## **Ron The Humanitarian:**

**Ron** L. Ron Hubbard, 1995      *Scientology* James R. Lewis, 2009-03-11 Scientology is arguably the most persistently controversial of all contemporary New Religious Movements James R Lewis has assembled an unusually comprehensive anthology incorporating a wide range of different approaches In this book a group of well known scholars of New Religious Movements offers an extensive and evenhanded overview and analysis of all of these aspects of Scientology including the controversies to which it continues to give rise      **Going Clear** Lawrence Wright, 2013-01-17 NATIONAL BESTSELLER NATIONAL BOOK AWARD AND NATIONAL BOOK CRITICS CIRCLE AWARD FINALIST From the Pulitzer Prize winning author of *The Looming Tower* comes an utterly necessary story The Wall Street Journal that pulls back the curtain on the church of Scientology one of the most secretive organizations at work today The Basis for the HBO Documentary *Scientology* presents itself as a scientific approach to spiritual enlightenment but its practices have long been shrouded in mystery Now Lawrence Wright armed with his investigative talents years of archival research and more than two hundred personal interviews with current and former Scientologists uncovers the inner workings of the church We meet founder L Ron Hubbard the highly imaginative but mentally troubled science fiction writer and his tough driven successor David Miscavige We go inside their specialized cosmology and language We learn about the church's legal attacks on the IRS its vindictive treatment of critics and its phenomenal wealth We see the church court celebrities such as Tom Cruise while consigning its clergy to hard labor under billion year contracts Through it all Wright asks what fundamentally comprises a religion and if Scientology in fact merits this Constitutionally protected label      *Humanitarian NGOs, (In)Security and Identity* Andrea Schneiker, 2016-03-09 Increasingly humanitarian NGOs operate in the context of armed conflicts where the security risks are higher than in contexts of natural disaster Working in Afghanistan Somalia Sudan South Sudan Pakistan and Sri Lanka is particularly dangerous for humanitarians This existential threat affects the physical existence of aid workers and the implementation of humanitarian programs and the core beliefs of humanitarians and the underlying principles of humanitarian action For NGOs it is difficult to accept that they are attacked despite their good intentions sometimes even by the very communities they seek to help For these reasons humanitarian NGOs have to change their approaches to security by not only adapting their policies procedures and structures to the changing environment but also reviewing the underlying principles of their work This book contributes to debates by demonstrating how issues of insecurity affect humanitarian NGOs and the humanitarian identity situating the structural changes within the humanitarian NGO community in the context of conflict aid governance and explains how non state actors establish their own governance structures independent from state sponsored solutions and contributes to the emerging literature on the redefinition of the concept of epistemic communities      **Going Clear (Enhanced Edition)** Lawrence Wright, 2013-01-17 National Book Award Finalist The enhanced eBook edition of Lawrence Wright's revelatory study of Scientology includes additional photographs and

documents plus more than thirty minutes of original video taped interviews with former members of the church speaking about what drew them to Scientology and about discovering past lives the church s position on abortion and homosexuality and how the Guardian s Office functions and in interviews with the author Lawrence Wright speaks about his aims in writing this book his respect for his sources and methods of research A clear sighted revelation a deep penetration into the world of Scientology by Pulitzer Prize winning author of *The Looming Tower* the now classic study of al Qaeda s 9 11 attack Based on more than two hundred personal interviews with current and former Scientologists both famous and less well known and years of archival research Lawrence Wright uses his extraordinary investigative ability to uncover for us the inner workings of the Church of Scientology At the book s center two men whom Wright brings vividly to life showing how they have made Scientology what it is today The darkly brilliant science fiction writer L Ron Hubbard whose restless expansive mind invented a new religion And his successor David Miscavige tough and driven with the unenviable task of preserving the church after the death of Hubbard We learn about Scientology s complicated cosmology and special language We see the ways in which the church pursues celebrities such as Tom Cruise and John Travolta and how such stars are used to advance the church s goals And we meet the young idealists who have joined the Sea Org the church s clergy signing up with a billion year contract In *Going Clear* Wright examines what fundamentally makes a religion a religion and whether Scientology is in fact deserving of this constitutional protection Employing all his exceptional journalistic skills of observation understanding and shaping a story into a compelling narrative Lawrence Wright has given us an evenhanded yet keenly incisive book that reveals the very essence of what makes Scientology the institution it is     *Humanitarian Economics* Gilles Carbonnier,2015 Tackles difficult and concrete issues such as how the economics of war and terrorism inform humanitarians negotiations with combatants     **California. Court of Appeal (2nd Appellate District). Records and Briefs** California (State)., Received document entitled EXHIBITS IN SUPPORT OF PETITION FOR WRIT     **The Art of Emergency** Chérie Rivers Ndaliko,Samuel Anderson,2020-01-03 *The Art of Emergency* charts the maneuvers of art through conflict zones across the African continent Advancing diverse models for artistic and humanitarian alliance the volume urges conscientious deliberation on the role of aesthetics in crisis through intellectual engagement artistic innovation and administrative policy Across Africa artists increasingly turn to NGO sponsorship in pursuit of greater influence and funding while simultaneously NGOs both international and local commission arts projects to buttress their interventions and achieve greater reach and marketability The key values of artistic expression thus become healing and sensitization measured in turn by impact and effectiveness Such rubrics obscure the aesthetic complexities of the artworks and the power dynamics that inform their production Clashes arise as foreign NGOs import foreign aesthetic models and preconceptions about their efficacy alongside foreign interpretations of politics medicine psychology trauma memorialization and so on Meanwhile each community embraces its own aesthetic precedents often at odds with the intentions of humanitarian agencies The arts are a sphere in

