Roman Infantry Equipment The Later Empire:

Roman Infantry Equipment Ian P. Stephenson, 1999 The first detailed descriptions of the Roman infantryman in the later empire Roman Army Units in the Eastern Provinces (2) Raffaele D'Amato, 2022-09-15 Drawing upon the latest literary and archaeological research this is an in depth study of the Roman Army units based in the Eastern Provinces during the turbulent third century of the Roman Empire In this book eminent Roman historian Dr Raffaele D Amato looks at the notoriously under represented history of the Roman armies during the middle 3rd Century whose records have been obscured by the chaotic civil wars of that period between usurpers to the Imperial authority of Rome Following on from the previous title MAA 527 Roman Army Units in the Western Provinces 2 3rd Century AD this book considers the evidence for troops in the Eastern half of the Empire specifically around the Balkans Mesopotamia the Middle East and North Africa and looks at the weakness of Imperial central authority which inevitably led to local particularism and a wide range of appearance in regional commands Dr D Amato uses literary painted sculptural and archaeological sources to reconstruct this little understood period of Roman military history and with the aid of meticulous coloured artwork photos and detailed charts reconstructs the appearance and campaigns of the Roman forces stationed in the East Roman Military Equipment from the Punic Wars to the Fall of Rome, second edition M. C. Bishop, John Coulston, 2006-04-22 Rome s rise to empire is often said to have owed much to the efficiency and military skill of her armies and their technological superiority over barbarian enemies But just how advanced was Roman military equipment What were its origins and how did it evolve The authors of this book have gathered a wealth of evidence from all over the Roman Empire excavated examples as well as pictorial and documentary sources to present a picture of what range of equipment would be available at any given time what it would look like and how it would function They examine how certain pieces were adopted from Rome s enemies and adapted to particular conditions of warfare prevailing in different parts of the Empire They also investigate in detail the technology of military equipment and the means by which it was produced and discuss wider questions such as the status of the soldier in Roman society Both the specially prepared illustrations and the text have been completely revised for the second edition of this detailed and authoritative handbook bringing it up to date with the very latest research It illustrates each element in the equipment of the Roman soldier from his helmet to his boots his insignia his tools and his weapons This book will appeal to archaeologists ancient and military historians as well as the generally informed and inquisitive reader *Legions in Crisis: The Transformation of the Roman Soldier - 192 to 284* Paul Elliot , 2014-05-10 The third century AD was a turbulent and testing time for the Roman Empire A new and powerful foe in the east had risen up to challenge Rome directly Barbarians on the northern frontiers were now more aggressive and more numerous than before and internally the population of the empire had to contend with rampant inflation and a series of terrible plagues Unfortunately the chaos became magnified by a lack of continuity on the imperial throne The army had real political power in the third century making and unmaking emperors as it

saw fit It had been aided in this by Septimius Severus the African emperor who had won out in the civil wars following Commodus assassination He increased the army s pay and granted other privileges While the army gained rapidly in size stature and political savvy during the reign of Septimius Severus it also accelerated a material transformation Armour shields helmets swords and javelins all began to be replaced with new styles Legions in Crisis looks closely at the new styles of arms and armour comparing their construction use and effectiveness to the more familiar types of Roman kit used by soldiers fighting the earlier Dacian and Marcomannic Wars What did this transformation in military technology mean for the tactical choices used on the battlefield Although the outcome had looked in doubt the army and the empire it protected weathered the storm to emerge into the fourth century fully able to tackle the challenges of a new age Medieval Weapons Robert D. Smith,Kelly DeVries,2007-04-20 This fascinating reference covers the weapons and armor used by warriors from the 4th to the 15th century and discusses how and why they changed over time In the Middle Ages the lack of standardized weapons meant that one warrior s arms were often quite different from another s even when they were fighting on the same side And with few major technological advances in that period the evolution of those weapons over the centuries was incremental But evolve they ultimately did bringing arms armor and siege weapons to the threshold of the modern era From the fall of the Roman Empire to the beginnings of the Renaissance Medieval Weapons An Illustrated History of Their Impact covers the inexorable transformation from warrior in the mail shirt to fully armored knight from the days of spears and swords to the large scale adoption of the handgun Medieval Weapons covers this fascinating expanse of centuries in chapters devoted to the early medieval Carolingian Crusade and late medieval periods Within each period the book details how weapons and armor were developed what weapons were used for different types of battles and how weapons and armor both influenced and were influenced by changing tactics in battles and sieges Roman Army Units in the Western Provinces (2) Raffaele D'Amato,2019-07-25 The appearance of Roman soldiers in the 3rd century AD has long been a matter of debate and uncertainty largely thanks to the collapse of central control and perpetual civil war between the assassination of Severus Alexander in 235 and the accession of the great Diocletian in 284 During those years no fewer than 51 men were proclaimed as emperors some lasting only a few days Despite this apparent chaos however the garrisons of the Western Provinces held together by means of localized organization and the recruitment of barbarians to fill the ranks They still constituted an army in being when Diocletian took over and began the widespread reforms that rebuilt the Empire though an Empire that their forefathers would hardly have recognized Fully illustrated with specially chosen colour plates this book reveals the uniforms equipment and deployments of Roman soldiers in the most chaotic years of the Empire Roman Body Armour Hilary & John Travis,2011-04-15 A reassessment and reconstruction of Roman Body armour Romano-Byzantine Infantry Equipment Ian P. Stephenson,2006 This companion to the author s authoritative survey Roman Infantry Equipment covers the long period from the accession of Diocletian 284 to the death of Heraclius 641 of which the central event is the end of the

