Step Dancing in Ireland Catherine E. Foley, 2016-04-01 For many people step dancing is associated mainly with the Irish step dance stage shows Riverdance and Lord of the Dance which assisted both in promoting the dance form and in placing Ireland globally But in this book Catherine Foley illustrates that the practice and contexts of step dancing are much more complicated and fluid Tracing the trajectory of step dancing in Ireland she tells its story from roots in eighteenth century Ireland to its diverse cultural manifestations today She examines the interrelationships between step dancing and the changing historical and cultural contexts of colonialism nationalism postcolonialism and globalization and shows that step dancing is a powerful tool of embodiment and meaning that can provoke important questions relating to culture and identity through the bodies of those who perform it Focusing on the rural European region of North Kerry in the south west of Ireland Catherine Foley examines three step dance practices one the rural Molyneux step dance practice representing the end of a relatively long lived system of teaching by itinerant dancing masters in the region two Rinceoir na R ochta a dance school representative of the urbanized staged competition orientated practice cultivated by the cultural nationalist movement the Gaelic League established at the end of the nineteenth century and practised today both in Ireland and abroad and three the stylized commoditized folk theatrical practice of Siamsa T re the National Folk Theatre of Ireland established in North Kerry in the 1970s Written from an ethnochoreological perspective Catherine Foley provides a rich historical and ethnographic account of step dancing step dancers and cultural institutions in Ireland

Dublin, 2006 *Blockchain and Private International Law* Andrea Bonomi, Matthias Lehmann, Shaheez Lalani, 2023-11-13 The open access publication of this book has been published with the support of the Swiss National Science Foundation. Blockchain is the first global mechanism for the transfer and storage of value. Despite being conceived as an alternative to state and law, the technology and its use cases raise many legal questions, most notably regarding jurisdiction and applicable law with respect to transactions and assets recorded on the blockchain. The issue is complex given the decentralised nature of the network. In this volume, academics and practitioners from various countries try to provide detailed answers to these questions as they relate to crypto assets, cryptocurrencies, crypto derivatives, stablecoins, Central Bank Digital Currencies, and Decentralised Autonomous Organisations (DAOs) as well as specific transactions and issues such as property rights, secured transactions, smart contracts, and bankruptcy. With specific chapters on national approaches (Germany, Japan, Liechtenstein, Switzerland, United States), the volume explores the need and possibility for legal harmonisation of these issues through global fora such as the Hague Conference on Private International Law (HCCH) and UNIDROIT.
