Rethinking Labor History Essays On Discourse And Class Analysis:

Rethinking Labor History Lenard R. Berlanstein, 1993 The fundamentals guiding labor historians are under scrutiny today as never before The field has attempted to uncover the socioeconomic conditions that produced labor militancy and class consciousness with scholars focusing on proletarianization the loss of control over the production process as the key to class conflict Currently this entire approach is being questioned In *Rethinking Labor History* nine well known French labor historians join the debate Advocates of both revisionist Marxism and discourse analysis are represented and examples of empirical research emerging from the theoretical disputes are included Handbook Global History of Work Karin Hofmeester, Marcel van der Linden, 2017-11-20 Coffee from East Africa wine from California chocolate from the Ivory Coast all those every day products are based on labour often produced under appalling conditions but always involving the combination of various work processes we are often not aware of What is the day to day reality for workers in various parts of the world and how was it in the past How do they work today and how did they work in the past These and many other questions comprise the field of the global history of work a young discipline that is introduced with this handbook In 8 thematic chapters this book discusses these aspects of work in a global and long term perspective paying attention to several kinds of work Convict labour slave and wage labour labour migration and workers of the textile industry but also workers organisation strikes and motivations for work are part of this first handbook of global labour history written by the most renowned scholars of the profession **Gender History in Practice** Kathleen Canning, 2006 The eight essays collected in this volume examine the practice of gender history and its impact on our understanding of European history Each essay takes up a major methodological or theoretical issue in feminist history and illustrates the necessity of critiquing and redefining the concepts of body citizenship class and experience through historical case studies Kathleen Canning opens the book with a new overview of the state of the art in European gender history She considers how gender history has revised the master narratives in some fields within modern European history such as the French Revolution but has had a lesser impact in others Weimar and Nazi Germany *Gender History in Practice* includes two essays now regarded as classics *Feminist History after the Linguistic Turn* and *The Body as Method* as well as new chapters on experience citizenship and subjectivity Other essays in the book draw on Canning's work at the intersection of labor history the history of the welfare state and the history of the body showing how the gendered social body was shaped in Imperial Germany The book concludes with a pair of essays on the concepts of class and citizenship in German history offering critical perspectives on feminist understandings of citizenship Featuring an extensive thematic bibliography of influential works in gender history and theory that will prove invaluable to students and scholars *Gender History in Practice* offers new insights into the history of Germany and Central Europe as well as a timely assessment of gender history's accomplishments and challenges *Discourses of Denial* Thomas Discenna, 2017-09-22 *Discourses of Denial* explores the myriad ways that the labor of those employed by universities is

situated as somehow distinct from ordinary labor Focusing on a variety of sites where academic labor is discursively constructed in popular consciousness including among the professoriate itself its critics and detractors the unionization struggles of graduate students the invisibility of contingent academics and the resistance to the unionization of student athletes Merging Critical Rhetoric CR with Critical Discourse Analysis CDA this study examines myth that academic work is not the same as other labor Pason 2011 p 1786 The denial of academic labor functions to underwrite an attack on labor in all of its variations producing what Berardi 2009 calls a new kind of worker who values labor as the most interesting part of his or her life and therefore no longer opposes the prolongation of the working day but is actually ready to lengthen it out of personal choice and will p 79 The professoriate is therefore not a retrograde figure of more genteel times but the emblematic figure of late capitalism's transition to cognitive labor and with it an unceasing colonization of the human lifeworld

History and Identity Stefan Berger, 2022-01-20 This introduction to contemporary historical theory and practice shows how issues of identity have shaped how we write history Stefan Berger charts how a new self-reflexivity about what is involved in the process of writing history entered the historical profession and the part that historians have played in debates about the past and its meaningfulness for the present He introduces key trends in the theory of history such as postmodernism poststructuralism constructivism narrativism and the linguistic turn and reveals in turn the ways in which they have transformed how historians have written history over the last four decades The book ranges widely from more traditional forms of history writing such as political social economic labour and cultural history to the emergence of more recent fields including gender history historical anthropology the history of memory visual history the history of material culture and comparative transnational and global history

Attending Madness Lee-Ann Monk, 2015-06-29 He is what we would call a very good attendant who would not run away or flinch from any patient but would try to have his orders carried out if possible Such was the view of William Coady attendant to the insane in the British settler colony of Victoria Australia in the 1870s This book is a history of William Coady's occupation a history of asylum work and workers in nineteenth-century Australia It considers not only who attendants were and why they worked in the asylum but also how they and others variously defined the very good attendant Colonial asylum advocates imagined the attendant as an archetype drawing on ideas from Britain about the nature of insanity and its treatment In exploring the articulation of these ideas in a specific colonial context and their effect on the colonial asylum workplace Lee Ann Monk makes an important contribution to the international history of the asylum She also opens new dimensions in the history of this occupation on which the fate of patients very much depended by analysing attendants' efforts to construct an occupational identity and give meaning to their work thus providing new insights into their sense of themselves and their occupation

