Rethinking General Practice Dilemmas In Primary Care:

Our NHS Andrew Seaton, 2023-08-22 An engaging inclusive history of the NHS exploring its surprising survival and the people who have kept it running In recent decades a wave of appreciation for the NHS has swept across the UK Britons have clapped for frontline workers and championed the service as a distinctive national achievement All this has happened in the face of ideological opposition marketization and workforce crises But how did the NHS become what it is today In this wide ranging history Andrew Seaton examines the full story of the NHS He traces how the service has changed and adapted bringing together the experiences of patients staff from Britain and abroad and the service s wider supporters and opponents He explains not only why it survived the neoliberalism of the late twentieth century but also how it became a key marker of national identity Seaton emphasizes the resilience of the NHS perpetually in crisis and yet perennially enduring as well as the political values it embodies and the work of those who have tirelessly kept it afloat **Current Catalog** National Library

Digby, 1999-06-24 This book focuses on a formative period in the development of modern general practice The foundations of present day health care in Britain were created in the century before the National Health Service of 1948 when medicine was transformed in its structure professional status economic organization and therapeutic power In the first full length study of general practice for these years Anne Digby deploys an impressive range of hitherto unused archival material and oral testimony to probe the character of general practitioners careers and practices and to assess their relationships with local communities a wider society and the state An evolutionary approach is adopted to explain the origins and nature of the many changes in medical practice and the lives of ordinary doctors The study also explores the gendered nature of medical practice as reflected in the experience of a golden band of women GPs and examines the hidden role of the doctors wife in the practice **Preventing Coronary Heart Disease** Michael Calnan, 2002-09-11 Coronary Heart Disease is the major cause of

death in the UK being responsible for thirty one percent of male deaths and for twenty four percent of female deaths in 1987 in England and Wales Preventing Coronary Heart Disease examines these statistics and focuses specifically on policies for its prevention by the Government general practitioners and concerned groups Michael Calnan looks at the feasibility and effectiveness of these health policies and the obstacles in the way of their adoption Drawing mainly on the discipline of politics sociology and epidemiology the author begins by examining the epidemiological case for prevention and then analyses what the UK Government is doing and can do The Government s policy is based on the role of primary care in prevention and the author discusses how this can be taken on board by GPs concerned groups and the general public Coronary heart disease is of major concern to all those working in health and related industries as well as to individuals This book is the first study of the policies of prevention of the disease and will be invaluable reading for students of health studies

and social policy as well as professionals working in health care

The Cambridge Social History of Britain, 1750-1950 F. M. L. Thompson, 1990 Whilst in certain quarters it may be fashionable to suppose that there is no such thing as society historians they have had no difficulty in finding their subject The difficulty rather is that an outpouring of research and writing is hard for anyone but the specialist to keep up with the literature or grasp the overall picture In these three volumes as is the tradition in Cambridge Histories a team of specialists has assembled the jigsaw of topical monographic research and presented an interpretation of the development of modern British society since 1750 from three perspectives those of regional communities the working and living environment and social institutions Each volume is self contained and each contribution thematically defined contains its own chronology of the period under review Taken as a whole they offer an authoritative and comprehensive view of the manner and method of the shaping of society in the two centuries of unprecedented demographic and economic change

The Sociology of the Health Service Michael Bury, 2002-09-11 The Sociology of the Health Service responds directly to the need to develop a sociological analysis of current health policy Topics covered vary from privatisation and health service management to health education and the politics of professional power Also included is an historical review of sociology's contributions to health policy and proposals for an agenda for sociological health policy research in the 1990s

Heroin Addiction and the British System: Treatment and policy responses John Strang, Michael Gossop, 2005 Presenting a comprehensive account of the development of policies and treatments Heroin Addiction brings together the perspectives of policy makers practitioners and social

commentators **Health and Society in Britain Since 1939** Virginia Berridge, 1999-05-27 British health policy has undergone enormous change in the post war era The NHS established in the post war period has been constantly reorganised and the role of doctors and associated medical professions has radically changed This book considers the changes in health policy and in the service provided by the NHS and examines in detail the mixed economy of health care and the role of different providers of health care as well as their relationships both with recipients of care and the state In doing so Professor Berridge sheds light on the increasingly important part that lay people especially women have played in the provision of health care and looks at community care and the shifting balance of power within the medical profession The book provides a guide to changes in health and health policy during and since World War II giving an authoritative analysis of the most recent research Health and the National Health Service John Carrier, Ian Kendall, 1998-01-01 This book weighs up the successes and failures of the NHS and examines the conflicts which have riven the Health Service for over forty years It looks at recent responses to the apparent failure of health care in the UK and includes discussions of the public private debate within the Health Service **Biomedicine Examined** M. Lock, D. Gordon, 2012-12-06 The culture of contemporary medicine is the object of investigation in this book the meanings and values implicit in biomedical knowledge and practice and the social processes through which they are produced are examined through the use of specific case studies The essays provide examples of how various facets of 20th century medicine including education research the creation of medical knowledge the development and application of technology and day to day medical practice are pervaded by a value system characteristic of an industrial capitalistic view of the world in which the idea that science represents an objective and value free body of knowledge is dominant The authors of the essays are sociologists and anthropologists in almost equal numbers also included are papers by a social historian and by three physicians all of whom have steeped themselves in the social sciences and humanities This cooperative endeavor which has necessitated the breaking down of disciplinary barriers to some extent is perhaps indicative of a larger movement in the social sciences one in which there is a searching for a middle ground between grand theory and attempts at universal explanations on the one hand and the context specific empiricism and relativistic accounts characteristic of many historical and anthropological analyses on the other **BMJ**, 1997
