Rome And China A Study Of Correlations In Historical Events:

Rome and China Frederick John Teggart,1939 Rome and China, a Study of Correlations in Historical Events.
Frederick J. Teggart Frederick John Teggart,1939 **Civilization: Contents, Discontents, and Malcontents and Other**
Essays (c) Stanford M. Lyman,1990 **The Study of International Relations** Hugh C. Dyer,Leon

Mangasarian,1989-10-16 This wide ranging study surveys the present state of international relations as an academic field It locates and assesses recent developments in the field in short what is being done where by whom and why The editors have focused on some central and controversial theoretical issues and included surveys of principal sub fields as well as the various approaches to the study of international relations in different countries The book provides a comprehensive overview of an important and fast growing area of academic endeavour and is essential reading for teachers and students of international politics and the social sciences at large *Politics and Culture in International History* Adda B.

Bozeman,2017-07-12 The current political conflicts in Somalia and Russia make the reappearance of this book as relevant as ever *Politics and Culture in International History* illumines world politics by identifying the causes of conflict and war and assessing the validity of schemes for peace and unity Bozeman maintains that political systems are grounded in cultures thus international relations are by definition hitercultural relations She deals exclusively with the thought patterns of the world s literate civilizations and societies between the fourth millenium B C and the fifteenth century A D In a substantial new introduction Bozeman analyzes world politics over the last half century showing how the interplay of politics and culture has intensified She notes that the world s assembly of states is no longer held together by substantive accords on norms purposes and values but by loose agreements on the use offorms techniques and words The causes and effects of these changes between the 1950s and 1990s are assayed by Bozeman China and the Roman Orient Friedrich Hirth,2021-06-17 Similar

in size and in duration the Chinese and the Roman empires ruled half the world s population at the time of their co existence But what did they know about each other In *China and the Roman Orient* Friedrich Hirth uses linguistic geographical and historical analysis of ancient Chinese records to reconstruct the ancient trade routes used by the Chinese and to show what knowledge they had of the Roman Empire His careful research on the original Chinese sources also tells us much about the geography history and commerce of the period *China and the Roman Orient* quickly established itself as a landmark work It remains an important and much cited work but is now scarce This new edition contains a new introduction by leading contemporary scholar Victor Mair Professor of Chinese Language and Literature at the University of Pennsylvania USA

Ancient Greece and China Compared G. E. R. Lloyd,Jingyi Jenny Zhao,Qiaosheng Dong,2018-01-11 A pioneering methodologically sophisticated set of studies describing and analysing key features of ancient Greek and Chinese civilisations including issues in philosophy and religion in art and literature in mathematics and the life sciences in agriculture city planning and institutions Provides a model for collaborative comparative work on ancient civilisations *A Geography of*

