Roots Of Consciousness:

The Roots of Consciousness Jeffrey Mishlove, 1993 The title for *The Roots of Consciousness* was inspired by a statement of cosmologist Arthur M Young who cautioned against seeking only the flowers of consciousness such as clairvoyance and telepathy considering them no more than the intriguing foliage of psychology Author Jeffrey Mishlove however believes that these and other psychic powers are not just for show but are rooted in the essential core of our existence Throughout the book Mishlove presents the viewpoints of both believers and nonbelievers as a further means of introducing the language and concepts of psychic functioning

The Roots of Consciousness David Clarence MacClelland, 1964 **The Roots of Consciousness** David C. McClelland, 1993-12-01 *The Roots of Consciousness* David Clarence McClelland, 1964 **The Roots of Jewish Consciousness, Volume Two** Erich Neumann, 2019-04-24 *The Roots of Jewish Consciousness Volume Two* Hasidism is the second volume fully annotated of a major previously unpublished two part work by Erich Neumann 1905 1960 It was written between 1940 and 1945 after Neumann then a young philosopher and physician and freshly trained as a disciple of Jung fled Berlin to settle in Tel Aviv He finished this work at the end of World War II Although he never published it he kept it the rest of his life Volume Two Hasidism is devoted to the psychological and spiritual wisdom embodied in Jewish spiritual tradition Relying on Jung's concepts and Buber's Hasidic interpretations Neumann seeks alternatives to the legalism and anti feminine bias that he says have dominated collective Judaism since the Second Temple He argues that modern Jews can develop psychological wholeness through an appropriation of Hasidic legends Talmudic texts and Kabbalistic mysteries including especially the Zohar Exclusively this volume includes a foreword by Moshe Idel An appendix Neumann's four lecture series from the 1940s gives a glimpse of his intended unpublished Part Three These volumes anticipate Neumann's later works including *Depth Psychology* and *a New Ethic The Origins and History of Consciousness and The Great Mother* In Volume Two Hasidism his concept of the ego Self axis is developed in clearly psychological terms Four previously unpublished essays appended to Volume Two illustrate Neumann's developmental psychology including his theme of primary and secondary personalization This unique work will appeal to Jungian analysts and psychotherapists in training and in practice historians of psychology Jewish scholars biblical historians teachers of comparative religion as well as academics and students

The Roots of Consciousness Jeffrey Mishlove, 1975 *Conscious Life* John S. Torday, Rob G. Sacco, 2025-07-17 Understanding consciousness is the most important scientific principle left to be understood That is particularly true with the ready availability of software for Artificial Intelligence The conventional way of thinking about evolution is focused on materiality whereas a true understanding of evolution can only be understood by re focusing on the flow of energy in service to Symbiogenesis This book focuses on the role of quantum mechanics in the process of evolution based on the perspective of energy flow rather than the description of biologic materiality A basic understanding of that frame shift is comparable to the Periodic Table of Elements showing the interrelationship between the alchemical description

of matter and its energetic origin in the Big Bang Based on the author's earlier works going back 25 years regarding the role of cell-cell communication in development and speciation this book is designed to encourage an across space-time perspective on how and why we have evolved Energy and Evolution posits that the flow of energy is the primary force driving evolution in our Universe This perspective offers a superior framework for understanding biological complexity and environmental adaptability Evolution is presented not as a series of random mutations and adaptations but as a cohesive and purposeful progression toward enhanced communication and efficiency within and between organisms Central to this thesis are symbiogenesis and quantum entanglement which highlight the Universe's interconnectedness and emphasize collaboration and energy synergy over Darwinian competition The book explores the Fibonacci sequence and the golden ratio as self-organizing principles inherent in complex systems ranging from the micro to the macro from the periodic table to the cosmos and even in consciousness human development and aging Fibonacci spirals are described as symbolizing the constant oscillation between conscious and unconscious states akin to the balance between gravitational and radiant forces While speculative and ambitious in scope Energy and Evolution represents a sincere effort to integrate mathematics cosmology biology consciousness research and modern physics into a comprehensive theory that holds profound implications for understanding humanity's origins and future paths Diane Hennacy Powell MD Author of *The ESP Enigma A Scientific Case for Psychic Phenomena*

The Origins And History Of Consciousness Erich Neumann, 2015-12-22 *The Origins and History of Consciousness* draws on a full range of world mythology to show how individual consciousness undergoes the same archetypal stages of development as human consciousness as a whole Erich Neumann was one of C G Jung's most creative students and a renowned practitioner of analytical psychology in his own right In this influential book Neumann shows how the stages begin and end with the symbol of the Uroboros the tail-eating serpent The intermediate stages are projected in the universal myths of the World Creation Great Mother Separation of the World Parents Birth of the Hero Slaying of the Dragon Rescue of the Captive and Transformation and Deification of the Hero Throughout the sequence the Hero is the evolving ego consciousness Featuring a foreword by Jung this Princeton Classics edition introduces a new generation of readers to this eloquent and enduring work