which different worldviews enter into conflict and conversation To tackle the consequences of aid agency arts deployment volume editors Samuel Mark Anderson and Ch rie Rivers Ndaliko assemble ten case studies from across the African continent employing multiple media including music sculpture photography drama storytelling ritual and protest marches Organized under three widespread yet under analyzed objectives for arts in emergency demonstration distribution and remediation each case offers a different disciplinary and methodological perspective on a common complication in NGO sponsored creativity By shifting the discourse on arts activism away from fixations on message and toward diverse investigations of aesthetics and power negotiations The Art of Emergency brings into focus the conscious and unconscious configurations of humanitarian activism the social lives it attempts to engage and the often fraught interactions between the two

**Dangerous Sanctuaries** Sarah Kenyon Lischer,2005 Since the early 1990s refugee crises in the Balkans Central Africa the Middle East and West Africa have led to the spread of civil war To understand the role of refugees in the spread of conflict this text systematically compares violent and nonviolent crises involving Afghan Bosnian Rwandan refugees **Aid in Danger** Larissa Fast,2014-05-14 Humanitarian aid workers increasingly remain present in contexts of violence and are injured kidnapped and killed as a result Since 9 11 and in response to these dangers aid organizations have fortified themselves to shield their staff and programs from outside threats In Aid in Danger Larissa Fast critically examines the causes of violence against aid workers and the consequences of the approaches aid agencies use to protect themselves from attack Based on more than a decade of research Aid in Danger explores the assumptions underpinning existing explanations of and responses to violence against aid workers According to Fast most explanations of attacks locate the causes externally and maintain an image of aid workers as an exceptional category of civilians The resulting approaches to security rely on separation and fortification and alienate aid workers from those in need representing both a symptom and a cause of crisis in the humanitarian system Missing from most analyses are the internal vulnerabilities exemplified in the everyday decisions and ordinary human frailties and organizational mistakes that sometimes contribute to the conditions leading to violence This oversight contributes to the normalization of danger in aid work and undermines the humanitarian ethos As an alternative Fast proposes a relational framework that captures both external threats and internal vulnerabilities By uncovering overlooked causes of violence Aid in Danger offers a unique perspective on the challenges of providing aid in perilous settings and on the prospects of reforming the system in service of core humanitarian values Clinical Research for the Doctor of Nursing Practice Allison J. Terry,2011-05-27 **Among the Scientologists** Donald A. Westbrook,2019 The Church of Scientology is one of the most recognizable American born new religions but perhaps the least understood With academic and popular interest on the rise many books have been written about Scientology and surely more will follow Although academics have begun to pay more attention to Scientology the subject has received remarkably little qualitative attention Indeed no work has systematically addressed such questions as what do Scientologists themselves have to say

about their religion's history, theology and practices. How does Scientology act as a religion for them? What does lived religion look like for a Scientologist? This is not so much a book about the Church of Scientology, its leaders or its controversies as it is a compilation of narratives and histories based on the largely unheard or ignored perspectives of Scientologists themselves. Drawing on six years of interviews, fieldwork and research conducted among members of the Church of Scientology, this groundbreaking work examines features of the new religion's history, theology and praxis in ways that move discussion beyond apostate-driven and expos accounts.

**Sword & Salve** Peter J. Hoffman, Thomas G. Weiss, 2006-03-03 Arguing forcefully that changing times are a clarion call for new thinking, this book convincingly shows that if humanitarian organizations continue to operate as they have in the past, they will fail to help the very victims whom they try to save. Focusing especially on the emergence of new wars, Hoffman and Weiss insist that humanitarian organizations must recognize that they live in a political world and that their actions and goals are invariably affected by military action. The brand of warfare that erupted in the 1990s, marked by civil or transnational armed conflicts featuring potent non-state actors, altered political economies, a high proportion of civilian casualties and a globalized media produced horrors that shocked consciences and led humanitarian agencies to question their unyielding stance of neutrality and impartiality. Indeed, in a departure from earlier norms and practices, some have reinvented their policies and tools and created new humanitarianisms. This authoritative book traces the evolution of the international humanitarian system from its inception in the 1860s, parses the dynamics of war and emergency response from the 1980s through the current disasters in Afghanistan and Iraq and provides a strategic roadmap for practitioners. By bringing historical perspective to bear, this volume provides an invaluable analytical framework for grasping the nature of humanitarian crises and how agencies can respond strategically rather than reactively to change. Students will find its blend of clearly presented theory and case studies a powerful tool for understanding the roles of state and non-state actors in international relations. By charting the tides of continuity and change, this book will prepare agencies to dodge both figurative and actual bullets that threaten humanitarian action at the outset of the millennium.

