The Buddhist Roots of Zhu Xi's Philosophical Thought John Makeham, 2018-06-01 Zhu Xi 1130-1200 is the most influential Neo Confucian philosopher and arguably the most important Chinese philosopher of the past millennium both in terms of his legacy and for the sophistication of his systematic philosophy. The Buddhist Roots of Zhu Xi's Philosophical Thought combines in a single study two major areas of Chinese philosophy that are rarely tackled together: Chinese Buddhist philosophy and Zhu Xi's Neo Confucian philosophy. Despite Zhu Xi's importance as a philosopher, the role of Buddhist thought and philosophy in the construction of his systematic philosophy remains poorly understood. What aspects of Buddhism did he criticize and why? Was his engagement limited to criticism informed or otherwise, or did Zhu also appropriate and repurpose Buddhist ideas to develop his own thought? If Zhu's philosophical repertoire incorporated conceptual structures and problematics that are marked by a distinct Buddhist pedigree, what implications does this have for our understanding of his philosophical project? The five chapters that make up *The Buddhist Roots of Zhu Xi's Philosophical Thought* present a rich and complex portrait of the Buddhist roots of Zhu Xi's philosophical thought. The scholarship is meticulous, the analysis is rigorous, and the philosophical insights are fresh. Collectively, the chapters illuminate a greatly expanded range of the intellectual resources Zhu incorporated into his philosophical thought, demonstrating the vital role that models derived from Buddhism played in his philosophical repertoire. In doing so, they provide new perspectives on what Zhu Xi was trying to achieve as a philosopher by repurposing ideas from Buddhism. They also make significant and original contributions to our understanding of core concepts, debates, and conceptual structures that shaped the development of philosophy in East Asia over the past millennium.

Humanistic Geography (RLE Social & Cultural Geography) David Ley, Marwyn Samuels, 2014-01-23 Humanistic geography now has an established position in the intellectual development of contemporary geography. However, there has so far been little attempt to draw together the humanistic approach in one broad statement. This book, by the leading figures in the field, provides a platform for the exposition of humanistic geography in all its aspects.

*Adalberto Ortiz* Marvin A. Lewis, 2014-02-14 Pablo Adalberto Ortiz Quiñones 1914-2002 was one of the most gifted writers in Ecuador and all of Latin America. Yet outside of Ecuador and amongst Afro-Hispanic literature scholars in the United States, little critical attention has been given to this pioneer whose multi-genre contributions spanned decades. In his writings, Ortiz explores some of the defining social issues in the Americas since the African and European encounters with the New World, including the notion of race. He articulates a complex process of affirming the ethnic while not denying the national. Consequently, miscegenation, a biological process as well as acculturation, are motifs in his writings which explore the essence of what it means to be Ecuadorian. Ortiz does not dwell upon the so-called race question, the issue that causes such anxiety and hostility overtly and covertly in the United States. Rather, he explores in depth ethnicity, class, and caste in his earlier writings and evolves into an international writer while