Dock Workers Sam Davies, Colin J. Davis, David de Vries, Lex Heerma van

Voss,Lidewij Hesselink,Klaus Weinbauer,2017-09-29 Workers who loaded and unloaded ships have formed a distinctive occupational group over the past two centuries As trade expanded so the numbers of dock labourers increased and became concentrated in the major ports of the world This ambitious two volume project goes beyond existing individual studies of dock workers to develop a genuinely comparative international perspective over a long historical period Volume 1 contains studies of 22 major ports worldwide Built around an agreed framework of issues these port studies examine the type of workers who dominated dock labour their race class and ethnicity the working conditions of dockers and the role of government as employer arbitrator and supporter The studies also detail how dockers organized their labour patterns of strike action and involvement in political organizations The structure of the port city is also outlined and descriptions given of the waterside environment These areas of investigation form the basis for a series of 11 thematic studies which comprise Volume 2 Drawing on the information provided in the port studies these essays identify important aspects and recurring themes and explain how and why particular cases diverge from the rest The final chapter of the book synthesizes the various approaches taken to offer a model which suggests several configurations of dock labour and presents suggestions for future research This major scholarly achievement represents the most sustained attempt to date to provide a comparative international history of dock labour An annotated bibliography completes this essential reference work *Class* Ulrika Holgersson,2016-08-31 There is hardly any discussion of class that does not in some way relate to the theories of Marx and Weber So profound was the impact of their ideas that their writings are often perceived as the only original and most reliable interpretations of class society But Marx and Weber were neither the first nor last to talk about class and they did so based on the specific conditions prevalent in their own communities Class explains this complex field using cultural sociological and feminist perspectives It deepens our understanding of the problems of class and uses illuminating examples from media popular culture and literature that explain current class analysis Class is an elegant lucid comprehensive introduction that broadens our understanding of the concept and the immense power that it exerts by way of in and exclusions *Dulcinea in the Factory* Ann Farnsworth-Alvear,2000-03-17 A study of social control resistance and self perception in the textile industry as the workforce changed from almost all female to almost all male *Class Struggles* Dennis L. politics and society Since the 1960s American liberalism and the Democratic Party have been remade along professional class lines widening liberalism's impact but narrowing its social and political vision In *Mastery and Drift* historians Brent Cebul and Lily Geismer have assembled a group of scholars to address the formation of professional class liberalism and its central role in remaking electoral politics and the practice of governance Across subjects as varied as philanthropy consulting health care welfare race immigration economics and foreign conflicts the authors examine not only the gaps between liberals' egalitarian aspirations and their approaches to policymaking but also how the intricacies of contemporary governance have tended to bolster professional class liberals' power The contributors to *Mastery and Drift* all came of age amid the development of professional class liberalism giving them distinctive and important perspectives in understanding its internal limitations and its relationship to neoliberalism and the Right With never ending disputes over the meaning of liberalism the content of its governance and its relationship to a resurgent Left now is the time to consider modern liberalism's place in contemporary American life

This anniversary edition of Black Powder White Lace Margaret Mulrooney's history of the community of Irish immigrant workers at the du Pont powder yards is being published to remind readers of the rich materials on the du Pont workers now publicly available through the Hagley Library and Museum and of Mulrooney's powerful conclusions about immigrant communities in America The Limits of Labour David Bright, 2011-11-01 In a few short decades before the First World War Calgary was transformed from a frontier outpost into a complex industrial metropolis With industrialization there emerged a diverse and equally complex working class David Bright explores the various levels of class formation and class identity in the city to argue that Calgary's reputation as a prewar centre of labour conservatism is in need of revision Bright also delineates the trials of the Calgary labour movement in the 1920s Internal divisions and dissent prevented the movement from realizing the potential strength of the working class Instead even as local capitalism restructured itself political and industrial labour organizations wilfully fragmented their own base of support In particular they failed to address the concerns and needs of the growing number of unemployed in the city a neglect that foreshadowed events of the 1930s This failure left the labour movement unable to meet the challenge of the Great Depression In part at least the demise of labour as a viable political alternative in Calgary paved the way for the rise of Social Credit Using Calgary as a model The Limits of Labour reasserts the need to place class formation at the heart of the development of western Canada and provides an historical context to the renewed struggle of labour for social justice in the 1990s **Lunch-Bucket Lives** Craig Heron, 2015-06-03 Lunch Bucket Lives takes the reader on a bumpy ride through the history of Hamilton's working people from the 1890s to the 1930s It ambles along city streets peers through kitchen doors and factory windows marches up the steps of churches and fraternal halls slips into saloons and dance halls pauses to hear political speeches and above all listens for the stories of men women youths and children from families where people relied mainly on wages to survive Heron takes wage earning as a central element in working class life but also looks beyond the workplace into the households and neighbourhoods settlement patterns and housing marriage child care domestic labour public health schooling charity and social work popular culture gender identities ethnicity and ethnic conflict and politics in various forms presenting a comprehensive view of working class life in the first half of the twentieth century This book has been published with the help of a grant from the Federation for the
