Czajkowski,Benedikt Eckhardt,Meret Strothmann,2020-06-10 The study of the Roman Empire has changed dramatically in the last century with significant emphasis now placed on understanding the experiences of subject populations rather than a sole focus on the Roman imperial elites Local experiences and interactions between periphery and centre are an intrinsic component in our understanding of the empire s function over and against the earlier top down model But where does law fit into this new decentralized picture of empire This volume brings together internationally renowned scholars from both legal and historical backgrounds to study the operation of law in each region of the Roman Empire from Britain to Egypt from the first century BCE to the end of the third century CE Regional specificities are explored in detail alongside the emergence of common themes and activities in a series of case studies that together reveal a new and wide ranging picture of law in the Roman Empire balancing the practicalities of regional variation with the ideological constructs of law and empire      **The**

**Roman Empire** Neville Morley,2010-06-04 Over a millennium after the end of its unrivalled dominance the spectre of Rome figures highly in western culture This book explores what the empire meant to its subjects The idea of Rome has long outlived the physical empire that gave it form and now holds sway over vastly more people and a far greater geographical area than the Romans ever ruled It continues to shape our understanding of the nature of imperialism and influence the workings of the world It is through the lens of Rome that we answer questions such as How do empires grow How are empires ruled Do empires exploit their subjects or civilise them Rejecting the simplistic narrative of military triumph followed by decline and fall the books analyses the origins of Roman imperialism its wide ranging impact on the regions it conquered and its continuing influence in debates about modern imperialism      **Identities in Antiquity** Joseph Skinner,Vicky

Janković, Marko Jankovic, 2018-06-11 The papers collected in this volume provide invaluable insights into the results of different interactions between Romans and Others Articles dealing with cultural changes within and outside the borders of Roman Empire highlight the idea that those very changes had different results and outcomes depending on various social political economic geographical and chronological factors Most of the contributions here focus on the issues of what it means to be Roman in different contexts and show that the concept and idea of Roman-ness were different for the various populations that interacted with Romans through several means of communication including political alliances wars trade and diplomacy The

volume also covers a huge geographical area from Britain across Europe to the Near East and the Caucasus but also provides information on the Roman Empire through eyes of foreigners such as the ancient Chinese

***Art, Architecture, and the Moving Viewer, c. 300-1500 CE***, 2022-04-19 Premodern architecture and built environments were fluid spaces whose configurations and meanings were constantly adapting and changing The production of transitory meaning transpired whenever a body or object moved through these dynamic spaces Whether spanning the short duration of a procession or the centuries of a building's longue durée a body or object in motion created in the moment narratives that unfolded through time and space The authors in this volume forge new approaches to architectural studies by focusing on the interaction between monuments artworks and their viewers at different points in space and time Contributors are Christopher A Born Elizabeth Carson Pastan Nicole Corrigan Gillian B Elliott Barbara Franz Anne Heath Philip Jacks Divya Kumar Dumas Brigitte Kurmann Schwarz Ashley J Laverock Susan Leibacher Ward Elodie Leschot Meghan Mattsson McGinnis Michael Sizer Kelly Thor and Laura J Whatley

***Theoderic and the Roman Imperial Restoration*** Jonathan J. Arnold, 2014-02-24 Theoderic and the Roman Imperial Restoration offers a new interpretation of the fall of Rome and the barbarian successor state known as Ostrogothic Italy Relying primarily on Italian textual and material evidence Jonathan J Arnold demonstrates that the subjects of the Ostrogothic kingdom viewed it as a

revived Roman Empire and its king Theoderic as its emperor Most accounts of Roman history end with the fall of Rome in 476 or see the Ostrogothic kingdom as a barbarous imitator This book however challenges such views placing the Theoderican epoch firmly within the continuum of Roman history

**Religious Individualisation** Ralph Haeussler, Anthony King, 2023-03-23 The Roman world was diverse and complex And so were religious understandings and practices as mirrored in the enormous variety presented by archaeological iconographic and epigraphic evidence Conventional approaches principally focus on the political role of civic cults as a means of social cohesion often considered to be instrumentalized by elites But by doing so religious diversity is frequently overlooked marginalizing deviating cult activities that do not fit the Classical canon as well as the multitude of funerary practices and other religious activities that were all part of everyday life In the Roman Empire a person s religious experiences were shaped by many and sometimes seemingly incompatible cult practices whereby the civic and imperial cults might have had the least impact of all Our goal therefore is to rethink our methodologies aiming for a more dynamic image of religion that takes into account the varied and often contradictory choices and actions of individual which reflects the discrepant religious experiences in the Roman world Is it possible to poke into the mind of an individual in Roman times whatever his her status and ethnicity and try to understand the individual s diverse experiences in such a complex interconnected empire exploring the choices that were open to an individual This also raises the question whether the concept of individuality is valid for Roman times In some periods the impact of individual actions can be more momentous the very first adoption of Roman style sculpture cult practices or Latin theonyms for indigenous deities can set in motion long term processes that will significantly influence people s perceptions of local deities their characteristics and functions Do individual choices and preferences prevail over collective identities in the Roman Empire compared to pre Roman times To examine these questions this volume presents case studies that analyze individual actions in the religious sphere