maintaining a strong black awareness Adalberto Ortiz's transcendence of victimization to a broader view of the world is indicative of the title of Marvin A Lewis analysis from margin to center and reflective of the approach taken by many Afro Hispanic writers The dialectical nature of Ortiz's writings makes his work particularly interesting and rewarding as revealed in Adalberto Ortiz From Margin to Center In this book Lewis examines the form and content relationships between works published during different literary periods and movements Emphasis is placed on Ortiz's transition from the local to the international in each genre and the theoretical approach is eclectic depending upon the exigencies of the texts Ecocriticism post colonialism post modernism and other methodologies addressing the environment place displacement identity and historiographic metafiction are fundamental to the Lewis readings of Ortiz's prose and poetry **Embedded Grace** Kevin M. Vander Schel, 2013-11-01 Scholars are now at work not only rethinking Schleiermachers relation to the modern and contemporary theological tradition but re-examining the dogmatic intricacies and commitments within his texts Situated within this revisionist milieu the author takes up the important issue of the coordination of grace and history in Schleiermacher arguing for its significance in understanding the dynamics of Schleiermachers dogmatics and its grounding and realization in Christology Teaching about Scientific Origins Leslie Sandra Jones, Michael Jonathan Reiss, 2007 Persistent resistance to the teaching of evolution has so drastically impacted science curricula that many students finish school without a basic understanding of a theory that is a fundamental component of scientific literacy This evolution creationism controversy has crippled biological education in the United States and has begun to spread to other parts of the world This book takes an educational point of view that respects both the teaching of evolution and religious beliefs Authors from different academic traditions contribute to a collection of perspectives that begin to dismantle the notion that religion and science are necessarily incompatible *Aesthetic Origins* Jay Patrick Starliper, 2017-07-28 While it is gaining in academic prominence discussion of the imagination is too often neglected Society is dangerously unaware of the intimate relationship between culture and politics ethics and aesthetics Challenging this Jay Patrick Starliper examines the imagination through the lens of the work of Peter Viereck and other likeminded thinkers The result is a philosophical deconstruction that demonstrates why books are bullets In 1941 before Nazi barbarism was public knowledge a young Peter Viereck published *Metapolitics* From Wagner and the German Romantics to Hitler In it Viereck attacked the diabolical spiritual foundations of National Socialism He made the ostensibly absurd claim that a certain shade of romanticism was the ethical foundation of a German revolt against decency According to Viereck Nazism was the culmination of over a century and a half of bad culture the result of an idyllic imagination Starliper warns that the same diseased imagination that culminated in gas chambers and guillotines is subtly affecting the way millions of people view the world today and that without the inspiration of an elevated aesthetic civilization will not survive In the spirit of Edmund Burke and Irving Babbitt Viereck's insight into the ethical and political force of aesthetics provides a much needed critique of contemporary

civilization      **Theology and the University** Fáinche Ryan, Dirk Ansorge, Josef Quitterer, 2024-04-01 Theology and the University presents a compelling argument as to why theology still matters. It considers how theology has been marginalised in the academy and in public life, arguing that doing so has serious repercussions for the integrity of the academic study of religion. The chapters in this book demonstrate how theology, as the only discipline which represents religion from within, provides insight into aspects of religion which are hidden from the social sciences. Against a backdrop of heated debates on the role of the humanities in the university, the book highlights the specific contribution of theological education and research to the work of a university, providing essential information for academic and social political decision making. Whilst the book has an emphasis on the Catholic tradition, it explores the prospect of fruitful complementarity and interdisciplinarity both with secularised studies of religion and other disciplines in the university, such as literature, philosophy and the social sciences. This book provides orientation for decision makers, particularly those concerned with the broader question of humanities in the university, students in their choice of study, those interested in the wellbeing of today's universities, and ecclesial authorities seeking to form leaders capable of intelligent responses to the issues of contemporary society. It is a must read for all researchers of theology, as well as anyone interested in the role of the humanities more broadly.      **The Mystery of Christ** Thomas Keating, 2023-01-19 Following upon *Open Mind, Open Heart* which presents a profound formation in Christian prayer, this book demonstrates the contemplative dimension of Christian worship. Here Father Keating recovers the deeper sense of the liturgical year and shares a theological and mystical perspective on the major feasts of the annual cycle. The reader is immersed in the wonder of faith in the mystery of Christ and of the unique nature of God's action and presence in and through the liturgy of our lives.      **Postmodern Philosophy and the Scientific Turn** Dorothea E. Olkowski, 2012-04-23 A groundbreaking interdisciplinary approach to the study of consciousness. Beautifully written, engaging throughout, and captivating. Claire Colebrook, The Pennsylvania State University. What can come of a scientific engagement with postmodern philosophy? Some scientists have claimed that the social sciences and humanities have nothing to contribute except perhaps peripherally to their research. Dorothea E. Olkowski shows that mathematics itself, the historic link between science and philosophy, plays a fundamental role in the development of the worldviews that drive both fields. Focusing on language, its usage and expression of worldview, she develops a phenomenological account of human thought and action to explicate the role of philosophy in the sciences. Olkowski proposes a model of phenomenology, both scientific and philosophical, that helps make sense of reality and composes an ethics for dealing with unpredictability in our world.
