**Growing Up and Growing Old in Ancient Rome** Mary Harlow, Ray Laurence, 2002 Throughout history every culture has had its own ideas on what growing up and growing old means this volume highlights the role of age in determining behaviour across the life span of an inhabitant of ancient Rome *Economic evidence and the changing nature of urban space in late antique Rome* Paul S. Johnson, 2013-02-11 *Economic Evidence and Changing Nature of Urban Space in Late Antique Rome* by Paul Johnson is an innovative study that focuses upon the relationship between the importation of amphora borne foodstuffs their distribution and discard within the City and what this tells us about changing uses of urban space between the 3rd and 6th centuries AD There have been a number of archaeological studies of late antique Rome in recent years most notably Roma dall'antichità all'alto Medioevo I and II as well as a long tradition of studies that have focused upon the pattern of imports to the City However the relationship between imported foodstuffs and the City as an urban unit has not been so well served PUGNARE: Economic Success and Failure George Maher, 2021-02-02 What is one of the best

ways to successfully predict the future Winston Churchill believed that the further back you look the further forward you are likely to see This intriguing book is testimony to this idea It looks back two thousand years to the Roman Empire to help us see into our own future The causes of the triumphs and disasters of our time are much the same as those of the Roman Empire The Romans were people just like us and the wisest of their great men and women were as wise as the best of ours Unfortunately the most foolish of theirs were just as foolish as the worst of ours Pugnare is the first historical account of the

Roman Empire written from a practical business perspective It is also about people because business is about people We can learn a lot from their behaviour from their successes and failures *Collegia Centonariorum: The Guilds of Textile Dealers in the Roman West* Jinyu Liu, 2009-09-28 The collegia centonariorum were often seen as the municipal fire brigades or status groups of sorts in the Roman cities Through a close investigation of the chronological development and geographical distribution of the collegia centonariorum their legal privileges and the prosopographical data of members and patrons this volume reveals a much more complex picture of their origins characters and compositions in various regions from the first century BC to the fourth century AD Intricately connected with the textile economy the collegia centonariorum illustrate how elements as diverse as material demand from the military and the city of Rome legal infrastructure urban development and organizations of urban based craftsmen and tradesmen may have interfaced with each other in the Roman world *Money, Labour and Land* Paul Cartledge, Edward E. exploring ancient Medieval early modern and renaissance cities Among the cities examined are Uruk Babylon Thebes Athens Rome Constantinople Baghdad Siena Florence Antwerp London Paris Amsterdam Mexico City Timbuktu Great Zimbabwe Hangzhou Beijing and Hankou Among the technologies discussed are irrigation water transport urban public transport aqueducts building materials such as brick and Roman concrete weaponry and fortifications street lighting and public clocks

**Edicta munerum: Advertising and Promotion of Gladiatorial Games in Ancient Pompeii** Anna Beata Miączewska, 2025-03-06 *Edicta munerum* Advertising and Promotion of Gladiatorial Games in Ancient Pompeii delves into the intriguing realm of behind the scenes preparations for the gladiatorial games in ancient Pompeii shedding light on how advertising played a pivotal role in informing and enticing the public to witness gladiators engage in life and death combat By examining epigraphic evidence the book highlights the spatial and aesthetic significance of inscriptions as ancient means of conveying information about mass events held in the local amphitheatres This study demonstrates that the world of advertising was well established and thriving over two millennia ago **The Ancient City** Arjan Zuiderhoek, 2017 This book

provides a survey of modern debates on Greek and Roman cities and a sketch of the cities chief characteristics **Urban Religion** Jörg Rüpke, 2020-02-24 So far religion has been seen as cause for dramatic developments in the history of cities it has contributed to the monumentalisation of centres and or has given importance to ex centric places Very recently anthropologists have been discovering religion in the contemporary global city But still awaiting historical investigation is the specific urban character of religious ideas practices and institutions and the role of urban space shaping this very religion in the course of history The time span from the Hellenistic age to Late Antiquity was crucial in the establishment of concepts and institutions of religion and witnessed extended waves of urbanisation Rome being central to this In addressing this problem this book fills a significant gap in the scholarship on urban religion across time Taking seriously the proposition that space is condition medium and outcome of social relations the development of urban religion in lived urban space and urban culture or urbanity offers a lens onto processes of religious change that have been neglected for the history of religion and for the study of urbanism The key thesis is that city space engineered the major changes that revolutionised religions This

stimulating book makes use of archaeology and history to address religion as an essential component of urban life in both the past and the present With a strong basis in the ancient Mediterranean as well as an insightful view of modern urban life R pke emphasizes that the practice and performance of religion at the everyday level is as essential in the creation of an urban ethos as the grand temples and institutions promulgated by the elite Monica L Smith author of *Cities The First 6 000 Years* J rg R pke offers a characteristically original and learned series of reflections on some of the many ways in which the history of religions and the history of cities might be entangled *Urban Religion* offers no single overarching thesis but it is consistently thought provoking and suggests many intriguing lines of investigation for the future Greg Woolf Institute of Classical Studies London

*Mediterranean Urbanization 800-600 BC* Robin Osborne,Barry Cunliffe,British Academy,2005-10-27 Urban life as we know it in the Mediterranean began in the early Iron Age settlements of great size and internal diversity appear in the archaeological record This collection of essays offers for the first time a systematic discussion of the beginnings of urbanization across the Mediterranean from Cyprus through Greece and Italy to France and Spain Leading scholars in the field look critically at what is meant by urbanization and analyse the social processes that lead to the development of social complexity and the growth of towns The introduction to the volume focuses on the history of the archaeology of urbanization and argues that proper understanding of the phenomenon demands loose and flexible criteria for what is termed a town The following eight chapters examine the development of individual settlements and patterns of urban settlement in Cyprus Greece Etruria Latium southern Italy Sardinia southern France and Spain These chapters not only provide a general review of current knowledge of urban settlements of this period but also raise significant issues of urbanization and the economy urbanization and political organization and of the degree of regionalism and diversity to be found within individual towns The three analytical chapters which conclude this collection look more broadly at the town as a cultural phenomenon that has to be related to wider cultural trends as an economic phenomenon that has to be related to changes in the Mediterranean economy and as a dynamic phenomenon not merely a point on the map Wide ranging in its geographical coverage this volume will be essential reading for scholars and students of archaeology settlement studies the archaic period and geographers interested in the history of urban forms