China T.R. Tregear, 2017-07-12 This book is intended primarily for serious students of geography but it will also appeal to the general reader For this reason technical terms have been used as sparingly as is consistent with correct meaning Wherever the subject matter permits the author emphasizes geographical growth and shows the interaction of geographical environment and the human activity and institutions When originally published in the 1960s China was beginning to change with breathtaking rapidity These changes are presented here against geographical and historical background Knowledge of the environmental facts is essential to an appreciation of the political economic and social problems that have faced the Chinese people *Ancient China and Its Enemies* Nicola Di Cosmo, 2002 Relations between Inner Asian nomads and Chinese are a continuous theme throughout Chinese history By investigating the formation of nomadic cultures by analyzing the evolution of patterns of interaction along China's frontiers and by exploring how this interaction was recorded in historiography this looks at the origins of the cultural and political tensions between these two civilizations through the first millennium BC The main purpose of the book is to analyze ethnic cultural and political frontiers between nomads and Chinese in the historical contexts that led to their formation and to look at cultural perceptions of others as a function of the same historical process Based on both archaeological and textual sources this 2002 book also introduces a new methodological approach to Chinese frontier history which combines extensive factual data with a careful scrutiny of the motives methods and general conception of history that informed the Chinese historian Ssu ma Ch ien Handbook of Ancient Afro-Eurasian Economies Sitta Reden, 2019-12-02 The notion of the Silk Road that the German geographer Ferdinand von Richthofen invented in the 19th century has lost attraction to scholars in light of large amounts of new evidence and new approaches The handbook suggests new conceptual and methodological tools for researching ancient economic exchange in a global perspective with a strong focus on recent debates on the nature of pre modern empires The interdisciplinary team of Chinese Indian and Graeco Roman historians archaeologists and anthropologists that has written this handbook compares different forms of economic development in agrarian and steppe regions in a period of accelerated empire formation during 300 BCE and 300 CE It investigates inter imperial zones and networks of exchange which were crucial for ancient Eurasian connections Volume I provides a comparative history of the most important empires forming in Northern Africa Europe and Asia between 300 BCE and 300 CE It surveys a wide range of evidence that can be brought to bear on economic development in these empires and takes stock of the ways academic traditions have shaped different understandings of economic and imperial development as well as Silk Road exchange in Russia China India and Western Graeco Roman history Andre Gunder Frank and Global Development Patrick Manning, Barry K. Gills, 2013-07-03 This work focuses on the ideas and influence of Andre Gunder Frank one of the founding figures and leading analysts of political economy at the global level Through discussion of his work the contributors in this volume examine the shifting currents of the world economy and the accompanying controversies advances and regressions in the understanding of global patterns in present and past Frank's

publications from the 1960s to his death in 2005 enlivened and advanced debates on every continent He analyzed Latin American dependency long term accumulation of capital world systems shifting dominance in the world economy and social movements His style of wide ranging scholarship shared by a growing number of analysts demonstrated its relevance to the basic causes and effects of economic and social change This collection provides a comprehensive overview of the legacy of Frank s work and takes stock of the recent and expected developments in global and historical analysis of political economy It will be of great interest to students and scholars of international political economy international relations and political theory

Social Change Christopher Chase-Dunn,Bruce Lerro,2016-01-08 From the Stone Age to the Internet Age this book tells the story of human sociocultural evolution It describes the conditions under which hunter gatherers horticulturalists agricultural states and industrial capitalist societies formed flourished and declined Drawing evidence from archaeology ethnography linguistics historical documents statistics and survey research the authors trace the growth of human societies and their complexity and they probe the conflicts in hierarchies both within and among societies They also explain the macro micro links that connect cultural evolution and history with the development of the individual self thinking processes and perceptions Key features of the text Designed for undergraduate and graduate social science classes on social change and globalization topics in sociology world history cultural geography anthropology and international studies Describes the evolution of the modern capitalist world system since the fourteenth century BCE with coverage of the rise and fall of system leaders the Dutch in the seventeenth century the British in the nineteenth century and the United States in the twentieth century Provides a framework for analyzing patterns of social change Includes numerous tables figures and illustrations throughout the text Supplemented by framing part introductions suggested readings at the end of each chapter an end of text glossary and a comprehensive bibliography Offers a web based auxiliary chapter on Indigenous North American World Systems and a companion website with excel data sets and additional web links for students

Across Cultural Borders Eckhardt Fuchs,Benedikt Stuchtey,2001-12-29 This innovative work offers the first comprehensive transcultural history of historiography The contributors transcend a Eurocentric approach not only in terms of the individual historiographies they assess but also in the methodologies they use for comparative analysis Moving beyond the traditional national focus of historiography the book offers a genuinely comparative consideration of the commonalities and differences in writing history Distinguishing among distinct cultural identities the contributors consider the ways and means of intellectual transfers and assess the strength of local historiographical traditions as they are challenged from outside The essays explore the question of the utility and the limits of conceptions of modernism that apply Western theories of development to non Western cultures Warning against the dominant tendency in recent historiographies of non Western societies to define these predominantly in relation to Western thought the authors show the extent to which indigenous traditions have been overlooked The key question is how the triad of industrialization modernization and the historicization

