Artificial Neural Networks in Biomedicine

Paulo J.G. Lisboa, Emmanuel C. Ifeakor, Piotr S. Szczepaniak, 2012-12-06 Following the intense research activities of the last decade artificial neural networks have emerged as one of the most promising new technologies for improving the quality of healthcare Many successful applications of neural networks to biomedical problems have been reported which demonstrate convincingly the distinct benefits of neural networks although many of these have only undergone a limited clinical evaluation Healthcare providers and developers alike have discovered that medicine and healthcare are fertile areas for neural networks the problems here require expertise and often involve non trivial pattern recognition tasks there are genuine difficulties with conventional methods and data can be plentiful The intense research activities in medical neural networks and allied areas of artificial intelligence have led to a substantial body of knowledge and the introduction of some neural systems into clinical practice An aim of this book is to provide a coherent framework for some of the most experienced users and developers of medical neural networks in the world to share their knowledge and expertise with readers

Editorial Operations Branch, *Motor competence in visually impaired persons* Zbyněk Janečka, Ladislav Bláha, Martin Kudláček, Ondřej Ješina, Daniel Mikeška, Kateřina Chrobáková, 2020 The practice of many physical activities by persons with visual impairment is subject to certain specifics which are given by the nature of the impairment This publication presents visual defects and their connection to sport and physical activities The studies of children and adults included here present a number of topics that concern their level of fitness and coordinative abilities the manner and frequency of conducting physical activities in the assessment of their quality of life and the desirable and realistic possibilities of engaging these people in the process of physical education This monograph addresses questions of psychomotor development and the competences of a person with disabilities

Endocrinology Index, 1971-05 *Age-Related Changes of the Human Eye* Carlo Cavallotti, Luciano Cerulli, 2008-05-31 Aging research on the human eyes crosses all areas of ophthalmology and also relies upon biological morphological physiological and biochemical tools for its study In *Age Related Changes of the Human Eye* the authors review all aspects of human eye aging In addition to descriptions of age related changes in almost all the structures of the human eyes the authors also include interesting accounts of personal experiments and data The ease of use and versatility of this volume makes it an essential tool for students and graduate students as well as post doctoral and or professional ophthalmologists *Age Related Changes of the Human Eye* provides the reader with an exhaustive panorama of what happens during aging in the eye thus making an important contribution to the understanding of the physiology and pathology of eye diseases

Macular Edema Thomas J. Wolfensberger, 2012-12-06 This timely publication fills a large gap in the ophthalmic literature which has so far lacked a monograph on the clinically very important subject of macular edema The book presents the most up to date scientific concepts concerning the etiology and pathogenesis of blood retinal barrier breakdown such as tight junction associated protein dysfunction and changes in fluid transport properties of the retinal pigment epithelium The bulk of the book is clinically oriented and addresses novel imaging and diagnostic techniques for the detection of macular edema as well as the clinical context of a panoply of ocular diseases which induce macular edema such as diabetes other vasculopathies uveitis and many others New light is shed on the association between highly active antiretroviral therapy and the induction of macular edema in HIV positive patients Novel drug treatment regimens with steroids and carbonic anhydrase inhibitors as well as new ways of applying laser and surgical therapies are also discussed in detail and practical treatment guidelines are given This book will be helpful for vitreoretinal specialists as well as for the practising ophthalmologist confronted with patients suffering from macular edema

Anabolic-Androgenic Steroids Charles D. Kochakian, 2012-12-06 This volume was planned to provide a comprehensive survey of the role of the anabolic

androgenic steroids in the vital economy exclusive of the androgenic sexual functions It seemed appropriate to bring together all of this information in an organized fashion in one volume at this time not only to serve as a source of information but also to indicate and suggest areas that need further exploration The anabolic action of the steroid hormones has gone through a period of great activity in both basic and clinical research A complete understanding of the manifold anabolic effects still remains to be elucidated and the art of clinical application is only gradually becoming apparent This volume should be useful not only to the experienced investigator in both basic and clinical research but also for the novice Furthermore it should serve as a source of information for the careful use of these steroids in certain metabolic diseases These steroids have had wide clinical application with variable results In many instances further careful exploration is suggested Other instances have demonstrated varying degrees of usefulness Lexicon Ophthalmologicum A.
