Reticuloendothelial system or macrophage system is the system of primitive phagocytic cells, which play important role in defense mechanism of the body.

## **MACROPHAGE**

Macrophage is a large cell derived from monocyte. It has the property of phagocytosis. Therefore, the macrophage is also defined as a large phagocytic cell.

## **CLASSIFICATION OF RETICULOENDOTHELIAL CELLS**

The reticuloendothelial cells are classified into two types:

- Fixed reticuloendothelial cells or tissue macrophages
- Wandering reticuloendothelial cells.

## **FIXED RETICULOENDOTHELIAL CELLS – TISSUE MACROPHAGES**

The fixed reticuloendothelial cells are also called the tissue macrophages or fixed histiocytes because these cells are usually located in the tissues.

The tissue macrophages are:

Intracellular Delivery Aleš Prokop,2011-05-26 This book features a special subsection of Nanomedicine an application of nanotechnology to achieve breakthroughs in healthcare It exploits the improved and often novel physical chemical and biological properties of materials only existent at the nanometer scale As a consequence of small scale nanosystems in most cases are efficiently uptaken by cells and appear to act at the intracellular level Nanotechnology has the potential to improve diagnosis treatment and follow up of diseases and includes targeted drug delivery and regenerative medicine it creates new tools and methods that impact significantly upon existing conservative practices This volume is a collection of authoritative reviews In the introductory section we define the field intracellular delivery Then the fundamental routes of nanodelivery devices cellular uptake types of delivery devices particularly in terms of localized cellular delivery both for small drug molecules macromolecular drugs and genes at the academic and applied levels are covered The following section is dedicated to enhancing delivery via special targeting motifs followed by the introduction of different types of intracellular nanodelivery devices e g a brief description of their chemistry and ways of producing these different devices Finally we put special emphasis on particular disease states and on other biomedical applications whilst diagnostic and sensing issues are also included Intracellular delivery therapy is a highly topical which will stir great interest Intracellular delivery enables much more efficient drug delivery since the impact on different organelles and sites is intracellular as the drug is not supplied externally within the blood stream There is great potential for targeted delivery with improved localized delivery and efficacy

**Pharmacology** John Hadden, 2013-11-09 This comprehensive treatise on the reticuloendothelial system is a project jointly shared by individual members of the Reticuloendothelial RE Society and biomedical scientists in general who are interested in the intricate system of cells and molecular moieties derived from those cells which constitute the RES It may now be more fashionable in some quarters to consider these cells as part of what is called the mononuclear phagocytic system or the lymphoreticular system Nevertheless because of historical developments and current interest in the subject by investigators from many diverse areas it seems advantageous to present in one comprehensive treatise current information and knowledge concerning basic aspects of the RES such as morphology biochemistry phylogeny and ontogeny physiology and pharmacology as well as clinical areas including immunopathology cancer infectious diseases allergy and hypersensitivity It is anticipated that by presenting information concerning these apparently heterogeneous topics under the unifying umbrella of the RES attention will be focused on the similarities as well as interactions among the cell types constituting the RES from the viewpoint of various disciplines The treatise editors and their editorial board consisting predominantly of the editors of individual volumes are extremely grateful for the enthusiastic cooperation and enormous task undertaken by members of the biomedical community in general and especially by members
