*Health, Human Rights and the United Nations* Theodore Macdonald,Diane Plamping,2018-04-19 In the light of impending environmental catastrophe people all over the world in all walks of life are becoming more aware of the pressing need to act globally The need to base our decisions and actions less on parochial national advantage sequestered in hate and suspicion of other nation s playing the same game of Russian roulette have to give way to a new appreciation of the fact that our global village is indeed so very small and perilously frail We depend upon one another as never before and unless we insure the health and human rights of all we shall surely each perish individually In *Health Human Rights and the United Nations* Theodore H MacDonald carefully analyses the origin development and structure of the United Nations UN and its key agencies and considers its capacity to mediate the Universal Declaration of Human Rights He takes a detailed look into human rights abuses in Sudan s Darfur province Burma Liberia the Occupied Palestinian Territories and the United Kingdom By investigating the development of the World Health Organization WHO and the pressures being brought to bear upon it MacDonald exposes contradictions in the aims of both the WHO and the UN Does the current global political scene and its

neoliberal policies nullify the work of both Is the UN fit for purpose Can drastic reforms result in equitable solutions Can a new trans national body be developed to arbitrate global trade health human rights and fiscal issues This remarkable book is ideal for anyone interested in international law human rights global health public health and health promotion Public health and health promotion professionals including international healthcare organisations care agencies and international charities will find the analysis enlightening It is also of great interest to policy makers and shapers in communities and government political activists and all those with an interest in equality and globalisation The European Union and Health Policy Ed Randall,2000-11-27 The European Union is becoming increasingly involved in health policy The Treaties of Maastricht and Amsterdam require the EU to consider health issues in all that it does Even though the Union has no direct involvement in the delivery of health services its range of responsibilities including the ramifications for health of the Single European Market make it a key player This is the first major academic book solely devoted to EU health and health related policy

**Managing Healthy Organizations** Mikael Holmqvist,Christian Maravelias,2010-10-04 During the past two decades corporate management has come to take an active role in health promotion programming for employees offering health education screenings therapy and even leisure initiatives However little attention has been given to how contemporary worksite health programs in fact blur the traditional distinction between work and private life This has resulted in that little research on the other side of the work health nexus how employers factor health considerations into workforce management and productivity control With the advancement of work site health promotion in contemporary organizations Holmqvist and Maravelias argue that this narrow focus and the typical uncritical standpoint towards initiatives which are taken in the name of employees health is inadequate At a more fundamental level the advancement of work site health promotion may be a sign of a new or altered corporate health ethic in contrast to the old corporate health ethic that was narrow and specific to the workplace the new corporate health ethic appears to judge the whole employee and especially what the whole employee may become the risks one faces and the abilities one has to shoulder the responsibility for developing into a real corporate value The authors suggest that health experts work is closely aligned with problems relating to the general management of organizations Through a focused appraisal of this central albeit neglected occupational group in management studies this book tries to explore and understand in some depth situations and experiences that are of general interest and concern in our society **Health, Trade and Human Rights** Theodore H. MacDonald,Archbishop Desmond Tutu,Grace H.

Chickadonz,2018-12-14 This work contains forewords by Desmond M Tutu Archbishop Emeritus Cape Town South Africa and Mogobe Ramose Chairperson and Professor of Philosophy Department of Philosophy University of South Africa Health Trade and Human Rights shows how a policy of free rather than fair trade increasingly undermines Third World health It clearly illustrates how the looming environmental crisis combined with growing levels of health inequity will have adverse effects and details precisely how the basic human rights enshrined in the UN Charter have gradually become subsidiary to the

dictates of free trade enforced by the World Trade Organisation This groundbreaking new book argues the need for impartial data based and transnational arbitration of equity in health and other human rights and suggests how this might be accomplished without violence to national rights with an emphasis on regional free trade Health Trade and Human Rights provides vital thought provoking information for general readers with an interest in the Third World and social welfare Academics and students studying development international studies and public health will find it invaluable as will healthcare professionals international healthcare organisations care agencies and international charities Policy makers and shapers in communities and government will find the content revelatory as will political activists and those with an interest in equality and globalisation The book criticises the basis the method and the extent to which the politics of wealth continues to undermine and violate the right of the poor to good health The combination of experience with scientific rigour is presented in accessible everyday language It is seductive inviting the curiosity of the reader to last until the very end of the book MacDonald s message is clear and unambiguous war is no longer the father of all things Instead justice is the mother of all peace Mogobe Ramose in his Foreword Astonishingly accessible informing and inspiring Statistically sound penetratingly accurate admirably balanced Theodore MacDonald writes with passion as well as with sense Much of what he has to say is drawn from his own experience working as a medical doctor and a mathematician in a broad range of the world s poorest nations But overarching that is a powerful insight into social and economic issues along with well honed skills as a communicator I am pleased to recommend this splendid book Desmond M Tutu in his Foreword