Western Empire in favor of Byzantium Systematically Stephenson looks at the evolution of the different components of armor and weaponry helmets shields body armor the spear blades and bludgeons missile weapons and artillery He also examines the tactical uses made of infantry cavalry and the shieldwall

The Last Legionary Paul Elliott,2016-09-23 In AD 400 Roman rule in Britain was collapsing as the thinly stretched empire was besieged on all sides In The Last Legionary Paul Elliot explores all aspects of Late Roman military life from recruitment to weaponry marriage to wages warfare to religion It explores the world of the Roman soldier through the eyes of one man posted to a British garrison at the edge of the empire and follows the soldier s life through training and battle marriage and business dealings finally following him south as he leaves Britain for good in defence of Rome When the legionary finally escapes the worst posting in the Roman Empire it is only to join what effectively became a death march over the Alps without food or shelter To know what it was like to face the chanted battle cry the charge and slashing axes of the Goths and to understand why the order March out was so terrifying read Paul Elliott s mesmerising meticulously accurate account

Decorated Roman Armour Raffaele D'Amato,Andrey Evgenevich Negin,2017-03-30 From the time of the Bronze Age the warriors of all tribes and nations sought to emblazon their arms and armour with items and images to impress upon the enemy the wealth and power of the wearer Magnificently decorated shields were as much a defensive necessity as a symbol of social status Equally decorative symbols on shields and armour defined the collective ideals and the self conceived importance of the village or city state its warriors represented Such items were therefore of great significance to the wearers and the authors of this astounding detailed and extensively researched book have brought together years of research and the latest archaeological discoveries to produce a work of undeniable importance Shining Under the Eagles is richly decorated throughout and as well as battlefield armour details the tournament and parade armour from Rome s the earliest days Dr Andrey Negin is candidate of historical sciences Russian PhD member of the department of history of the Ancient World and Classical Languages of Nizhny Novgorod State University named after N I Lobachevsky Russian Federation He has carried out fieldwork on ancient Roman armour and has published books and numerous articles on Roman military equipment Dr Raffaele D Amato is an experienced Turin based researcher of the ancient and medieval military worlds After achieving his first PhD in Romano Byzantine Law and having collaborated with the University of Athens he gained a second doctorate in Roman military archaeology He spent the last year in Turkey as visiting professor at the Fatih University of Istanbul teaching there and working on a project about the army of Byzantium He currently works as part time researcher at the Laboratory of the Danubian Provinces at the University of Ferrara under Professor Livio Zerbini

Medieval Warfare Everett U. Crosby,2000-08-14 Homo sapiens homo pugnans and so it has been since the beginning of recorded history In the Middle Ages especially armed conflict and the military life were so much a part of the political and cultural development that a general account of this period is in large measure a description of how men went to war

Social and Political Life in Late Antiquity - Volume 3.1 William Bowden,Adam Gutteridge,Carlos