Roots of Consciousness David C. McClelland, 1987-12-01 *The Origin of Consciousness in the Breakdown of the Bicameral Mind* Julian Jaynes, 1976 What is human consciousness where did it come from and how does it determine who we are and how we live in the world At the heart of this book is the theory that human consciousness did not develop over time that in fact ancient peoples from Mesopotamia to Peru did not think as we do and therefore were not conscious Drawing on laboratory studies of the brain and close examination of archaeological evidence the author concludes that consciousness is not a product of evolution but of catastrophic events in our own history events that occurred as recently as three thousand years ago

Intelligence and Wisdom Bing Song, 2021-09-08 This book centers on rethinking foundational values in the era of frontier technologies by tapping into the wisdom of Chinese philosophical traditions It tries to answer the

following questions How is the essence underpinning humans nature and machines changing in this age of frontier technologies What is the appropriate ethical framework for regulating human machine relationships What human values should be embedded in or learnt by AI Some interesting points emerged from the discussions For example the three dominant schools of Chinese thinking Confucianism Daoism and Buddhism invariably reflect non anthropocentric perspectives and none of them places humanity in a supreme position in the universe While many Chinese philosophers are not convinced by the prospect of machine intelligence exceeding that of humans the strong influence of non anthropocentrism in the Chinese thinking contributed to much less panic in China than in the West about the existential risks of AI The thinking is that as human beings have always lived with other forms of existence living with programs or other forms of beings which may become more capable than humans will not inevitably lead to a dystopia Second all three schools emphasize self restraint constant introspection and the pursuit of sage hood or enlightenment These views therefore see the potential risks posed by frontier technologies as an opportunity for the humanity to engage in introspection on the lessons learned from our social and political history It is long overdue that humanity shall rethink its foundational values to take into account a multi being planetary outlook This book consists of nine leading Chinese philosophers reflections on AI s impact on human nature and the human society This is a groundbreaking work which has pioneered the in depth intellectual exploration involving traditional Chinese philosophy and frontier technologies and has inspired multidisciplinary and across area studies on AI philosophy and ethical implications Chapters 1 3 5 7 and 10 are available open access under a Creative Commons Attribution NonCommercial NoDerivatives 4 0 International License via link.springer.com

Polanowski,Donald W. Sherburne,2012-02-01 This volume explores the range of Alfred North Whitehead s philosophy and his relevance to contemporary philosophical traditions While philosophers and theologians with only a passing acquaintance with Whitehead might think that his philosophy is unconnected to our Western philosophical tradition the contributors prove that nothing could be further from the truth The most respected scholars in the field George Allan Lisa Bellantoni John B Cobb Jr Frederick Ferr David L Hall William S Hamrick Robert Cummings Neville Janusz A Polanowski Patrick Shade and Donald W Sherburne illustrate points of connection between Whitehead s ideas to the following Descartes the so called Father of Modern Philosophy classical American thought several contemporary American thinkers including Richard Rorty and Alasdair MacIntyre aspects of European philosophy and current reflections upon the environment and technology **The Roots of consciousness** Jeffrey Mishlove,1977 **The Awakened Ones** Gananath Obeyesekere,2012 While a rational consciousness grasps many truths Gananath Obeyesekere believes an even richer knowledge is possible through a bold confrontation with the stuff of visions and dreams Spanning both Buddhist and European forms of visionary experience he fearlessly pursues the symbolic nonrational depths of such phenomena reawakening the intuitive creative impulses that power greater understanding Throughout his career Obeyesekere has combined psychoanalysis and anthropology to illuminate the relationship between personal symbolism and religious experience In this book he begins with Buddha s visionary trances wherein over the course of four hours he witnesses hundreds of thousands of his past births and eons of

world evolution renewal and disappearance He then connects this fracturing of empirical and visionary time to the realm of space considering the experience of a female Christian penitent who stares devotedly at a tiny crucifix only to see the space around it expand to mirror Christ's suffering Obeyesekere follows the unconscious motivations underlying rapture the fantastical consumption of Christ's body and blood and body mutilation and levitation bridging medieval Catholicism and the movements of early modern thought as reflected in William Blake's artistic visions and poetic dreams He develops the term dream ego through a discussion of visionary journeys Carl Jung's and Sigmund Freud's scientific dreaming and the cosmic and erotic dream visions of New Age virtuosos and he defines the parameters of a visionary mode of knowledge that provides a more elastic understanding of truth A career culminating work this volume translates the epistemology of Hindu and Buddhist thinkers for western audiences while revitalizing western philosophical and scientific inquiry
