability and innovation in the global South especially building on models originally developed in the South that are transferable to the North In pursuit of a sustainable and more equitable future the book examines such topics as Cross Border Innovation in South North Fair Trade Supply Chains Potential Pollution Prevention Programs in Bangladesh Digital Literacy and Social Inclusion in the South through Collective Storytelling and Eco innovation at the Bottom of the Pyramid Many of these stories and have not been told and need greater visibility The book contributes in a meaningful way to the discussion of how innovation and sustainability science can benefit both sides in South North innovation collaborations It provides useful introduction to the topics as well as valuable critiques and best practices This back and forth flow of ideas and innovation is itself new and promising in the modern pursuit of a fair and sustainable future for all regions of our planet

Institutions in Transition Peter Ho, 2005-07-21 China's urban sprawl has led to serious social cleavages Unclear land and property rights have resulted in an uneasy alliance between real estate companies and local authorities with most willing to strike illegal deals over land The results have been devastating Farmers live in fear that the land they till today will be gone tomorrow while urban citizens are regularly evicted from their homes to make way for new skyscrapers and highways These shocking incidents underscore the urgency of the land question in China The recent conviction of the Chinese Minister for Land Resources and the forced evictions that have led to the injury and death of ordinary Chinese citizens highlight the case for land reform Against this backdrop many scholars criticize China's lack of privatization and titling of property This monograph however demonstrates that these critically depend on timing and place

Land titling is imperative for the wealthier regions yet may prove detrimental in areas with high poverty. The book argues that China's land reform can only succeed if the clarification of property rights is done with caution and ample regard for regional variations.

*The Ideas of Ronald H. Coase* Lawrence W. C. Lai, 2011-03-01. This book is the first work dedicated to the key ideas of Nobel Laureate Ronald Coase on pollution and public goods with sustainable development in mind from the perspective of an economist town planner. The seminal contributions of Ronald Coase foretold in the form of the Coase Theorem by another Nobel laureate George Stigler have been much analyzed and often misinterpreted by friends and foes alike. In this book Lawrence Lai attempts to revisit Coase's seminal works and bring to the fore their importance in economic and urban planning policy analysis. Coase's comparative institutional approach offers an important vehicle for the analysis of pressing social issues such as sustainable development and all those interested in the creation of new platforms for performing policy analysis will welcome this important work.

*Polycentric Governance and Development* Michael Dean McGinnis, 1999. How communities transcend the tragedy of the commons.

*Theories of the Policy Process* Paul A. Sabatier, Christopher M. Weible, 2014-07-08. *Theories of the Policy Process* provides a forum for experts in the most established and widely used theoretical frameworks in policy process research to present the basic propositions, empirical evidence, latest updates, and promising future research opportunities of each framework. This well-regarded volume covers such enduring classics as Multiple Streams, Herweg et al., Punctuated Equilibrium, Baumgartner et al., Advocacy Coalition Framework, Jenkins Smith et al., Institutional Analysis and Development Framework, Schlager and Cox, and Policy Diffusion, Berry and Berry, as well as two newer theories: Policy Feedback, Mettler and SoRelle, and Narrative Policy Framework, Shanahan et al. The fourth edition includes discussion of global and comparative perspectives in each theoretical chapter plus a brand new chapter that explores how these theories have been adapted for and employed in non-American and non-Western contexts. An expanded introduction and revised conclusion fully examines and contextualizes the history, trajectories, and functions of public policy research. Since its first publication in 1999, *Theories of the Policy Process* has been and remains the quintessential gateway to the field of policy process research for students, scholars, and practitioners.

*Theories of the Policy Process, Second Edition* Paul Sabatier, 2019-06-04. *Theories of the Policy Process* provides a forum for the proponents of several of the most promising and widely used theoretical frameworks to present the basic propositions of their frameworks, to assess the empirical evidence that has developed, and to discuss promising directions for future research. The first edition contained analysis.

***The International Yearbook of Environmental and Resource Economics 2005/2006*** Henk Folmer, Thomas H. Tietenberg, 2005-01-01. The *International Yearbook of Environmental and Resource Economics* presents articles which are surveys of current issues in this research area where literature is abundant. As every year we recommend the present yearbook to keep up with the developments of this literature.

Michel Griffon, *Quarterly Journal of International Agriculture*. The Yearbook provides a comprehensive overview of cutting edge issues in environmental and

resource economics The expert contributors address some of today's most pressing environmental topics including issues in water pricing reforms spatial environmental policy environmental equity and the siting of hazardous waste facilities strategies to conserve biodiversity corporate sustainability the double dividend hypothesis of environmental taxes valuing environmental changes in the presence of risk The Yearbook will provide economists scholars and practitioners working in environmental and resource economics with a comprehensive overview of the cutting edge issues in the field

Landscape, Process and Power Serena Heckler, 2012 In recent years the field of study variously called local indigenous or traditional environmental knowledge TEK has experienced a crisis brought about by the questioning of some of its basic assumptions This has included reassessing notions that scientific methods can accurately elicit and describe TEK or that incorporating it into development projects will improve the physical social or economic well being of marginalized peoples The contributors to this volume argue that to accurately and appropriately describe TEK the historical and political forces that have shaped it as well as people's day to day engagement with the landscape around them must be taken into account TEK thus emerges not as an easily translatable tool for development experts but as a rich and complex element of contemporary lives that should be defined and managed by indigenous and local peoples themselves

**Community Management and Common Property of Coastal Fisheries in Asia and the Pacific** Robert S. Pomeroy, 1994-01-01 *The Practice of Constitutional Development* Filippo Sabetti, Barbara Allen, Mark Sproule-Jones, 2009-01-01 This edited collection further expands our knowledge about what comprises a successful constitution in both theory and application Building on the research and analysis of Vincent Ostrom who as one of America's leading scholars on constitutions has spent a lifetime writing about constitutions in America and overseas Each chapter shows how particular countries governments and organizations devise constitutions to reflect their visions of governance and sets of rules for their leaders On a higher theoretical level the contributors emphasize the importance of choosing the rules of the political game in order to determine the nature of the game itself Extending Ostrom's intellectual quest to solve constitutional dilemmas the scholars gathered here discuss a wide variety of issues ranging from the problems of water scarcity and local public economies in Africa to the prospect of a new political order in the European North Book jacket

**The Political Economy of Non-Territorial Exit** Trent J. MacDonald, 2019 Territorial political organisation forms the backbone of western liberal democracies However political economists are increasingly aware of how this form of government neglects the preferences of citizens resulting in dramatic conflicts The Political Economy of Non Territorial Exit explores the theoretical possibility of unbundling government functions and decentralising territorial governance

**The SAGE Handbook of Environment and Society** Jules Pretty, Andy Ball, Ted Benton, Julia Guivant, David R Lee, David Orr, Max Pfeffer, Professor Hugh Ward, 2007-10-30 A monumental and timely contribution to scholarship on society and environments The handbook makes it easy and compelling for anyone to learn about that scholarship in its full manifestations and as represented by some of the most highly respected
