Baluska,Milada Ciamporová,Otília Gasparíková,Peter W. Barlow,2013-11-11 In 1971 the late Dr J Kolek of the Institute of Botany Bratislava organized the first International Symposium devoted exclusively to plant roots At that time perhaps only a few of the participants gathered together in Tatranska Lomnica sensed that a new era of root meetings was beginning Nevertheless it is now clear that Dr Kolek s action undertaken with his characteristic enormous enthusiasm was rather pioneering for it started a series a similar meetings Moreover what was rather exceptional at the time was the fact that the meeting was devoted to the functioning of just a single organ the root One possible reason for the unexpected success of the original perhaps naive idea of a Root Symposium might lie with the fact that plant roots have always been extremely popular as experimental material for cytologists biochemists and physiologists whishing to probe processes as diverse as cell division and solute transport Of course the connection of roots with the rest of the plant is not forgotten either This wide variety of disciplines is now coupled with the development of increasingly sophisticated experimental techniques to study some of these old problems These factors undoubtedly contribute to the necessity of continuing the tradition of the root symposia The common theme of root function gives in addition a certain unity to all these diverse activities   **American Journal of Physiology** ,1915 Vols for 1898 1941 1948 56 include the Society s proceedings primarily abstracts of papers presented at the 10th 53rd annual meetings and the 1948 56 fall meetings   Mathematics of Program Construction Jan L.A. van de Snepscheut,1989-06-07 The papers included in this volume were presented at the Conference on Mathematics of Program Construction held from June 26 to 30 1989 The conference was organized by the Department of Computing Science Groningen University The Netherlands at the occasion of the University s 375th anniversary The creative inspiration of the modern computer has led to the development of new mathematics the mathematics of program construction Initially concerned with the posterior verification of computer programs the mathematics have now matured to the point where they are actively being used for the discovery of elegant solutions to new programming problems Initially concerned specifically with imperative programming the application of mathematical methodologies is now established as an essential part of all programming paradigms functional logic and object oriented programming modularity and type structure etc Initially concerned with software only the mathematics are also finding fruit in hardware design so that the traditional boundaries between the two disciplines have become blurred The varieties of mathematics of program construction are wide ranging They include calculi for the specification of sequential and concurrent programs program transformation and analysis methodologies and formal

inference systems for the construction and analysis of programs The mathematics of specification implementation and analysis have become indispensable tools for practical programming **Multiple Dwelling and Tourism** Norman McIntyre,Daniel Williams,Kevin McHugh,2006 The movement of people goods capital and information is a central aspect of living in the inter connected globalised late modern world Although this broader view of mobility is recognized this book focuses mainly on migration or the movement of people It examines multiple dwelling as a societal response to the major influences of increased mobility and amenity tourism The book also considers the modern day meaning of multiple dwelling how it affects personal identity and the meaning of home and its impacts on host communities and landscapes The American Polytechnic Journal ,1853 **Trees** P. A. Thomas,2000-02-13 Trees are familiar components of many landscapes vital to the healthy functioning of the global ecosystem and unparalled in the range of materials which they provide for human use Yet how much do we really understand about how they work This 2000 book provides a comprehensive introduction to the natural history of trees presenting information on all aspects of tree biology and ecology in an easy to read and concise text Fascinating insights into the workings of these everyday plants are uncovered throughout the book with questions such as how are trees designed how do they grow and reproduce and why do they eventually die tackled in an illuminating way Written for a non technical audience the book is nonetheless rigorous in its treatment and will therefore provide a valuable source of reference for beginning students as well as those with a less formal interest in this fascinating group of plants **Therapeutic Gazette** ,1911 *ECOOP 2004 - Object-Oriented Programming* Martin Odersky,2004-06-08 This book constitutes the refereed proceedings of the 18th European Conference on Object Oriented Programming ECOOP 2004 held in Oslo Norway in June 2004 The 25 revised full papers presented together with the abstracts of 2 invited talks were carefully reviewed and selected from a total of 132 submissions The papers are organized in topical sections on encapsulation program analysis software engineering aspects middleware types verification and systems **Acadia Trails Treatment Plans** Christian S. Barter,2006-05-15 This report represents the second volume of the Cultural Landscape Report CLR for the Historic Hiking Trail System of Mount Desert Island This volume focuses more specifically on the 103 marked maintained trails within the park which extend over 118 miles See Appendix B This report is the culmination of several years of research analysis field inventory and documentation necessary to synthesize voluminous information about the island s extensive trail system The intended audience for this document includes individuals who are extremely familiar with Acadia s trails and are involved in the planning process as well as those who may be unfamiliar with the trail system and or trail construction in general but may be involved in future trail rehabilitation efforts As a result this document relies heavily on graphics to complement and enhance the narrative Numerous photographs and sketches are included to clarify the text illustrate historic and existing conditions and provide examples of both acceptable and unacceptable usage of specific trail features **Control Strategies for Dynamic Systems** John H. Lumkes, Jr.,2001-12-13

Presenting a unified modeling approach to demonstrate the common components inherent in all physical systems Control Strategies for Dynamic Systems comprehensively covers the theory design and implementation of analog digital and advanced control systems for electronic aeronautical automotive and industrial applications Detailing advanced tools and strategies used to analyze controller performance the book summarizes hardware and software utilization frequency response and root locus methods the evaluation of PID phase lag and phase lead controllers and the effect of disturbances and command inputs on steady state errors It also includes numerous case studies and MATLAB examples
