Few other cities can compare with Rome's history of continuous habitation nor with the survival of so many different epochs in its present. This volume explores how the city's past has shaped the way in which Rome has been built, rebuilt, represented, and imagined throughout its history. Bringing together scholars from the disciplines of architectural history, urban studies, art history, archaeology, and film studies, this book comprises a series of studies on the evolution of the city of Rome and the ways in which it has represented and reconfigured itself from the medieval period to the present day. Moving from material appropriations such as spolia in the medieval period through the cartographic representations of the city in the early modern period to filmic representation in the twentieth century, we encounter very different ways of making sense of the past across Rome's historical spectrum. The broad chronological arrangement of the chapters and the choice of themes and urban locations examined in each allows the reader to draw comparisons between historical periods. An imaginative approach to the study of the urban and architectural make-up of Rome, this volume will be valuable not only for historians of art and architecture but also for students of cultural history and film studies.

Handbook of Ancient Water Technology Örjan Wikander, 2021-10-01. A magisterial new handbook replaces the discussion of water technology in antiquity in R. J. Forbes' *Studies in Ancient Technology* and the first two volumes of *A History of Technology* edited by Charles Singer et al. It surveys water use and water technology in an area from Mesopotamia to the Atlantic Ocean from the beginning of the Neolithic period up to ca. A.D. 600, based on the archaeological and written evidence. 11 authors from very different backgrounds and with varying scholarly perspectives discuss the socio-economic background, irrigation and drainage, water supply, water in recreation, fountains, baths, etc., larger hydraulic works, canals and sluices, dams, drainage, water power, water legislation, and the administration of water resources. This handbook incorporates the results of four decades of historical research, important archaeological finds, extensive theoretical debate in a precise, up-to-date and reliable way, and offers scholars and students a new basis for discussion of technical progress in antiquity.

Photography, Architecture, and the Modern Italian Landscape Lindsay Harris, 2024-11-19. *Photography, Architecture, and the Modern Italian Landscape* explores the impact of photography at a pivotal moment in Italian architecture and culture, focusing on the period between 1910 and the mid-1970s. The book analyzes architectural photographs taken by Italian cultural figures who helped transform the Italian landscape into what we know today. This study charts the oscillation of Italians' ideas about what progress signified. For example, the book demonstrates that for writers and artists familiar with ancient ideas about civilization, in 1910 the Roman countryside exemplified the contradictions inherent in primitivism. On the one hand, their photographs praised the region's primordial beauty, yet their images condemned the crudeness of local living conditions. More broadly, it traces the history of primitivism and photography in Italy to show how cultural leaders' alarm at the nation's pre-modern living conditions, their aspiration to modernize them, and their grasp of photography to catalyze the process helped forge the modern Italian landscape, its monuments, housing, infrastructure, and natural environments. At the same time, it explores a vibrant period in photographic

history when the advent of photographic reproduction as a commercial process developed into a medium with its own visual style capable of shaping ideas about modernity This new image making and reproduction technology empowered Italy s cultural leaders not simply to represent the Italian landscape through photography but to determine how it developed Of interest to researchers and students from a range of disciplines modern architecture photography and Italian studies this book demonstrates the power of art to transform society and to reformulate our ideas of progress **The Architecture of Modern Italy** Terry Kirk,2005-06-02 The history of design in Italy is explored in this authoritative and comprehensive work Design periods include the era of Piranesi the eclecticism of the 19th century the futurism of the early 20th century the dogmatic fascism of the interwar period the designs of Pier Luigi Nervi and on to the present day Roman Theatres Frank Sear,2006-07-20 This book is an up to date and comprehensive account of Roman theatre architecture It contains information plans and photographs of every theatre in the Roman Empire for which there is archaeological evidence together with a full analysis of how Roman theatres were designed built and paid for and how theatres differ in different parts of the Roman Empire It is lavishly illustrated with plans text figures photographs and maps Catalog of Copyright Entries.