process which was decisive in the development of modern academic historiography also is valid beyond Europe. Illustrating just how deeply suffused history writing is with European models, the book offers a broad theoretical platform for exploring the value and necessity of a world historiography beyond Eurocentrism. *Diverse Histories of American Sociology* Anthony Blasi, 2005-06-01 This volume presents views of American sociology from minority groups and important intellectual movements that did not merge into the mainstream. Coinciding with the centenary of the American Sociological Association, it provides little-known background information to the development of the field. A first section highlights tensions between impartial scientific sociology and scientific social reform. A second section uncovers the experiences of female African American and Latino pioneers in the field as well as a sociologist from a religious minority. A third section traces the organizational history of the field, including gendered, racial, regional, and outsider perspectives. A final section focuses on several neglected trajectories. With this volume, American sociology can be seen in its full context. Globalization and Global History Barry K. Gills, William R. Thompson, 2006 Globalization and Global History argues that globalization is not an exotic and new phenomenon. Instead, it emphasizes that globalization is something that has been with us as long as there have been people who are both interdependent and aware of that fact. Studying globalization from the vantage point of long-term global history permits theoretical and empirical investigation, allowing the authors collected to assess the extent of ongoing transformations and to compare them to earlier iterations. With this historical advantage, the extent of ongoing changes which previously appeared unprecedented can be contrasted to similar episodes in the past. The book is divided into three sections. The first focuses on how globalization has been written about from a historical perspective. The second part advances three different takes on how best to view globalization from a very long-term stance. The final section continues this interpretative thread by examining more narrow aspects of globalization processes, ranging from incorporation processes to systemic disruptions. *Sui-Tang China and Its Turko-Mongol Neighbors* Jonathan Karam Skaff, 2012-08-23 A comparative history that reconsiders China's relations with the rest of Eurasia, *Sui-Tang China and Its Turko-Mongol Neighbors* challenges the notion that inhabitants of medieval China and Mongolia were irreconcilably different from each other. **The World System** Barry Gills, Andre Gunder Frank, 2014-04-04 The historic long-term economic interconnections of the world are now universally accepted. The idea of the economic world system advanced by Immanuel Wallerstein has set the period of linkage in the early modern period, but Andre Gunder Frank and Barry K. Gills think that this date is much too late. They argue an interconnection going back as much as 5000 years. In *The World System*, leading academics examine this issue in a debate contributed to by William H. McNeill and Immanuel Wallerstein among others. *Trade, Commerce, and the State in the Roman World* Andrew Wilson, Alan K. Bowman, 2018 In this volume, papers by leading Roman historians and archaeologists discuss trade within the Roman Empire and beyond its frontiers between c. 100 BC and AD 350, focusing especially on the role of the Roman state in shaping the institutional framework for trade. As part of a novel interdisciplinary approach to the

subject the chapters address its myriad facets on the basis of broadly different sources of evidence historical papyrological and archaeological demonstrating how collaborations with the elite holders of wealth within the empire fundamentally changed its political character in the longer term

Core/periphery Relations In Precapitalist Worlds Christopher Chase-Dunn, 2019-04-05 This book demonstrates that Immanuel Wallerstein's reluctance to apply core and periphery to precapitalist transformations is a product of the way he views the luxury trade It utilizes the study of different kinds of world systems to explore how logics of social reproduction become transformed

The Great Wall of China Arthur Waldron, 1990-07-27 This is the first full scholarly study of the Great Wall of China to appear in any language and it challenges many deeply held ideas about Chinese history Drawing both on primary sources and on the latest archaeology the book first demonstrates that the standard account of the Great Wall is untrue and misleading and then presents a convincing new account It begins by tracing the various walls and systems of frontier defences that existed in early Chinese history and shows how the greatest of these achieved a mythical symbolic stature which long survived the Wall itself A striking concluding chapter traces how the true history of the Wall was lost in the early twentieth century as it was gradually transformed into a Chinese national symbol explained through historical myth The book is an important contribution to the history of China's defensive policy and her ideological attitudes and will be of interest both to students of Chinese history and of international relations in the pre modern world
