**A Call to Be Whole** Barbara J. Sowada, 2003-07-30 Examines the complex interrelationships that inform the health care system Health care like all social systems is a product of thought Up to now our collective thinking has been based on trying to manage parts not the whole This book inquires into four age old questions that shape all health care systems What is health What is care Who is responsible How much is enough Americans have the wealthiest health care system in the world yet the health status of Americans ranks in the lowest quartile among the world's 25 industrialized nations and 45 million Americans are without health insurance Today's cost quality and access problems are inter related and can be traced to taken for granted assumptions and health care's outmoded organizing concepts reductionism and materialism Greater fragmentation of care an over dependence on technology inattention to social and environmental determinants of health and serious economic and moral dilemmas are some of the results of the last 40 years of piecemeal political and economic reform This book has three purposes The first is to help the reader see healthcare as a complex system a part in a larger whole and to show how answers to the questions What is health What is care Who is responsible How much is enough implicitly define the purpose effectiveness efficiency and fairness of a health care system The second is to show that today's access cost and quality problems are interrelated and arise from outmoded concepts unquestioned assumptions and a long trail of inconsistent and contradictory answers to the four questions The third purpose is to acquaint readers with both the personal and societal challenges of finding coherent answers to the four questions raised above and to describe some of the budding experimental solutions that challenge traditional conventions and assumptions

**Handbook of the Learning Organization** Anders Örténblad,2019-12-12 The concept of the learning organization is one of the most popular management ideas of the last few decades Since it was conceived as an idea in its own right it has been given various definitions and meanings such that we are still faced with the question as to whether any unified understanding of what the learning organization really is can be established This Handbook offers extensive reviews of both new and traditional perspectives on the concept and provides suggestions for how the learning organization can best be defined practiced studied and developed in future research With contributions from long standing scholars in the field as well as those new to the area this book aims to bridge the gap between traditional and more critical perspectives and in doing so find alternative features and angles to take the idea forward In addition to elaborating on and developing older definitions of the learning organization and suggesting updated and even new definitions the chapters also provide focused explorations on pertinent aspects of the learning organization such as ambidexterity gender inclusivity and systems thinking They also survey organizations that have made efforts towards becoming learning organizations how the learning organization can best be measured and studied and the universality of the idea itself Some of the questions raised in this book are answered or at least given tentative answers while other questions are left open In this way the book has the ambition to take the learning organization an important step further whilst having no intentions to take any final step instead the intention is that others will endeavour to continue where this book stops **New Thinking in Complexity for the Social Sciences and**
