O'Keefe, 2015-03-02 Romanesque is the style name given to the art and architecture of Europe in the eleventh and twelfth centuries First used in the early nineteenth century to express the perceived indebtedness of the visual artistic and architectural cultures of this period to their Classical antecedents the term has survived two centuries of increasingly sophisticated readings of the relevant medieval buildings and objet d art The study of Romanesque as a stylistic phenomenon is now almost exclusively the preserve of art historians particularly in the English speaking world Here the Romanesque is subjected to a long overdue theoretically informed archaeological inquiry The ideological foundations and epistemological boundaries of Romanesque scholarship are critiqued and the constructs of Romanesque and Europe are deconstructed and alternative strategies for interpreting Romanesque s constituent material are mapped out This book should at the very least illuminate the need for debate **Romanesque Art in Europe** Gustav K nstler, 1969

Romanesque and the Past John McNeill, Richard Plant, 2024-11-01 The nineteen papers collected in this volume explore a notable phenomenon that of retrospection in the art and architecture of Romanesque Europe They arise from a conference organized by the British Archaeological Association in 2010 and reflect its interest in how and why the past manifested itself in the visual culture of the 11th and 12th centuries This took many forms from the casual re use of ancient material to a specific desire to re present or emulate earlier objects and buildings Central to it is a concern for the revival of Roman and early medieval forms spolia selective quotation archaism and the construction of histories The individual essays presented

here cover a wide range of topics and media the significance of consecration ceremonies in the creation of architectural memory the rise of pictorial concepts in 12th century chronicles the creation of history in the Paris of Hugh of St Victor and the appeal of the works of Bernward of Hildesheim and of Hrabanus Maurus in the centuries after their deaths There are studies of buildings and the ideological purpose behind them at Tarragona Ripoll Cluny Pannonhalma Hungary La Roccelletta Calabria and Old St Peter s comparative studies of Trier Villenauve and Glastonbury and of Bury St Edmunds Rievaulx and Canterbury and wide ranging papers on the tantalizing evidence for an engagement with an overseas past in Ireland an Anglo Saxon past in England and a Milanese past among the aisleless cruciform churches of Augustinian Europe The volume concludes with an assessment of the very concept of Romanesque A Handbook of Romanesque Art J. J. M. Timmers, 1976

The Regional and Transregional in Romanesque Europe John McNeill, Richard Plant, 2021-11-29 The Regional and Transregional in Romanesque Europe considers the historiography and usefulness of regional categories and in so doing explores the strength durability mutability and geographical scope of regional and transregional phenomena in the Romanesque period This book addresses the complex question of the significance of regions in the creation of Romanesque particularly in relation to transregional and pan European artistic styles and approaches The categorization of Romanesque by region was a cornerstone of 19th and 20th century scholarship albeit one vulnerable to the application of anachronistic concepts of regional identity Individual chapters explore the generation and reception of forms the conditions that give rise to the development of transregional styles and the agencies that cut across territorial boundaries There are studies of regional styles in Aquitaine Castile Sicily Hungary and Scandinavia workshops in Worms and the Welsh Marches the transregional nature of liturgical furnishings the cultural geography of the new monastic orders metalworking in Hildesheim and the valley of the Meuse and the links which connect Piemonte with Conques The Regional and Transregional in Romanesque Europe offers a new vision of regions in the creation of Romanesque relevant to archaeologists art historians and historians alike *Carolingian and Romanesque Architecture, 800 to 1200* Kenneth John Conant, 1993-01-01 Professor Conant s detailed studies of Santiago de Compostela and of the abbey church at Cluny fit him for this account of building in the period of the round arch which preceded Gothic In this volume he shows how at the instigation of the monasteries during the little renaissance of Charlemagne Roman methods of construction were revived and fused with local traditions to produce a distinctive Carolingian manner and how such monuments as the Palatine Chapel at Aachen already contained hints of the nobler and more mature Romanesque style which was to become international professor Conant extends his survey to cover the regions of medieval France Spain Portugal the Holy Land Italy Germany Northern Europe and Britain **A journey through Romanesque art** Victoria Charles, Klaus H. Carl, 2025-02-28 Entdecken Sie die fabelhaft bunte Welt von James Ensor Diese neue Monografie f hrt Sie auf eine fesselnde Reise durch das Schaffen des bedeutenden belgischen Malers Ensor mit seinem einzigartigen Stil und Mut schenkte uns eine Welt voller Masken Skelette und

Romanesque Patrons and Processes Jordi Camps,Manuel Casti eiras,John McNeill,Richard Plant,2018-03-09 The twenty five papers in this volume arise from a conference jointly organised by the British Archaeological Association and the Museu Nacional d Art de Catalunya in Barcelona They explore the making of art and architecture in Latin Europe and the Mediterranean between c 1000 and c 1250 with a particular focus on questions of patronage design and instrumentality No previous studies of patterns of artistic production during the Romanesque period rival the breadth of coverage encompassed by this volume both in terms of geographical origin and media and in terms of historical approach Topics range from case studies on Santiago de Compostela the Armenian Cathedral in Jerusalem and the Winchester Bible to reflections on textuality and donor literacy the culture of abbatial patronage at Saint Michel de Cuxa and the re invention of slab relief sculpture around 1100 The volume also includes papers that attempt to recover the procedures that coloured interaction between artists and patrons a serious theme in a collection that opens with Function condition and process in eleventh century Anglo Norman church architecture and ends with a consideration of The death of the patron **Romanesque Architecture in Western Europe** Sir Alfred William Clapham,1936 **The Romanesque Architecture of Western Europe** Ralph Warner Hammett,2012-05-01 Romanesque Art and Craftsmanship in Central Europe, 900-1300 Herbert Schutz,2011 As a sequel

to the analysis of Romanesque church architecture as the Heavenly Jerusalem on earth this book reviews the embellishing cloister arts during the Romanesque period in Central Europe This book discusses the work in textiles ivory wood precious metals bronze and illuminated manuscripts Pertinent illustrations stress the themes common to those media suggesting that the craftsmen knew one another TMs work Some may have worked in more than one medium Circumstances tended to preserve religious works The book rests on the extensive use of detailed illustrative objects and images **Byzantine and Romanesque Architecture , The Renaissance of Roman Architecture** Sir Thomas Graham Jackson, 1921

Medieval Irish Architecture and the Concept of Romanesque Tadhg O'Keeffe, 2024-02-28 This book presents a fresh perspective on eleventh and twelfth century Irish architecture and a critical assessment of the value of describing it and indeed contemporary European architecture in general as Romanesque Medieval Irish Architecture and the Concept of Romanesque is a new and original study of medieval architectural culture in Ireland The book's central premise is that the concept of a Romanesque style in eleventh and twelfth century architecture across Western Europe including Ireland is problematic and that the analysis of building traditions of that period is not well served by the assumption that there was a common style Detailed discussion of important buildings in Ireland a place marginalised within the Romanesque model reveals the Irish evidence to be intrinsically interesting to students of medieval European architecture for it is evidence which illuminates how architectural traditions of the Middle Ages were shaped by balancing native and imported needs and aesthetics often without reference to Romanitas This book is for specialists and students in the fields of Romanesque medieval archaeology medieval architectural history and medieval Irish studies
