Creating Writers in the Primary Classroom Miles Tandy, Jo Howell, 2008-05-12

Teachers in English schools have now had ten years of prescriptive national literacy strategies and it is time for a new approach. This book encourages children from their early years to think of themselves as writers who have something to write and know how to write it. *Creating Writers in the Primary Classroom* offers an exciting and refreshing approach to teaching writing in the primary school with very practical suggestions to help build a community of writers in your school where everyone writes and loves writing. Building on the research of recent years and with whole curriculum provision, it shows teachers how to actively engage children in the writing process, excite them about what they can achieve, and help all children to think of themselves as writers. The book begins with a clear analysis of what real writers really need and has chapters on working outdoors using the very best of children's literature, drama, and imaginative play, as well as sounds and images. It also features a chapter on practical productive planning including two case studies that show the approaches in use at schools. *Creating Writers in the Primary Classroom* is packed with practical advice, games, and strategies for the classroom based on the authors' successful experience as teachers and in-service providers. These new approaches will enable teachers to get their children up and moving, experiencing what writers experience, feeling what writers feel, and most important of all, writing how writers write.

Thinking Through New Literacies for Primary and Early Years Jayne Metcalfe, Debbie Simpson, Ian Todd, Mike

Toyn, 2013-06-17 *Thinking Through New Literacies for Primary and Early Years* is an accessible text that encourages readers to consider deeply what is meant by literacy today. It explores the many different ways in which teachers and children develop their own literacy. Specifically written for education students in the later years of their course, the text draws on research and practice to explore the challenges and opportunities involved while helping to develop the reader's own critical thinking skills. The book begins by asking what's new about new literacies and goes on to explore some technological innovations designed to support the emergent reader and writer. It considers verbal literacy (speaking and listening) and visual literacy. Readers are encouraged to think through the issues surrounding inclusion and the legal and ethical issues raised by this post-typographic age. Throughout, practical guidance runs alongside structured critical thinking exercises to help the reader reflect on both theory and practice. About the Thinking Through Education Series: *Thinking Through Education* is a series of texts designed and written specifically for those education students entering the second or final phase of their
