breaking piece of work and exposes the missing link in theories of male superiority From the ancient world to modern times the possession of semen has provided proof for the superiority of the male Woman was a mistake of nature a misbegotten man a failed male Christianity absorbed these ideas into its sexual theology and the influence of Christian thought in the Western world especially on matters of sexuality cannot be denied The ancient truths about woman as a failed male and man as superior continue to exist and have meaning The three main world religions are complicit in this In light of current knowledge to continue with this discredited theology of semen is to sacrifice truth to the ideology of patriarchy *The*

Mission and Expansion of Christianity in the First Three Centuries Adolf von Harnack,1908 **Literature and Society in the Fourth Century AD** Lieve Van Hoof,Peter Van Nuffelen,2014-10-23 Late Antiquity is often assumed to have witnessed the demise of literature as a social force and its retreat into the school and the private reading room whereas the sophists of the Second Sophistic were influential social players their late antique counterparts are thought to have been overshadowed by bishops Literature and Society in the Fourth Century AD argues that this presumed difference should be attributed less to a fundamental change in the role of literature than to different scholarly methodologies with which Greek and Latin texts from the second and the fourth century are being studied Focusing on performance the literary construction of reality and self presentation this volume highlights how literature continued to play an important role in fourth century elite society

and Ancient Rome Simon Kiessling,2016-04-15 Mounting social inequality the increased political polarization and the republic s transformation into an empire of consumption these are just a few of the similarities between modern America and ancient Rome How does America relate to Europe and how did the Romans see their Greek colonies and vice versa The parallels are striking Is America likely to trace a comparable trajectory in the near future The Treasury of History ... New Edition, Revised and Brought Down to the Present Time Samuel MAUNDER,1856 Down from Olympus Suzanne L. Marchand,2003-01-26 In Down from Olympus Suzanne Marchand attempts to come to grips with German Graecophilia not as a private passion but as an institutionally generated and preserved cultural trope The book argues that nineteenth century

philhellenes inherited both an elitist normative aesthetics and an ascetic scholarly ethos from their Romantic predecessors German neohumanists promised to reconcile these intellectual commitments and by so doing to revitalize education and the arts Focusing on the history of classical archaeology Marchand shows how the injunction to imitate Greek art especially sculpture was made the basis for new state funded cultural institutions Tracing interactions between scholars and policymakers that made possible grand scale cultural feats like the acquisition of the Pergamum Altar she underscores both the gains in specialized knowledge and the failures in social responsibility that were the distinctive products of German neohumanism Most important Marchand traces the history of the study excavation and exhibition of Greek art as a means to confront the social cultural and political consequences of the specialization of scholarship in the last two centuries Although it emphasizes the persistence of ancient models Down from Olympus is very much a modern tale

The Upside of Down

Thomas Homer-Dixon, 2010-02-05 From the author of the 1 bestselling and Governor General's Literary Award winning The Ingenuity Gap an essential addition to the bookshelf of every thinking person with a stake in our world and our civilization This is a groundbreaking essential book for our times Thomas Homer Dixon brings to bear his formidable understanding of the urgent problems that confront our world to clarify their scope and deep causes The Upside of Down provides a vivid picture of the immense stresses that are simultaneously converging on our societies and threatening a breakdown that would profoundly shake civilization It shows too how we can choose a better route into the future With the immediacy that characterized his award winning international bestseller The Ingenuity Gap Homer Dixon takes us on a remarkable journey from the fall of the Roman empire to the devastation of the 9 11 attacks in New York from Toronto in the 2003 blackout to the ancient temples of Lebanon and the wildfires of California Incorporating the newest findings from an astonishing array of disciplines he argues that the great stresses our world is experiencing global warming energy scarcity population imbalances and widening gaps between rich and poor can't be looked at independently As these stresses combine and converge the risk of breakdown rises The first signs are appearing in the wastelands of the Arctic the mud clogged streets of Gona ves Haiti and the volatile regions of the Middle East and Asia But while the consequences of denial in our more perilous world are dire Homer Dixon makes clear that we can use our emerging understanding of the complex systems in which we live to avoid catastrophic collapse in a way the Roman empire could not This vitally important new book shows how in the face of breakdown we can still provide for the renewal of our global civilization We are creating the conditions for catastrophe but by understanding the underlying principles that make human and natural systems resilient and by working together to put those principles into effect we can still limit the severity of collapse and foster regeneration innovation and renewal
