Swansburg, Laurel C.

Swansburg, 1995 Middle School Life Science Judy Capra, 2000 Student activities provide the hands on experiences that are so important for middle grade learners They are used to introduce concepts thus providing time for exploration They are also used to reinforce concepts by providing students with opportunities to apply what they have learned An activity consists of the following components Introductory Paragraphs connect topics with previous lessons or to students experiences Focusing Questions provide the activity s purpose and encourage students to make decisions Materials show reduced versions of worksheets and data pages Procedures state group size specifies the assignment and emphasizes safety

precautions Analysis Questions encourage higher level thinking requiring students to interpret their data Conclusions require that students bring closure to an activity based on actual not predicted results Extension Activities are often interdisciplinary and encourage students to learn more through an activity or research project The readings build on students experiences and help them learn from the activities Some of the components are the same as those in the activities Subheadings provide reading clues Illustrations reinforce and clarify the text Analysis Questions range from being pure recall to fairly abstract They require that students think about the concepts and may have students personalize or otherwise apply the concepts Extension Activities provide opportunities for career exploration Boxed Items often appear at the end of a lesson to extend the concepts it presents Science Words is a listing of roots prefixes and suffixes that help students understand the terms used in this program Thinking Like a Scientist summarizes how students learn science in this program The comprehensive index lists the topics and terms that students may want to look up For each technical term a boldfaced entry shows where students can find its definition and the term used in context Instructional Alignment Suzanne Houff,2012-09-13 In response to a quagmire of jargon based and convoluted curriculum textbooks Instructional Alignment offers a concise and basic approach to instructional design By exploring the areas of planning assessment and methodology the text explains how these three areas provide an essential framework for effective teaching and illustrates how they align in order to maximize student learning Houff guides the reader through the process of developing objectives that identify what the learners should know and be able to do at the end of the lesson Next the readers study assessment strategies and tools that correlate with the stated objective in order to accurately determine if the objective has been met Direct and indirect instructional strategies are then explored to provide the reader with a variety of options or methods to best meet the objective Final alignment is demonstrated through a project based unit example that provides a visual representation of theory into practice With the concluding glossary of current trends and terms in instructional design readers will finish this key guidebook with a thorough understanding of effective instruction as well as the capacity to adopt methodical tested lessons in the classroom