**Biopolitics, Governmentality and Humanitarianism** Volha Piotukh, 2015-04-10 This book critically analyses the changing role and nature of post-Cold War humanitarianism using Foucault's theories of biopolitics and governmentality. It offers a compelling and insightful interpretation of the policies and practices associated with new humanitarianism in general, as well as of the dynamics of two specific international assistance efforts: the post-2001 conflict-related assistance effort in Afghanistan and the post-2000 Chernobyl-related assistance effort in Belarus. The central argument of the book is that new humanitarianism represents a dominant regime of humanitarian governing informed by globalising neoliberalism and is reliant on a complex set of biopolitical disciplinary and sovereign technologies. It demonstrates that while the purposes of humanitarian governing are specific to particular contexts, its promise of care is more often than not accompanied by sovereign and/or biopolitical violences. Making an important contribution to existing scholarship on humanitarian

emergencies and humanitarian action on biopolitics and governmentality this book will be of much interest to students and scholars of humanitarianism critical security studies governmentality and International Relations generally *The Media and Aid in Sub-Saharan Africa* Lena von Naso, 2018-02-05 News coverage on Africa is closely connected not only with how Western audiences see the continent but also with how a wide Western audience builds its opinion on issues that carry consequences for the public and governments support and policy towards development aid The Western media reinforce a picture of a continent that drowns in chaos is dominated by conflicts diseases corruption and failed democratisation Whose interests lie behind that How does foreign news on sub Saharan Africa emerge which actors are relevant in its making and on the basis of what interests do these actors shape the coverage that is then presented as neutral information to a broad international audience Closely examining the relationship between foreign correspondents of international news media and humanitarian organisations Lena von Naso shows how the aid and media sectors cooperate in Africa in a unique way Based on more than 70 interviews with foreign correspondents and aid workers operating across Africa the book argues that the changing nature of foreign news and of aid is forcing them to form a deep co dependency that is having a serious and largely unnoticed effect on Western news coverage This comprehensive examination of a new paradigm will interest students and scholars of media and journalism African studies development and humanitarian studies and the aid and media communities operating across Africa *The Biafran Humanitarian Crisis, 1967-1970* Arua Oko Omaka, 2016-09-30 This book focuses on the Biafran humanitarian crisis of 1967-1970 which generated a surge of human rights anxieties and attracted the attention of world humanitarian organizations For the first time in recent history different church groups and humanitarian activists around the world came together for the sole purpose of alleviating human suffering and saving lives regardless of theological differences race ethnic affiliation nationality and geographical distance Despite their role in shaping the course and outcome of the conflict most scholars of the Nigeria Biafra War treat the humanitarian aspect of the war as a footnote making it appear less important among other issues of interest in the conflict Notable exceptions however include Joseph Thomson's *American Policy and African Famine* which focuses on American policy on the humanitarian aid and Reverend Tony Byrne's *Airlift to Biafra* This study underlines that the international humanitarian aid largely contributed to the internationalization of the war The efforts of the churches from thirty three countries which remain virtually unexplored was not just the first of its kind in the developing world but also the largest civilian airlift in history While the paucity of scholarship on the humanitarian aspect of the Biafra war could be attributed to the newness of this field of enquiry the increase in conflicts in different parts of the world has just opened humanitarian aid studies as a new frontier in academic study This book is a masterful example of scholarship in this newly emergent field **Humanitarianism and Challenges of Cooperation** Volker Heins, Kai Koddenbrock, Christine Unrau, 2016-02-05 Humanitarianism as a moral concept and an organized practice has become a major factor in world society It channels an enormous amount of resources and serves as an argument for

different kinds of interference into the internal affairs of countries and regions At the same time and for these very reasons it is an ideal testing ground for successful and unsuccessful cooperation across borders Humanitarianism and the Challenges of Cooperation examines the multiple humanitarianisms of today as a testing ground for new ways of global cooperation General trends in the contemporary transformation of humanitarianism are studied and individual cases of how humanitarian actors cooperate with others on the ground are investigated This book offers a highly innovative empirically informed account of global humanitarianism from the point of view of cooperation research in which internationally renowned contributors analyse broad trends and present case studies based on meticulous fieldwork This book will be of great interest to students and researchers in the areas of political science international relations and humanitarianism It is also a valuable resource for humanitarian aid workers
