Schuppli, 2012-12-06 With the aromatic retinoic acid analog Tigason oral and intravenous pharmacokinetic studies have been performed in 5 normal volunteers Simultaneous fitting of single i v and oral data to a three compartment model assuming first order absorption was possible Using Nonlin parameter estimates of the single dose data one is able to predict the decline in plasma levels of parent drug following cessation of a 10 days multiple dosing regimen up to 24 hours The model is however unable to predict a phase of prolonged elimination observed beyond 24 hours Moreover in 5 patients who underwent chronic therapy 8 15 months substantial plasma levels of both unchanged drug and main metabolite corresponding carboxylic acid were observed up to 140 days after cessation of the therapy An apparent half life of elimination of 80 100 days can be calculated The drug appears to be stored at some yet unknown storage site Investigation of metabolism of Tigason in rats and humans revealed 19 different bio transformation products thus far most of them appearing in the urine in low amounts 20010 of dose A few of them mainly the acid Ro 10 1670 after conjugation to glucuronic acid are excreted in the bile in high amounts 60 80% of dose No drug appeared unchanged in the excreta after i v administration to rats

Rook's Textbook of Dermatology Tony Burns, Stephen M. Breathnach, Neil Cox, Christopher Griffiths, 2008-04-15 The late Arthur Rook established the Textbook of Dermatology as the most comprehensive work of reference available to the dermatologist and it enjoys instant name recognition Each subsequent

edition has been expanded as the subject has developed and the book remains the ultimate source of clinical information for the trainee and practising dermatologist alike. *Rook's Textbook of Dermatology* covers all aspects of skin disease from basic science through pathology and epidemiology to clinical practice. Long recognized for its unparalleled coverage of diagnosis, this clinical classic earned its reputation as a definitive source of information. New features of this Seventh Edition include: Two new Editors, Neil Cox and Christopher Griffiths, join the team. Every chapter is updated and several are completely rewritten from scratch. Completely new chapter on AIDS and the Skin. Traditional emphasis on diagnosis preserved. More coverage of treatment in each of the disease-specific chapters.

Retinoids Heinz Nau, William S. Blaner, 2012-12-06 In the future, the decade of the 1990s will likely be viewed as a Golden Age for retinoid research. There have been unprecedented research gains in the understanding of retinoid actions and physiology since the retinoid nuclear receptors were first identified and the importance of retinoic acid in developmental processes was first broadly recognized in the late 1980s. Between then and now, our knowledge of retinoid action has evolved from one of a near complete lack of understanding of how retinoids act within cells to one of sophisticated understanding of the molecular processes through which retinoids modulate transcription. In this volume, we have tried to provide a comprehensive update of the present understanding of retinoid actions with an emphasis on recent advances. The initial chapters of the volume or Section A focus on the physicochemical properties and metabolism of naturally occurring retinoids. N. O'Y provides an uncommonly encountered view of retinoid effects from the perspective of the physicochemical properties of retinoids. V. AKIANI and BUCK lend a perspective on the biological occurrence and actions of retro and anhydro retinoids. Section B considers both the retinoid nuclear receptors and their mechanisms of action as well as synthetic retinoids that have been used experimentally to provide mechanistic insights into receptor actions and have potential therapeutic use for treating disease. PIEDRAFITA and PFAHL provide a comprehensive review of retinoid nuclear receptor biochemistry and molecular biology.

Retinoids in Oncology Waun Ki Hong, Reuben Lotan, 2020-07-24 This reference provides a comprehensive overview of recent developments in basic research that are relevant to the application of retinoids for cancer prevention and treatment. Organized in a quick referral format by specific disease site, this book describes the effects of retinoids on squamous differentiation in normal, pre-malignant and malignant epithelial tissues; addresses the mechanisms by which cultured keratinocytes respond to retinoids; considers the antitumor activity of combination therapy with retinoids and cytokines; reviews the toxicity profiles of the vitamin A molecule and the synthetically derived retinoid compounds and their effects on humans; examines the use of retinoids in the prevention of basal cell carcinoma and squamous cell carcinoma (SCC) and in the therapy of advanced SCC; and summarizes data on the potential of retinoids to prevent epithelial cancer, to act as adjuvants to current therapies in early stages of the disease and to aid in the management of both solid tumours and hematologic malignancies. A guide for the many disciplines involved in the preclinical studies and direct care of cancer patients, this book serves as useful reading for

Retinal Degeneration Robert E. Anderson, Joe G. Hollyfield, Matthew M. LaVail, 2012-12-06 During the last few years an explosion of information has come from human genetics and molecular and cell biological studies as to the genetic basis for a number of forms of inherited retinal degenerations These disorders have plagued mankind for millennia because they take from otherwise healthy individuals the precious gift of sight The fundamental advances in recent years have identified a number of genes involved in the groups of diseases which hopefully will lead to discoveries that may in the not too distant future allow the prevention and possible cure of some of these blinding eye disorders To foster a forum for discussions of studies on degenerative retinal disorders we convened a symposium on retinal degenerations in 1984 at the VIth International Congress of Eye Research Meeting held in Alicante Spain Because of the success of this meeting and the subsequent publication we have since organized a series of biennial satellite meetings on retinal degenerations for the ISER congresses held in Nagoya Japan 1986 San Francisco 1988 and Helsinki 1990 Each of these satellite symposium on retinal degenerations was accompanied by a published proceedings volume This volume is the fifth in this series and contains the

proceedings of the Sardinia Symposium on Retinal Degeneration held September 15 20 1992 as a satellite meeting of the 10th International Congress of Eye Research Retinoids: New Trends in Research and Therapy J. -H. Saurat, 1985-05-08
