World which had been written about and visited endlessly by the Romans and Greeks in antiquity. Indeed, although the Wonders were wondrous to behold, the Colosseum was a spectacular achievement in architecture, something new and innovative and therefore an amazing Wonder in its own way. The Colosseum was designed to be both a symbol and show of strength by the famous Flavian emperors, most notably Vespasian and his sons Titus and Domitian. Vespasian had started the construction of the Colosseum shortly after becoming emperor in 69 A.D. but he died before he could present any spectacles in his giant amphitheatre. That honor went to his son Titus, who celebrated the inaugural opening in 80 A.D. with 100 days of games despite the fact that the Colosseum was not completely finished. When his brother Domitian came to power in 81 A.D., he finished the amphitheatre but not without making some changes to the overall design. By the time it was truly finished, the Colosseum stood about 150 feet tall with the oval in the center stretching nearly two football fields long and over 500 feet across. The Colosseum is a large stadium even by today's standards, and its great size conveys the power of the empire as it dominates the landscape and towers over nearby buildings. Of course, the main events in the Colosseum were gladiator fights. Gladiators are somewhat synonymous with ancient Rome, and even thousands of years after they performed on the sands, when people are asked about Roman culture, many think about and refer to the bloody spectacles of men fighting to the death in the arena. Gladiatorial combat is often regarded as barbaric, and most find it very difficult to comprehend how people could have enjoyed watching something so violent, but nevertheless, the spectacle still intrigues and fascinates people today, whether in movies like *Gladiator* or television shows about *Spartacus*. Each match usually pitted one type of gladiator against a different type of gladiator, with each having their own kind of armor, weaponry, and fighting style. For example, the *retiarius* was a gladiator that used a net, dagger, and trident as his offensive weapons while only wearing a protective guard over his left arm for protection. The *retiarius* would typically fight against the *secutor*, a gladiator armed with a sword, large shield, helmet, and protective covering on his right arm and left leg. Therefore, a *retiarius* sacrificed armor for quickness in battle, while the *secutor* did the opposite. Although people often think of gladiators fighting to the death, the outcome of gladiatorial combats was not always fatal for one of the participants. If a gladiator fought well, the sponsor of the show could spare him, particularly if the crowd desired it. The fact that the outcome of matches was never the same, and the crowd could help determine the result of the match, certainly added to the Roman public's pleasure, making it a lot less surprising that such an abhorrent spectacle still fascinated the modern world.

[The Colosseum: A History](#) Robert B. Abrams, 2017-05-11 More than 1,500 years have passed since the last blood, human or animal, was spilled in the Colosseum, but the massive building erected by the Flavian emperors has continued to play a role in history. This book tells the dramatic story of the Colosseum from its bloody gladiatorial games and the sacrifice of early Christians to the dismantling of the arena and its final restoration. The book also recounts the story of Rome as viewed from the vantage point of the empire's most impressive ruins.

*A Monument to Dynasty and Death* Nathan T. Elkins, 2019-09-03 Go behind the scenes to discover why the Colosseum was the king of amphitheaters in the Roman world, a paragon of Roman engineering prowess. Early one morning in 80 CE, the

Colosseum roared to life with the deafening cheers of tens of thousands of spectators as the emperor Titus inaugurated the new amphitheater with one hundred days of bloody spectacles. These games were much anticipated for the new amphitheater had been under construction for a decade. Home to spectacles involving exotic beasts, elaborate executions of criminals, gladiatorial combats, and even when flooded, small-scale naval battles, the building itself was also a marvel. Rising to a height of approximately 15 stories and occupying an area of 6 acres, more than four times the size of a modern football field, the Colosseum was the largest of all amphitheaters in the Roman Empire.

In *A Monument to Dynasty and Death*, Nathan T. Elkins tells the story of the Colosseum's construction under Vespasian, its dedication under Titus, and further enhancements added under Domitian. The Colosseum, Elkins argues, was far more than a lavish entertainment venue; it was an ideologically charged monument to the new dynasty, its aspirations, and its achievements. *A Monument to Dynasty and Death* takes readers on a behind-the-scenes tour of the Colosseum, from the subterranean tunnels where elevators and cages transported gladiators and animals to the blood-soaked arena floor, to the imperial viewing box, to the amphitheater's decoration and amenities, such as fountains and an awning to shade spectators. Trained as an archaeologist, an art historian, and a historian of ancient Rome, Elkins deploys an interdisciplinary approach that draws on contemporary historical texts, inscriptions, archaeology, and visual evidence to convey the layered ideological messages communicated by the Colosseum. This engaging book is an excellent resource for classes on Roman art, architecture, history, civilization, and sport and spectacle.

The Roman Empire is the most famous in history, and the center of the far-reaching empire's activities was located in the Forum, a low area between the Capitoline and Palatine hills in Rome. The topography held a great deal of significance for Romans, and consequently so many layers of myth were laid on top of the landscape and buildings that it is difficult to separate legend from actual historical fact. As a low-lying area near the Tiber,

river the Forum was subject to much flooding and even into the 20th century the Forum area could flood upwards of over 40 feet above sea level This would factor significantly in the imagination of Romans who later ascribed the flooding with saving the city's founders Romulus and Remus from execution However in the 8th and 7th centuries B C this did not make for a good area for construction Previous generations of excavators have concluded that in the beginning there were wattle and daub huts in the Forum as indicated by remains of organic food material fragments of daub and evidence of post holes dug in the ground for these structures However a recent environmental study has shown that such structures could not survive the flooding that was endemic to the Forum suggesting that it took a few hundred years during the period of the Roman kings for the Romans to move up to 20 000 square meters of earth in order to reclaim land in the Forum and a gravel pavement was placed on top of the landfill If true this project shows a high degree of organization and central planning When the Colosseum was built in the late 1st century A D the Romans a people known for their architectural acumen managed to amaze themselves Martial a Roman poet writing during the inauguration of the Colosseum clearly believed the Colosseum was so grand a monument that it was even greater than the other Wonders of the Ancient World which had been written about and visited endlessly by the Romans and Greeks in antiquity Indeed although the Wonders were wondrous to behold the Colosseum was a spectacular achievement in architecture something new and innovative and therefore an amazing Wonder in its own way The Colosseum was designed to be both a symbol and show of strength by the famous Flavian emperors most notably Vespasian and his sons Titus and Domitian Vespasian had started the construction of the Colosseum shortly after becoming emperor in 69 A D but he died before he could present any spectacles in his giant amphitheatre That honor went to his son Titus who celebrated the inaugural opening in 80 A D with 100 days of games despite the fact that the Colosseum was not completely finished When his brother Domitian came to power in 81 A D he finished the amphitheatre but not without making some changes to the overall design By the time it was truly finished the Colosseum stood about 150 feet tall with the oval in the center stretching nearly two football fields long and over 500 feet across The Colosseum is a large stadium even by today's standards and its great size conveys the power of the empire as it dominates the landscape and towers over nearby buildings The modern world has the ancient Romans to thank for the origins of many modern technologies conveniences and ideas such as running water baths and republican style government but roads are another influence the Romans have had on the modern world that are often taken for granted Although Roman roads may not have attained the glamorous status of other inventions their influence is just as profound roads provide essential communication and transport lines for any country they are the veins and arteries that move the life blood of trade and peoples that make a country thrive
