Thodore Rousseau 1812-1867 arguably the most important French landscape artist of the mid nineteenth century and a leader of the so called Barbizon School occupies a crucial moment of transition from the idealizing effects of academic painting to the radically modern vision of the Impressionists He was an experimental artist who rejected the traditional historical biblical or literary subject matter in favor of unruly nature a Romantic naturalism that confounded his contemporaries with its bizarre compositional and coloristic innovations Lavishly illustrated and thoroughly documented this volume includes five essays by experts in the field Scott Allan and Edouard Kopp alternately examine Rousseau's diverse techniques and working procedures as a painter and as a draftsman as well as his art's mixed economic and critical fortunes on the art market and at the Salon Line Clausen Pedersen's essay focuses on Mont Blanc Seen from La Faucille Storm Effect an early touchstone for the artist and a spectacular example of the Romantic sublime in the Ny Carlsberg Glyptotek's collection This catalogue accompanies an eponymous exhibition on view at the J Paul Getty Museum from June 21 to September 11 2016 and at the Ny Carlsberg Glyptotek from October 13 2016 to January 8 2017 **"Visions of the Industrial Age, 1830-1914"** Amy Woodson-Boulton, 2017-07-05 Providing a comprehensive interdisciplinary assessment and with a particular focus on expressions of tension and anxiety about modernity this collection examines visual culture in nineteenth century Europe as it attempted to redefine itself in the face of social change and new technologies Contributing scholars from the fields of history art literature and the history of science investigate the role of visual representation and the dominance of the image by looking at changing ideas expressed in representations of science technology politics and culture in advertising art periodicals and novels They investigate how during the period new emphasis was placed on the visual with emerging forms of mass communication photography lithography newspapers advertising and cinema while older forms as varied as poetry the novel painting interior decoration and architecture became transformed The volume includes investigations into new innovations and scientific development such as the steam engine transportation and engineering the microscope spirit photography and the orrery as well as how this new technology is reproduced in illustrated periodicals The essays also look at more traditional forms of creative expression to show that the same concerns and anxieties about science technology and the changing perceptions of the natural world can be seen in the art of Armand Guillaumin Auguste Rodin Gustave Caillebotte and Camille Pissarro in colonial nineteenth century novels in design manuals in museums and in the decorations of domestic interior spaces *Visions of the Industrial Age 1830-1914* offers a thorough exploration of both the nature of modernity and the nature of the visual Architecture in Nineteenth Century Photographs Micheline Nilsen, 2011

Revealing that nineteenth century photography goes beyond the functional to reflect the cultural concerns of the time this study proposes that each photographic image of architecture be studied both as a primary visual document and an object of aesthetic inquiry The book offers a socio historical examination of the material considering questions of exoticism gender the art market vernacular architecture and historic preservation never before comprehensively addressed in a single volume
