American Psychiatry After World War II (1944-1994) Roy W. Menninger, John C. Nemiah, 2008-11-01 The history of psychiatry is complex reflecting diverse origins in mythology cult beliefs astrology early medicine law religion philosophy and politics This complexity has generated considerable debate and an increasing outflow of historical scholarship ranging from the enthusiastic meliorism of pre World War II histories to the iconoclastic revisionism of the 1960s to more focused studies such as the history of asylums and the validity and efficacy of Freudian theory This volume intended as a successor to the centennial history of American psychiatry

published by the American Psychiatric Association in 1944 summarizes the significant events and processes of the half century following World War II. Most of this history is written by clinicians who were central figures in it. In broad terms the history of psychiatry after the war can be viewed as the story of a cycling sequence shifting from a predominantly biological to a psychodynamic perspective and back again, all presumably en route to an ultimate view that is truly integrated and interacting all the while with public perceptions, expectations, exasperations and disappointments. In six sections, Drs Roy Menninger and John Nemiah and their colleagues cover both the continuities and the dramatic changes of this period. The first four sections of the book are roughly chronological. The first section focuses on the war and its impact on psychiatry; the second reviews postwar growth of the field; psychoanalysis and psychotherapy; psychiatric education and psychosomatic medicine; the third recounts the rise of scientific empiricism; biological psychiatry and nosology; and the fourth discusses public attitudes and perceptions of public mental health policy, deinstitutionalization, antipsychiatry, the consumer movement and managed care. The fifth section examines the development of specialization and differentiation exemplified by child and adolescent psychiatry, geriatric psychiatry, addiction psychiatry and forensic psychiatry. The concluding section examines ethics and women and minorities in psychiatry. Anyone interested in psychiatry will find this book a fascinating read.

Cullen, Pamela Wilcox, 2010-09-23 Consistently excellent. The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond. Adam Tocock Reference Reviews In discussing a criminology topic, lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on as if assuming their student audience possesses the necessary background to appreciate and integrate the reference. However, university reference librarians can tell you this is often far from the case. Students often approach them seeking a source to provide a quick overview of a particular theory or theorist.

with just the basics the who what where how and why if you will And reference librarians often find it difficult to guide these students to a quick one stop source In response SAGE Reference is publishing the two volume Encyclopedia of Criminological Theory available in both print and electronic formats This serves as a reference source for anyone interested in the roots of contemporary criminological theory Drawing together a team of international scholars it examines the global landscape of all the key theories and the theorists behind them presenting them in the context needed to understand their strengths and weaknesses In addition to interpretations of long established theories it also offers essays on cutting edge research as one might find in a handbook And like an unabridged dictionary it provides concise to the point definitions of key concepts ideas schools and figures Coverage will include contexts and concepts in criminological theory the social construction of crime policy implications of theory diversity and intercultural contexts conflict theory rational choice theories conservative criminology feminist theory