Machado,2006-12-31 This book examines a number of themes relating to social and political life in Late Antiquity The first part of the book considers how the powers of the emperor state and civic authorities were expressed in the physical environment and how coinage and material culture were caught up in the political life of the period The second part investigates the middle classes and the poor who are often less visible in archaeological textual and epigraphic records Other articles consider such topics as long term social evolution and the definition of time in Late Antiquity Two extensive bibliographic essays provide an overview of published literature relating to social and political life De Bellis Antiquitatis Version 3.0 Phil Barker,Sue Laflin-Barker,2018-07-05 DBA Version 3 0 updates the highly successful De Bellis Antiquitatis wargame rules for recreating ancient and medieval battles with miniature figures The brainchild of well known wargame designer Phil Barker and his wife Sue Laflin Barker the simple DBA rule system combines fast play play with historical realism to produce a visually realistic and exciting contest An Archaeology of Identity Andrew Gardner,2016-09-16 What happened to Roman soldiers in Britain during the decline of the empire in the 4th and 5th centuries Did they withdraw defect or go native More than a question of military history this is the starting point for Andrew Gardner s incisive exploration of social identity in Roman Britain in the Roman Empire and in ancient society Drawing on the sociological theories of Anthony Giddens and others Gardner shapes an approach that focuses on the central role of practice in the creation and maintenance of identities nationalist gendered class and ethnic This theory is then tested against the material remains of Roman soldiers in Britain to show how patterning of stratigraphy architecture and artifacts supports his theoretical construct The result is a retelling of the story of late Roman Britain sharply at odds with the traditional text driven histories and a theory of human action that offers much to current debates across the social sciences Wearing the Cloak Marie-Louise Nosch,Henriette Koefoed,2011-12-07 Wearing the Cloak contains nine stimulating chapters on Roman military textiles and equipment that take textile research to a new level Hear the sounds of the Roman soldiers clacking belts and get a view on their purchase orders with Egyptian weavers Could armour be built of linen Who had access to what kinds of prestigious equipment And what garments and weapons were deposited in bogs at the edge of the Roman Empire The authors draw upon multiple sources such as original textual and scriptural evidence ancient works of art and iconography and archaeological records and finds The chapters cover as did the Roman army a large geographical span Egypt the Levant the Etruscan heartland and Northern Europe Status prestige and access are viewed in the light of financial and social capacities and help shed new light on the material realities of a soldier s life in the Roman world **Technology in Transition A.D. 300-650** Luke Lavan,Enrico Zanini,Alexander Sarantis,2008-03-31 This book is the first general work to be published on technology in Late Antiquity It seeks to survey aspects of the technology of the period and to respond to questions about technological continuity stagnation and decline The book opens with a comprehensive bibliographic essay that provides an overview of relevant literature The main section then explores technologies in agriculture production metal ceramics and glass

engineering and building Papers draw on both archaeological and textual sources and on analogies with medieval and early modern technologies Reference is made not only to the periods which preceded it but to the transition to the Early Middle Ages and to the technological heritage of Late Antiquity to the Islamic world Several papers focus on Italy whilst others consider North Africa Asia Minor and the Near East

Roman Shields Hilary & John Travis, 2014-07-15 A comprehensive and amply illustrated study of Roman shields their changing styles their construction and their use in combat

On the Wings of Eagles Christopher Anthony Matthew, 2009-12-14 Gaius Marius 157 86B was one of the most innovative and influential commanders of antiquity With Marius in command of its legions Rome prevailed on the battlefields of North Africa and defeated a two pronged invasion of the Italian peninsula by 300 000 migrating Germanic tribesmen The reason for this success was a series of five ground breaking reforms through which Marius dramatically altered the demographics recruitment training and operation of the Roman army In effect Marius reforms changed the Roman military from a service of short term militia into a professional standing army This allowed Rome to use the military as an effective tool for military expansion and internal security and laid the foundations for the role of the Roman army for centuries to come Many of these reforms however came at a cost to the stability of the state This book charts the military implications of Marius reforms what they were why they were made how they were made and how they altered the functionality of the Roman military

Late Roman Combat Tactics Ilkka Syv  ne, 2024-09-30 An analysis of Roman military strategies and adaptations from the Tetrarchy to Heraclius Late Roman Combat Tactics by Dr Ilkka Syv  ne is essential reading for anyone seeking to understand land combat in the period from the Tetrarchy to the death of Heraclius a period when the Romans faced serious and growing military threats on many fronts The author s detailed analysis provides the reader with a complete understanding of the combat equipment worn by the soldiers types of troops tactics different unit orders and formations used by the late Romans and their enemies Importantly he lays out the developments and changes in these aspects across this critical period assessing how the Romans adapted or failed to adapt to the varied and changing array of enemies such as Persians Avars and Arabs The discussion examines how the Romans fought at every level so that it covers everything from the individual fighting techniques all the way up to the conduct of large scale pitched battles There is an immense amount of technical detail but the human element and the experience of the officers and ordinary soldiers is not forgotten with such factors as morale and the psychology of battle the face of battle given due consideration The thoroughly researched text is well supported by dozens of diagrams and illustrations A thoroughly illuminating read on its own Late Roman Combat Tactics is also the perfect companion to Dr Syv  ne s eight volume Military History of Late Rome

Collegia Centonariorum: The Guilds of Textile Dealers in the Roman West Jinyu Liu, 2009-09-28 The collegia centonariorum were often seen as the municipal fire brigades or status groups of sorts in the Roman cities Through a close investigation of the chronological development and geographical distribution of the collegia centonariorum their legal privileges and the prosopographical data of members and

patrons this volume reveals a much more complex picture of their origins characters and compositions in various regions from the first century BC to the fourth century AD Intricately connected with the textile economy the *collegia centonariorum* illustrate how elements as diverse as material demand from the military and the city of Rome legal infrastructure urban development and organizations of urban based craftsmen and tradesmen may have interfaced with each other in the Roman world
